## Valid Braindumps UiPath-TAEPv1 Ebook & UiPath-TAEPv1 Instant Access

UiPath UiPath-TAEPv1 reliable brain dumps are promised to help you clear your UiPath-TAEPv1 test certification with high scores. UiPath-TAEPv1 questions & answers will contain comprehensive knowledge, which will ensure high hit rate and best pass rate. When you choose UiPath-TAEPv1 Pdf Torrent, you will get your UiPath-TAEPv1 certification with ease, which will be the best choice to accelerate your career as a professional in the Information Technology industry.

## UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q51-Q56):

### NEW QUESTION # 51

What type of data sources can be used for a data-driven test that will be developed using UiPath Test Suite on Premises version?

- A. File (Excel and CSV)  
Data Service  
Existing data already Stored in the Test Data folder of the project  
Test Data Queue
- B. File (Excel and CSV)  
Auto Generate  
Existing data already Stored in the Test Data folder of the project  
Test Data Queue
- C. File (Excel and CSV)

- Auto Generate
- Data Service
- Existing data already Stored in the Test Data folder of the project
- D. File (Excel and CSV)
  - Auto Generate
  - Data Service
  - Test Data Queue

**Answer: B**

Explanation:

In UiPath Test Suite On-Premises, supported data sources for data-driven tests include:

File (Excel and CSV)

Auto Generate

Existing data stored in the Test Data folder of the project

Test Data Queue

These options allow flexible management and variation of test inputs for automated testing.

**NEW QUESTION # 52**

What happens once a Test Set execution starts in Test Manager?

- A. A Test Case log is created for each executed Test Case, and an empty test result entry is added to an unnamed test execution container.
- B. A test execution container is created without a name, and an empty test result entry, called a test case log, is added for each Test Case.
- C. A test execution container with the same name as the Test Set is created, and for each Test Case, an empty test result entry, called a test case log, is added.
- D. An empty test result, called a Test Case log, is created, but no test execution container is formed.

**Answer: C**

Explanation:

Once a Test Set execution starts in UiPath Test Manager, a test execution container with the same name as the Test Set is created. Additionally, for each Test Case in the Test Set, an empty test result entry, called a test case log, is added. This structure helps track the execution results for each individual test case under the overall test set.

**NEW QUESTION # 53**

What type of license is used for an Unattended Robot in development and testing mode, enabling it to execute both test cases and RPA processes?

- A. Citizen Developer
- B. RPA Developer
- C. Testing
- D. NonProduction

**Answer: D**

Explanation:

A NonProduction license is used for an Unattended Robot in development and testing mode, allowing it to execute both test cases and RPA processes. It is ideal for scenarios that simulate production without affecting live environments.

**NEW QUESTION # 54**

A developer, who has just discovered Test Suite, built a test case that checks if the SumWorkflow correctly performs the sum of 2 integers, using different input values from an Excel file.

What could be considered an improvement in the way the test was developed?

SumWorkflow:

TestCase:

TestData.xlsx:

- A. Surround the SumWorkflow in a Retry Scope to improve error handling.
- B. Replace the Verify Expression activity with Verify Expression with Operator to benefit from built-in operators.
- C. Use the Excel file as a Data Variation Source, instead of iterating through it inside the test case.
- D. Replace the Given-When-Then structure with a custom-built framework.

**Answer: C**

Explanation:

The current test case manually iterates through the Excel file using a For Each Row loop. A better practice is to use the Excel file as a Data Variation Source by configuring it as a data-driven test case. This allows Test Suite to automatically generate separate test runs for each row in the file, improving maintainability, visibility of test results, and alignment with Test Suite best practices.

#### **NEW QUESTION # 55**

Where are Postman collection endpoint activities found after being imported into a Studio library?

- A. In the Activities tab, under the Postman imported libraries list.
- B. In the Debug tab, within the testing activities pack.
- C. In the Activities tab, under the namespace that you have set.
- D. In the Projects tab, under the namespace of the imported Postman collection.

**Answer: C**

Explanation:

After importing a Postman collection into a Studio library, the endpoint activities appear in the Activities tab, under the namespace that you have set during the import process. This makes them reusable across workflows.

#### **NEW QUESTION # 56**

.....

If you buy the Software or the APP online version of our UiPath-TAEPv1 study materials, you will find that the timer can aid you control the time. Once it is time to submit your exercises, the system of the UiPath-TAEPv1 preparation exam will automatically finish your operation. After a several time, you will get used to finish your test on time. If you are satisfied with our UiPath-TAEPv1 training guide, come to choose and purchase.
