Latest Updated Juniper JN0-351 Reliable Test Pdf: Enterprise Routing and Switching, Specialist (JNCIS-ENT) & JN0-351 Reliable Test Price

If a person fails despite proper Enterprise Routing and Switching, Specialist (JNCIS-ENT) JN0-351 test preparation and using JN0-351 practice exam material, ActualTestsQuiz provides a money-back guarantee. If a person fails despite proper Enterprise Routing and Switching, Specialist (JNCIS-ENT) JN0-351 test preparation and using JN0-351 practice exam material, ActualTestsQuiz provides a money-back guarantee. ActualTestsQuiz offers three months of free updates if the Enterprise Routing and Switching, Specialist (JNCIS-ENT) exam content changes after the purchase of Enterprise Routing and Switching, Specialist (JNCIS-ENT) valid dumps. ActualTestsQuiz wants to save your time and money, so the authentic and accurate Enterprise Routing and Switching, Specialist (JNCIS-ENT) JN0-351 Exam Questions help candidates to pass their JN0-351 certification test on their very first attempt.

Juniper JN0-351 Exam Syllabus Topics:

Topic	Details

Topic 1	• Layer 2 Switching or VLANs: This topic deepens the understanding of Layer 2 switching operations within the Junos OS, including VLAN concepts and benefits. Experienced networking professionals gain insights into configuration, monitoring, and troubleshooting techniques essential for network segmentation and efficiency.
Topic 2	• IS-IS: Aspiring Juniper networking professionals enhance their understanding of IS-IS routing protocols. This topic equips candidates with the knowledge to configure and monitor IS-IS systems, addressing specific exam challenges and practical applications.
Topic 3	• Tunnels: The fundamentals of IP tunneling are emphasized, highlighting their requirements and functionalities. Mastery in configuring, monitoring, and troubleshooting tunnels equips professionals to meet the demands of the JN0-351 Exam.
Topic 4	• Protocol Independent Routing: An essential domain for understanding routing components outside protocol dependencies, this topic enhances expertise in configuring, monitoring, and troubleshooting critical elements.

Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q98-Q103):

NEW QUESTION # 98
Exhibit
You are a network operator troubleshooting BGP connectivity.
Which two statements are correct about the output shown in the exhibit? (Choose two.)

- A. The BGP session is not established.
- B. The routers are exchanging IPv4 routes.
- C. The R1 is configured for AS 65400.
- D. Peer 10.32.1.2 is configured for AS 63645.

Answer: A,C

Explanation:
Explanation
Option B suggests that the BGP session is not established. This is correct because in the output, the state of the BGP session is shown as "Idle". In BGP, an "Idle" state means that the BGP session is not currently established1.
Option C suggests that R1 is configured for AS 65400. This is also correct because in the output, it's shown that the local AS number is 654001. The local AS number represents the Autonomous System (AS) number of the router on which you're checking the BGP session1.

NEW QUESTION # 99
Referring to the exhibit, the local router should have an IS-IS adjacency with a neighboring router, but the adjacency never establishes correctly.
What should you do to solve the problem?

- A. Change the local IS-IS area ID to 49.0002.
- B. Disable level 1 for the interfaces.
- C. Disable wide metrics.
- D. Disable level 2 for the interfaces.

Answer: A

NEW QUESTION # 100
Which statement is correct about IP-IP tunnels?

- A. The TTL in the inner packet is decremented during transit to the tunnel endpoint.
- B. There are 24 bytes of overhead with IP-IP encapsulation.
- C. IP-IP tunnels only support encapsulating non-IP traffic.
- D. IP-IP tunnels only support encapsulating IP traffic.

Answer: D

Explanation:
"The ENCAPSULATOR does not change the inner IP header, except to decrement the TTL and it remains unchanged during its deliver to the endpoint" - only router that encapsulates the inner packet decrements its TTL - during transit, the inner packet is unchanged.

NEW QUESTION # 101
Referring to the output shown in the exhibit, which statement is correct?

- A. 11.0.0.108/32 is being per-packet load-balanced
- B. 11.0.0.108/32 is being per-flow load-balanced
- C. 11.0.0.102/32 is being per-flow load-balanced
- D. 11.0.0.102/32 is being per-packet load-balanced

Answer: A

NEW QUESTION # 102
Referring to the exhibit, why is this OSPF adjacency remaining in this state?

- A. A subnet mask mismatch exists between the OSPF neighbors.
- B. An MTU mismatch exists between the OSPF neighbors.
- C. A hello interval mismatch exists between the OSPF neighbors.
- D. An area ID mismatch exists between the OSPF neighbors

Answer: B

Explanation:
OSPF stuck in ExStart is mainly related to mismatched MTU. It could also be caused by a firewall filter on the loopback interface, but this is not an alternative.

NEW QUESTION # 103
......

A professional Juniper certification serves as the most powerful way for you to show your professional knowledge and skills. For those who are struggling for promotion or better job, they should figure out what kind of JN0-351 Test Guide is most suitable for them. However, some employers are hesitating to choose. We here promise you that our JN0-351 certification material is the best in the market, which can definitely exert positive effect on your study. Our Enterprise Routing and Switching, Specialist (JNCIS-ENT) learn tool create a kind of relaxing leaning atmosphere that improve the quality as well as the efficiency, on one hand provide conveniences, on the other hand offer great flexibility and mobility for our customers. That's the reason why you should choose us.
