100% Pass WGU - Information-Technology-Management - WGU Information Technology Management QGC1 –Trustable Valid Exam Book

It is known to us that the Information-Technology-Management exam has been increasingly significant for modern people in this highly competitive world, because the test certification can certify whether you have the competitive advantage in the global labor market or have the ability to handle the job in a certain area, especial when we enter into a newly computer era. Therefore our Information-Technology-Management practice torrent is tailor-designed for these learning groups, thus helping them pass the exam in a more productive and efficient way and achieve success in their workplace.

WGU Information Technology Management QGC1 Sample Questions (Q127-Q132):

NEW QUESTION # 127

Which information system facilitates the sharing of data between the human resources and purchasing department in the same corporation?

- A. Executive support (ES)
- **B. Enterprise resource planning (ERP)**
- C. Customer relationship management (CRM)
- D. Geographic information system (GIS)

Answer: B

NEW QUESTION # 128

What are ecological results of the expanded use of technology? Choose 2 answers.

- A. Lengthened life span of computer equipment
- B. More people purchasing computer equipment
- **C. Increased energy consumption**
- **D. Increased carbon emissions**
- E. Decreased electronic waste

Answer: C,D

Explanation:

* Increased Carbon Emissions:

* Technology relies on electricity, often generated from fossil fuels, leading to higher carbon emissions.

* The production, transportation, and disposal of electronic devices contribute to the carbon footprint.

* Increased Energy Consumption:

* Expanded use of technology leads to higher energy demands for operating servers, cooling data centers, and powering devices.

* The rise of 24/7 technology operations has amplified global energy consumption.

* Why Other Options Are Incorrect:

* Option A: The lifespan of technology tends to shorten due to rapid advancements and planned obsolescence.

* Option C: While more devices are purchased, this does not directly indicate an ecological result.

* Option D: Electronic waste has increased, not decreased, due to growing technology adoption and lack of recycling initiatives.

NEW QUESTION # 129

Which term describes an iterative design approach that builds a model of a system to ensure it meets user and business requirements?

- A. Rapid application development (RAD)
- **B. Loose coupling**
- C. Discovery prototyping
- D. Joint application development (JAD)

Answer: B

NEW QUESTION # 130

Which Agile ceremony involves team members sharing their progress, plans, and obstacles?

- A. Sprint retrospective
- **B. Daily stand-up meeting**
- C. Product demo
- D. Backlog refinement

Answer: B

Explanation:

The daily stand-up (daily Scrum) meeting is a short, time-boxed meeting where team members share:

What they accomplished yesterday

What they plan to do today

Any obstacles or blockers they face

This meeting promotes transparency, communication, and quick issue resolution.

Option B (Sprint retrospective): Focuses on team improvement after a sprint, not daily updates.

Option C (Backlog refinement): Involves updating backlog items, not daily progress.

Option D (Product demo): Occurs at the sprint review, showcasing completed work.

Thus, the correct ceremony is the daily stand-up meeting.

NEW QUESTION # 131

A team tests a prototype prior to meeting with a company's client and discovers the "My Account" menu is not working. The team revises the code and presents a functioning prototype to the client.

Which advantage of prototyping does this describe?

- A. Detailed instructions for development
- **B. Early detection of coding errors**
- C. Blueprint of the entire project
- D. Static example of the finished product

Answer: B

Explanation:

* Advantage of Prototyping:

* Prototyping allows teams to identify and resolve issues, such as coding errors, early in the development process.

* This minimizes the risk of errors propagating into later stages.

* Scenario Application:

* The team detected a menu functionality issue in the prototype, revised the code, and presented an updated version.

* This demonstrates the value of early error detection through prototyping.

* Why Other Options Are Incorrect:

* Option A: Prototypes are not static examples.

* Option B: Prototypes are not project blueprints.

* Option D: Prototyping is not about creating development instructions.
