## Axis Network Video Exam Sample Questions (Q81-Q86):

### NEW QUESTION # 81

Two benefits of Axis HDTV cameras supporting the SMTPE standards are

- A. Color fidelity and full duplex 2-channel audio.
- **B. Color fidelity and minimum 25/30 fps frame rate.**
- C. Full duplex 2-channel audio and automatic screen calibration.
- D. Minimum 25/30 fps frame rate and full duplex 2-channel audio.

**Answer: B**

### NEW QUESTION # 82

What type of camera is recommended to be used in an extremely hot environment?

- A. Cameras that end with -V
- B. Cameras that end with -C
- **C. Cameras that end with -E**
- D. Cameras that end with -R

**Answer: C**

Explanation:

Axis cameras that have model numbers ending with -E are specifically designed for extreme environments, including those with high temperatures. These cameras are built to withstand harsh conditions and provide reliable performance in challenging environments. The -E designation indicates enhanced durability and temperature tolerance, making them suitable for installations in locations where standard cameras might fail.

Axis Network Video documentation highlights the features and specifications of these ruggedized camera models.

### NEW QUESTION # 83

A customer wants his video surveillance system to completely cover the perimeter of his property. For the installer to ensure that the camera system is not subject to sabotage, he should

- **A. Make sure each camera is seen by at least one other camera.**
- B. Install more low-priced cameras to cover the complete site.
- C. Use PoE, and not a PoE splitter.
- D. Install thermal cameras.

**Answer: A**

Explanation:

To ensure that a surveillance system is not easily sabotaged, it's important to position cameras so that each camera is visible to at least one other camera. This overlapping field of view allows for continuous monitoring even if one camera is tampered with or disabled, providing a higher level of security and redundancy.
