

# New Launch Ping Identity PAP-001 Exam Questions Are Out: Download And Prepare

BTW, DOWNLOAD part of PDFDumps PAP-001 dumps from Cloud Storage: <https://drive.google.com/open?id=1VoiqdaIlzawpqWCp9EnVxTw7smPXD1Nx>

By these three versions of PAP-001 practice materials we have many repeat orders in a long run. The PDF version helps you read content easier at your process of studying with clear arrangement, and the PC Test Engine version of PAP-001 practice materials allows you to take stimulation exam to check your process of exam preparing, which support windows system only. Moreover, there is the APP version of PAP-001 practice materials, you can learn anywhere at any time with it at your cellphones without the limits of installation.

At any point in the process of buying our PAP-001 exam braindumps, the customer does not need to check the status of the purchase order, because as long as you have paid for it, then you can get it in a second. With all those efficiency, our PAP-001 study engine is suitable in this high-speed society. With strong strength in this career, we can claim that you can only study our PAP-001 learning guide for 20 to 30 hours, you can pass your PAP-001 exam with 100% guarantee.

## 2026 Reliable PAP-001 Exam Syllabus | Trustable PAP-001 100% Free Latest Test Vce

If you buy our PAP-001 study materials you will pass the PAP-001 test smoothly and easily. We boost professional expert team to organize and compile the PAP-001 training materials diligently and provide the great service which include the service before and after the sale, the 24-hours online customer service and refund service. Our PAP-001 real quiz boosts 3 versions and varied functions to make you learn comprehensively and efficiently. The learning of our study materials costs you little time and energy and we update them frequently. questions: Certified Professional - PingAccess in detail please look at the introduction of our product as follow.

### Ping Identity PAP-001 Exam Syllabus Topics:

--

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Installation and Initial Configuration: This section of the exam measures skills of System Engineers and reviews installation prerequisites, methods of installing or removing PingAccess, and securing configuration database passwords. It explains the role of run.properties entries and outlines how to set up a basic on-premise PingAccess cluster.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Integrations: This section of the exam measures skills of System Engineers and explains how PingAccess integrates with token providers, OAuth and OpenID Connect configurations, and site authenticators. It also includes the use of agents and securing web, API, and combined applications through appropriate integration settings.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>General Maintenance and File System: This section of the exam measures the skills of System Engineers and addresses maintenance tasks such as license management, backups, configuration imports or exports, auditing, and product upgrades. It also includes the purpose of log files and an overview of the PingAccess file system structure with important configuration files.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Security: This section of the exam measures skills of Security Administrators and highlights how to manage certificates and certificate groups. It covers the association of certificates with virtual hosts or listeners and the use of administrator roles for authentication management.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Product Overview: This section of the exam measures skills of Security Administrators and focuses on understanding PingAccess features, functionality, and its primary use cases. It also covers how PingAccess integrates with other Ping products to support secure access management solutions.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Policies and Rules: This section of the exam measures the skills of Security Administrators and focuses on how PingAccess evaluates paths for applying policies and resources. It covers the role of different rule types, their configuration, and the implementation of rule sets and rule set groups for consistent policy enforcement.</li> </ul>

## Ping Identity Certified Professional - PingAccess Sample Questions (Q47-Q52):

### NEW QUESTION # 47

An administrator is setting up PingAccess to terminate SSL for a proxied application. What action must the administrator take to configure an existing certificate for that application?

- A. Set the secure flag to Yes in the Site configuration
- B. Assign the Key Pair to the Agent Listener
- C. Enable Require HTTPS in the Application configuration
- D. Assign the Key Pair to the Virtual Host

**Answer: D**

Explanation:

PingAccess terminates SSL at the Virtual Host level. To configure an existing certificate, the administrator must assign the appropriate Key Pair (which contains the certificate and private key) to the Virtual Host.

Exact Extract:

"SSL termination occurs on the engine listener through virtual hosts. Assign the certificate's key pair to the virtual host to secure proxied applications."

\* Option A is correct - assign the key pair to the Virtual Host for SSL termination.

\* Option B is incorrect - Require HTTPS enforces secure access but does not configure SSL termination.

\* Option C is incorrect - Agent Listener is for PingAccess Agents, not proxied apps.

\* Option D is incorrect - secure flag affects cookie settings, not SSL certificates.

Reference: PingAccess Administration Guide - Virtual Hosts and Key Pairs

### NEW QUESTION # 48

How many administrators are supported using HTTP Basic Authentication in the Administrative Console?

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

When using HTTP Basic Authentication (admin.auth=native), PingAccess only supports a single administrative account (the default admin user). For multiple administrators, SSO integration (e.g., OIDC) is required.

Exact Extract:

"When admin authentication is set to native (HTTP Basic), only one administrative user is supported. For multiple admins, configure UI authentication with an OIDC provider."

\* Option A (1000) is incorrect.

\* Option B (1) is correct - only one basic auth admin account.

\* Option C (10) and Option D (100) are incorrect.

Reference: PingAccess Administration Guide - Admin Authentication

### NEW QUESTION # 49

A change is made to the configuration that prevents user access to an application. No one claims to have made the change. Which log file should the administrator use to determine who made the change?

- A. pingaccess\_engine\_audit.log
- B. pingaccess\_agent\_audit.log
- C. pingaccess.log
- **D. pingaccess\_api\_audit.log**

**Answer: D**

Explanation:

All administrative API calls that change PingAccess configuration are logged in pingaccess\_api\_audit.log.

This allows administrators to track who made configuration changes.

Exact Extract:

"The pingaccess\_api\_audit.log file contains entries for all administrative API calls and is used to audit configuration changes."

\* Option A (pingaccess.log) contains runtime system messages but not detailed API audit entries.

\* Option B (pingaccess\_engine\_audit.log) is specific to engine request/response audit logging.

\* Option C (pingaccess\_agent\_audit.log) is used for PingAccess Agent traffic auditing, not administrative changes.

\* Option D (pingaccess\_api\_audit.log) is correct - it tracks admin API modifications.

Reference: PingAccess Administration Guide - Log Files

### NEW QUESTION # 50

The performance testing team finds that an API hosted in a remote datacenter is experiencing higher response times compared to similar APIs hosted onsite. Which option in PingAccess can be used to improve performance in this scenario?

- A. Move the API to a separate Virtual Host
- B. Reduce the number of attributes in the ID Token
- **C. Enable Cache Token on the OAuth Resource Server**
- D. Reduce the Key Roll Interval on the web session

**Answer: C**

Explanation:

When APIs are remote, latency is introduced by frequent token validation requests. Enabling Cache Token on the OAuth Resource Server reduces repeated validation calls and improves performance.

Exact Extract:

"The OAuth Resource Server configuration includes a Cache Token option that improves performance by reducing round trips for

token validation."

- \* Option A is incorrect - key rolling affects cryptographic keys, not API latency.
- \* Option B is incorrect - virtual hosts control external FQDNs, not performance.
- \* Option C is incorrect - token attribute size does not significantly affect remote latency.
- \* Option D is correct - caching tokens reduces validation overhead.

Reference: PingAccess Administration Guide - OAuth Resource Server Settings

### NEW QUESTION # 51

Where should an administrator adjust SameSite Cookie settings?

- A. Applications
- B. Rules
- C. Sites
- **D. Web Sessions**

**Answer: D**

Explanation:

The SameSite attribute is applied to session cookies to control cross-site behavior. In PingAccess, session cookie configuration (including SameSite) is defined at the Web Session level.

Exact Extract:

"Web session configuration includes cookie attributes such as name, domain, secure flag, HTTPOnly, and SameSite."

- \* Option A (Rules) is incorrect - rules govern access control, not cookies.
- \* Option B (Sites) defines backend connections, not session cookies.
- \* Option C (Applications) ties resources to sessions but does not define cookie behavior.
- \* Option D (Web Sessions) is correct - session cookie SameSite settings are configured here.

Reference: PingAccess Administration Guide - Web Session Cookies

### NEW QUESTION # 52

.....

Passing the PAP-001 exam and obtaining the certification mean opening up a new and fascinating phase of your professional career. Just imagine that what a brighter future will be with the PAP-001 certification! You may be employed by a bigger enterprise and get a higher position. The income will be doubled for sure. And Our PAP-001 study braindumps enable you to meet the demands of the actual certification exam within days. We can claim that with our PAP-001 practice guide for 20 to 30 hours, you are able to attend the exam with confidence.
