Haben sie von AAPC CPC Dumps von ZertFragen gehört? Aber, Haben Sie diese Dumps benutzt? Viele Leute haben gesagt, dass ZertFragen Dumps sehr gute Unterlagen sind, womit sie die AAPC CPC Zertifizierungsprüfung bestanden haben. Wir ZertFragen sind von vielen Leuten, die früher die AAPC CPC Dumps benutzt haben, gut bewertet, weil sie wirklich viel Zeit für die AAPC CPC Prüfungen sparen und den Erfolg für die Teilnehmer garantieren.

Es ist nicht unmöglich, die AAPC CPC Prüfung leicht zu bestehen. Dieses Gefühl haben schon viele Benutzer der AAPC CPC Prüfungssoftware von unserer ZertFragen empfunden. Dieses Gefühl können Sie auch empfinden, solange Sie unsere kostenlose Demo probieren. Wir sind verantwortlich für jeder Kunde, der unsere Produkte wählt, und garantieren, dass unsere Kunden immer die neueste Version von AAPC CPC Prüfungssoftware benutzen.

CPC Prüfungsunterlagen, CPC Exam

Auf der Webseite ZertFragen können Sie sich mühlos auf die AAPC CPC Zertifizierungsprüfung vorbereiten und auch manche häufig vorkommenden Fehler vermeiden. Unsere Berufsgruppe aus gut ausgebildeten und erfahrenen IT-Eliten haben die Entwicklungen der ständig veränderten IT-Branche untersucht und erforscht, dann schließen Sie die Fragenkataloge zur AAPC CPC Zertifizierungsprüfung für ZertFragen zusammen. Diese AAPC CPC Fragenkataloge verfügen über hohe Genauigkeit und Autorität.

ZertFragen wird Ihre beste Wahl sein!

AAPC CPC Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Evaluation & Management Services: This section of the exam measures the skills of coding specialists and covers office visits, hospital care, consultations, and other E • M services. It tests the understanding of time-based coding, medical decision-making, and history • exam components per current CMS guidelines.
Thema 2	• Cardiovascular System: This section of the exam measures the skills of coding specialists and addresses services related to the heart, arteries, and veins. It involves the coding of diagnostic and therapeutic procedures, including catheterizations, bypasses, and repairs.:
Thema 3	• Overview of ICD-10-CM: This section of the exam measures the skills of medical coders and introduces the structure, format, and usage of the ICD-10-CM coding system. It reviews the purpose of ICD-10-CM in diagnosis reporting and prepares candidates to interpret chapters, code ranges, and conventions embedded in the system.
Thema 4	• Radiology: This section of the exam measures the skills of coding specialists and focuses on diagnostic imaging procedures including X-rays, CT scans, MRIs, ultrasounds, and nuclear medicine. It emphasizes proper selection of codes based on anatomical site and modality used.
Thema 5	• Hemic & Lymphatic Systems, Mediastinum, Diaphragm: This section of the exam measures the skills of medical coders and includes procedures related to the spleen, lymph nodes, bone marrow, as well as surgical interventions in the mediastinum and diaphragm. Coders must differentiate procedures by region and system accurately.
Thema 6	• Female Reproductive System and Maternity Care & Delivery: This section of the exam measures the skills of coding specialists and evaluates coding accuracy for gynecological and obstetric procedures. It includes deliveries, antepartum care, cesarean sections, and surgical procedures involving female reproductive anatomy.
Thema 7	• Endocrine System and Nervous System: This section of the exam measures the skills of medical coders and assesses the ability to assign codes for surgeries involving glands, the brain, spinal cord, and peripheral nerves. Procedures like resections and electrical stimulation are part of the evaluated content.
Thema 8	• Anesthesia: This section of the exam measures the skills of medical coders and involves coding anesthesia services based on surgical site, complexity, and time. It tests the understanding of anesthesia modifiers and the importance of linking anesthesia codes with the correct primary procedures.
Thema 9	• Digestive System: This section of the exam measures the skills of coding specialists and evaluates the coding of surgeries and procedures involving the oral cavity, pharynx, esophagus, stomach, intestines, liver, pancreas, and related organs. Understanding endoscopic procedures is particularly critical here.
Thema 10	• Pathology & Laboratory: This section of the exam measures the skills of medical coders and includes lab tests, specimen analysis, and pathological examination procedures. It ensures that coders understand how to apply codes for chemistry panels, cultures, and histopathological diagnostics.
Thema 11	• The Business of Medicine: This section of the exam measures the skills of medical coders and covers foundational knowledge regarding the healthcare system, reimbursement models, insurance payers, HIPAA compliance, and the ethical responsibilities coders hold within clinical and billing environments. It establishes the context in which coding decisions directly affect healthcare operations and financial outcomes.

AAPC Certified Professional Coder (CPC) Exam CPC Prüfungsfragen mit Lösungen (Q81-Q86):

81. Frage

View MR 005398

MR 005398

Operative Report

Preoperative Diagnosis: Nonfunctioning right kidney with ureteral stricture.

Postoperative Diagnosis: Nonfunctioning right kidney with ureteral stricture.

Procedure: Right nephrectomy with partial ureterectomy.

Findings and Procedure: Under satisfactory general anesthesia, the patient was placed in the right flank position. Right flank and abdomen were prepared and draped out of the sterile field. Skin incision was made between the 11th and 12th ribs laterally. The incision was carried down through the underlying subcutaneous tissues, muscles, and fascia. The right retroperitoneal space was entered. Using blunt and sharp dissection, the right kidney was freed circumferentially. The right artery, vein, and ureter were identified. The ureter was dissected downward where it is completely obstructed in its distal extent. The ureter was clipped and divided distally. The right renal artery was then isolated and divided between 0 silk suture ligatures. The right renal vein was also ligated with suture ligatures and 0 silk ties. The right kidney and ureter were then submitted for pathologic evaluation. The operative field was inspected, and there was no residual bleeding noted, and then it was carefully irrigated with sterile water. Wound closure was then undertaken using 0 Vicryl for the fascial layers, 0 Vicryl for the muscular layers, 2-0 chromic for subcutaneous tissue, and clips for the skin. A Penrose drain was brought out through the dependent aspect of the incision. The patient lost minimal blood and tolerated the procedure well.

What CPT coding is reported for this case?

- A. 0
- B. 1
- C. 2
- **D. 3**

Antwort: D

Begründung:

The procedure involves a right nephrectomy with partial ureterectomy for a nonfunctioning right kidney with ureteral stricture.

Procedure Description:

Right nephrectomy (removal of the kidney).

Partial ureterectomy (removal of part of the ureter).

CPT Coding:

50220: Nephrectomy, including partial ureterectomy, any open approach.

AMA's CPT Professional Edition (current year).

CPT Assistant for detailed coding guidelines on nephrectomy procedures.

82. Frage

Refer to the supplemental information when answering this question:

View MR 065174

What E/M code is reported for this encounter?

- A. 0
- B. 1
- **C. 2**
- D. 3

Antwort: C

Begründung:

To determine the correct E/M code, we need to consider the three key components: history, examination, and medical decision making (MDM).

* History:

* The documentation indicates an expanded problem-focused history. This is supported by the detailed history of present illness, including the patient's description of symptoms, family history, and review of systems with pertinent positives and negatives.

* Examination:

* The examination is also expanded problem-focused. The physician focused on the relevant systems (head, neck, throat) and documented specific findings related to the chief complaint (thyromegaly).

* Medical Decision Making:

* The MDM is straightforward. The physician is evaluating a new problem (bilateral thyroid nodules) with a low level of risk.

Although further workup is planned, this alone doesn't automatically increase the MDM complexity.

Based on these components, 99213 is the most appropriate code.

Why other options are incorrect:

* 99212: Requires a problem-focused history and examination, which is less comprehensive than what was documented.

* 99214 and 99215: Require a higher level of MDM (low or moderate complexity) and/or a more detailed examination. The documentation doesn't support this level of service.

References:

* CPT Codes 99211-99215: Office or other outpatient visit for the evaluation and management of an established patient

* 1995 and 1997 Documentation Guidelines for Evaluation and Management Services: These guidelines provide detailed criteria for selecting the appropriate E/M code based on history, examination, and MDM.

* AAPC Coder's Desk Reference: This resource provides detailed information on coding guidelines and procedures.

83. Frage

The Medicare program has multiple parts covering different services. Which part provides coverage for outpatient physician charges?

- A. Part B
- B. Part D
- C. Part A
- D. Part C

Antwort: A

Begründung:

Medicare Part B provides coverage for outpatient services, including physician services, preventive care, outpatient procedures, diagnostic tests, and durable medical equipment. Part B is a key component of Medicare, covering medically necessary services and some preventive services.

A: Part C (Medicare Advantage) includes all benefits and services covered under Parts A and B and often additional services, but it is provided through private insurance companies.

C: Part A covers inpatient hospital care, skilled nursing facility care, hospice, and some home health services.

D: Part D provides coverage for prescription drugs.

Therefore, the correct answer is B. Part B.

84. Frage

An established patient suffering from migraines without aura, no mention of intractable migraine, and no mention of status migrainosus, is seen by his ophthalmologist who conducts a visual field examination of both eyes. The examination was accomplished plotting four isopters utilizing the Goldmann perimeter testing method. The patient and requesting physician receive the interpretation and report on the same date of service.

What procedure and diagnosis codes are reported for this encounter?

- A. 92082, G43.019
- B. 92083, G43.019
- C. 92082, G43.009
- D. 92081, G43.009

Antwort: C

85. Frage

A patient's left eye is damaged beyond repair due to a work injury. The provider fabricates a prosthesis from silicon materials and makes modifications to restore the patient's cosmetic appearance.

What CPTcode is reported?

- A. 0
- B. 1
- C. 2
- D. 3

Antwort: D

Begründung:

1. Procedure and CPTCode Selection:

The scenario describes the fabrication of an ocular prosthesis due to a severe injury to the left eye. A prosthesis made from silicon materials was created and customized to restore cosmetic appearance.

Code 21088 is the correct CPT code for facial prosthesis involving materials, such as silicone, specifically designed to address anatomical loss in the eye region. This code accurately reflects the custom fabrication of a prosthesis to replace or augment damaged eye structures for aesthetic purposes.

2. Ruling Out Other Options:

Code 21077 applies to the prosthetic augmentation or replacement of mandibular or maxillary bone, not ocular prostheses, so it does not apply here.

Code 21080 covers the fabrication of facial prosthetics but is not specific to the ocular area and is more generalized. Given the focused nature of the eye, 21088 is more appropriate.

Code 21086 pertains to the creation of orbital prostheses (used for areas surrounding the eye) but not specifically for an ocular prosthesis. Since this scenario involves an intraocular replacement, 21088 is the most precise choice.

3. AAPC and CPTGuidelines:

According to AAPC guidelines, using codes for facial prosthetics requires matching the specific anatomical site and purpose of the prosthesis. CPT21088 is directly applicable to prosthetic replacements within the ocular region, making it the best fit.

Thus, based on the CPT guidelines and coding standards, the verified answer is C. 21088.
