Latest FCP_FMG_AD-7.4 Test Fee, FCP_FMG_AD-7.4 Standard Answers

You may urgently need to attend FCP_FMG_AD-7.4 certificate exam and get the certificate to prove you are qualified for the job in some area. But what certificate is valuable and useful and can help you a lot? Passing the FCP_FMG_AD-7.4 test certification can help you prove that you are competent in some area and if you buy our FCP_FMG_AD-7.4 Study Materials you will pass the test almost without any problems for we are the trustful vendor of the FCP_FMG_AD-7.4 practice guide for years.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q53-Q58):

NEW QUESTION # 53

An administrator created a new ADOM named Training for FortiGate devices only, and added the root FortiGate device of a Security Fabric group to the Training ADOM.

Given the administrator's actions, which statement correctly describes the expected result for the downstream devices in the Security Fabric?

- A. The downstream devices show as unauthorized in the Training ADOM.
- B. The downstream devices will appear in the root ADOM.
- C. The downstream devices are automatically authorized.
- D. The downstream devices must be added using the Add Device wizard.

Answer: A

Explanation:

All downstream fortigate in the sec fabric group will be added in unauthorized devices group in the same ADOM as the root.

NEW QUESTION # 54

An administrator has enabled Service Access on FortiManager. What is the purpose of Service Access on the FortiManager interface?

- A. It allows FortiManager to determine the connection status of managed devices.
- B. It allows administrative access to FortiManager.
- C. It allows third-party applications to gain read/write access to FortiManager.
- D. It allows FortiManager to respond to requests for FortiGuard services from FortiGate devices.

Answer: D

Explanation:

Select the Fortinet services that are allowed access on this interface. These include FortiGate Updates and Web Filtering. Service access is not enabled on any port by default.

NEW QUESTION # 55

Refer to the exhibit.

```

FortiManager # execute top

```

What percent of the available RAM is being used by the process in charge of downloading the web and email filter databases from the public FortiGuard servers?

- A. 1.5
- B. 3.1
- C. 4.1
- **D. 2.9**

Answer: D

Explanation:

In the exhibit, the FortiManager CLI output displays the results of the `top` command, which shows system processes, CPU usage, and memory (RAM) usage. We are specifically looking for the process responsible for downloading the web and email filter databases from the public FortiGuard servers. This process is typically handled by the `fgdlinkd` process.

Key information from the output:

- * The `fgdlinkd` process is listed with a PID of 1463.
- * The `%MEM` column shows that this process is using 2.9% of the available RAM.

Evaluation of Options:

- * A. 2.9: This is incorrect. The `fgdlinkd` process, which handles the web and email filter database downloads, is using 2.9% of the available memory, as indicated in the `%MEM` column.
- * B. 3.1: This is incorrect. The 3.1% memory usage belongs to the `fwmsvrd` process, not the `fgdlinkd` process.
- * C. 1.5: This is incorrect. The 1.5% memory usage belongs to the `fclinkd` process, not the `fgdlinkd` process.
- * D. 4.1: This is incorrect. The 4.1% memory usage belongs to the `fgdsrvr` process, not the `fgdlinkd` process.

NEW QUESTION # 56

Which two statements about the integrity of databases on FortiManager are correct? (Choose two.)

- **A. Scheduled backups run database integrity commands automatically.**
- **B. Not following the correct upgrade path may cause inconsistencies in the databases.**
- C. The `diagnose cdb check adom-integrity` command can correct issues related to looked devices.
- D. The `diagnose dvm check-integrity` command attempts to fix a corrupted file system.
- E. You should fix all database integrity issues before performing a backup.

Answer: A,B

NEW QUESTION # 57

Refer to the exhibit. An administrator is about to add the FortiGate device to FortiManager using the discovery process. FortiManager is operating behind a NAT device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

What is the expected result?

- A. During discovery, FortiManager sets the FortiManager NATed IP address on FortiGate.
- B. During discovery, FortiManager sets both the FortiManager NATed IP address and NAT device IP address on FortiGate.
- C. During discovery, FortiManager uses only the FortiGate serial number to establish the connection.
- D. During discovery, FortiManager sets the NATed device IP address on FortiGate.

Answer: A

Explanation:

You can configure the FortiManager NATed IP address on FortiGate under the central management configuration. This allows FortiGate to announce itself to FortiManager and try to re-establish the FGFM tunnel, if it is torn down. Configuring the FortiManager NATed IP address on FortiGate allows both FortiManager and FortiGate to re-establish the FGFM tunnel. Also, if you configure the FortiManager NATed IP address under the FortiManager system administrator settings, FortiManager sets this address on FortiGate during the discovery process.

NEW QUESTION # 58

.....

This Fortinet PDF file is a really convenient and manageable format. Furthermore, the Fortinet FCP_FMG_AD-7.4 PDF is printable which enables you to study or revise questions on the go. This can be helpful since staring at a screen during long study hours can be tiring and the FCP_FMG_AD-7.4 PDF hardcopy format is much more comfortable. And this FCP - FortiManager 7.4 Administrator price is affordable.
