

FCP_FGT_AD-7.6 Schulungsangebot & FCP_FGT_AD-7.6 PDF

Übrigens, Sie können die vollständige Version der EchteFrage FCP_FGT_AD-7.6 Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1m3aOojA0zAQssuKzMTQH3vUu0G-VwZ4>

Die Welt verändert sich. Daher müssen mit den Veränderungen Schritt halten. Wir EchteFrage beachten immer die vielfältige Veränderungen der Fortinet FCP_FGT_AD-7.6 Prüfung. Wir haben schon zahlreiche Prüfungsaufgaben der Fortinet FCP_FGT_AD-7.6 Prüfung von mehreren Jahren geforscht. Jetzt können wir Ihnen die wertvolle Prüfungsunterlagen der Fortinet FCP_FGT_AD-7.6 bieten. Nach Ihrem Kauf geben Ihnen rechtzeitigen Bescheid über die Aktualisierungsinformationen der Fortinet FCP_FGT_AD-7.6. Dieser Dienst ist kostenlos, weil die Gebühren für die Unterlagen bezahlen, haben Sie schon alle auf Fortinet FCP_FGT_AD-7.6 bezügliche Hilfen gekauft.

Fortinet FCP_FGT_AD-7.6 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.
Thema 2	• Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.

Thema 3	• Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.
Thema 4	• Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.
Thema 5	• VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.

Fortinet FCP_FGT_AD-7.6 VCE Dumps & Testking IT echter Test von FCP_FGT_AD-7.6

Mit Fortinet FCP_FGT_AD-7.6 Zertifikat können Sie Ihre Berufsaussichten verbessern und viele neuen Chancen erschließen. EchteFrage ist eine geeignete Website für die Kandidaten, die an der Fortinet FCP_FGT_AD-7.6 Zertifizierungsprüfung teilnehmen. Es wird nicht nur alle Informationen zur Fortinet FCP_FGT_AD-7.6 Zertifizierungsprüfung, sondern Ihnen auch eine gute Lernchance bieten. EchteFrage wird Ihnen helfen, die Fortinet FCP_FGT_AD-7.6 Zertifizierungsprüfung ganz einfach zu bestehen.

Fortinet FCP - FortiGate 7.6 Administrator FCP_FGT_AD-7.6 Prüfungsfragen mit Lösungen (Q50-Q55):

50. Frage

Refer to the exhibit.

FortiGate routing database

```
Local-FortiGate # get router info routing-table database
Codes: K - kernel, C - connected, S - static, R - RIP, B - BGP
       O - OSPF, IA - OSPF inter area
       N1 - OSPF NSSA external type 1, N2 - OSPF NSSA external type 2
       E1 - OSPF external type 1, E2 - OSPF external type 2
       i - IS-IS, L1 - IS-IS level-1, L2 - IS-IS level-2, ia - IS-IS inter area
       V - BGP VPNv4
       > - selected route, * - FIB route, p - stale info

Routing table for VRF=0
S      0.0.0.0/0 [20/0] via 10.200.2.254, port2, [1/0]
S      *> 0.0.0.0/0 [10/0] via 10.200.1.254, port1, [1/0]
C      *> 10.0.1.0/24 is directly connected, port3
C      *> 10.200.1.0/24 is directly connected, port1
C      *> 10.200.2.0/24 is directly connected, port2
C      *> 172.16.100.0/24 is directly connected, port8
```

Which two statements are true about the routing entries in this database table? (Choose two.)

- A. The default route on port2 is marked as the standby route.
- B. The port2 interface is marked as inactive.
- C. All of the entries in the routing database table are installed in the FortiGate routing table.
- D. Both default routes have different administrative distances.

Antwort: A,D

Begründung:

The routing table in the exhibit shows two default routes (0.0.0.0/0) with different administrative distances:

- * The default route through port2 has an administrative distance of 20.
- * The default route through port1 has an administrative distance of 10.

Administrative distance determines the priority of the route; a lower value is preferred. Here, the route through port1 with an administrative distance of 10 is the preferred route. The route through port2 with an administrative distance of 20 acts as a standby or backup route. If the primary route (port1) fails or is unavailable, traffic will then be routed through port2.

Regarding the statement that the port2 interface is marked as inactive, there is no indication in the routing table that port2 is inactive. Similarly, all the routes displayed are not necessarily installed in the FortiGate routing table, as the table could include both active and backup routes.

51. Frage

Which two statements about the Security Fabric rating are true? (Choose two.)

- A. Security Rating Insights are available only in the Security Rating page.
- B. A license is required to obtain an executive summary in the Security Rating section.
- C. The Security Posture category provides PCI compliance results.
- D. The root FortiGate provides executive summaries of all the FortiGate devices in the Security Fabric.

Antwort: C,D

52. Frage

An administrator needs to analyze and resolve port conflicts between SSL VPN and HTTPS administrative access on the same

interface.

In which two ways can this be done? (Choose two.)

- A. Change the port number for either the SSL VPN service or the HTTPS administrative service if both are on the same interface.
- B. Disable SSL VPN if HTTPS administrative access is using port 443 on any interface.
- C. Keep port 443 for both SSL VPN and HTTPS administrative access on the same interface without any problems.
- D. Run SSL VPN on one interface using port 443 and enable HTTPS administrative access on a different interface, also using port 443.

Antwort: A,D

Begründung:

You can keep port 443 for SSL VPN on one interface and also use port 443 for HTTPS admin access on a different interface.

Since the services are bound to different interfaces, no conflict occurs.

If both SSL VPN and HTTPS admin access are required on the same interface, you must change the port number for one of the services to avoid a port conflict.

53. Frage

Refer to the exhibits.

Security Fabric logical topology view

Security Fabric settings on HQ-ISFW-2

Security Fabric Settings

Security Fabric role: Standalone **Serve as Fabric Root** **Join Existing Fabric**

Allow other Security Fabric devices to join: ☒ **port6**

Upstream FortiGate IP/FQDN: 10.0.13.254

Allow downstream device REST API access: ☒

Management IP/FQDN: Use WAN IP **Specify** 10.0.11.250

Management port: Use Admin Port **Specify** 443

SAML SSO Settings

SAML Single Sign-On: **Auto** Manual

Advanced Options

Mode: Pending

An administrator wants to add HQ-ISFW-2 in the Security Fabric. HQ-ISFW-2 is in the same subnet as HQ-ISFW. After configuring the Security Fabric settings on HQ-ISFW-2, the status stays Pending. What can be the two possible reasons? (Choose two.)

- A. Management IP must be set to 10.0.13.254.
- B. SAML Single Sign-On must be set to Manual.
- C. HQ-ISFW-2 must be authorized on HQ-ISFW.
- D. Upstream FortiGate IP must be set to 10.0.11.254.

Antwort: C,D

Begründung:

The Upstream FortiGate IP should match the IP address of the Fabric Root interface, which is 10.0.11.254, not 10.0.13.254.

The new device (HQ-ISFW-2) must be authorized on the Fabric Root (HQ-ISFW) before it can join the Security Fabric, otherwise the status remains pending.

54. Frage

An administrator configured a FortiGate device to act as a collector for agentless polling mode.

What must the administrator add to the FortiGate device to retrieve AD user group information?

- **A. LDAP server**
- B. RADIUS server
- C. TACACS server
- D. Keycloak server

Antwort: A

Begründung:

In agentless polling mode, FortiGate directly queries Active Directory to obtain user and group information. To do this, the administrator must configure an LDAP server on the FortiGate, which allows it to retrieve user group membership details from AD.
