Das Expertenteam von ITZert nutzt ihre Erfahrungen und Kenntnisse aus, um die Schulungsunterlagen zur ISTQB ISTQB-CTFL Zertifizierungsprüfung zu bearbeiten. Unsere Schulungsunterlagen zur ISTQB ISTQB-CTFL Zertifizierungsprüfung sind bei den Kunden sehr beliebt. Das sind die Ergebnisse der fleißigen Experten-Teams. Diese Simulationsfragen und Antworten sind von guter Qualität. Und die Ähnlichkeit beträgt über 95%. Sie sind eher zuverlässig. Wenn Sie die Trainingsinstrumente von ITZert benutzen, können Sie 100% die ISTQB ISTQB-CTFL (ISTQB Certified Tester Foundation Level (CTFL v4.0)) Zertifizierungsprüfung bestehen.

Wenn Sie ein Ziel haben, sollen Sie Ihr Ziel ganz mutig erzielen. Jeder IT-Fachmann wird mit den jetzigen einfachen Lebensverhältnissen zufrieden sein. Der Druck in allen Branchen und Gewerben ist sehr groß. In der IT-Branche ist es auch so. Wenn Sie ein Ziel haben, sollen Sie mutig Ihren Traum erfüllen. Auch in der ISTQB ISTQB-CTFL Zertifizierungsprüfung herrscht große Konkurrenz. Durch die ISTQB ISTQB-CTFL Prüfung wird Ihre Berufskarriere sicher ganz anders. Eine glänzende Zukunft wartet schon auf Sie. Unser ITZert bietet Ihnen die genauesten und richtigsten ISTQB ISTQB-CTFL Schulungsunterlagen und Ihnen helfen, die Zertifizierungsprüfung zu bestehen und Ihr Ziel zu erreichen.

ISTQB-CTFL Quizfragen Und Antworten, ISTQB-CTFL Zertifikatsfragen

Fühlen Sie sich sehr schwierig, erfolgreich zu werden? Fühlen Sie es sehr schwierig, IT-Zertifizierungsprüfungen zu bestehen? Sorgen Sie sich jetzt um die ISTQB ISTQB-CTFL Zertifizierungsprüfung? Es ist unnötig. IT-Zertifizierungsprüfungen sind nicht so geheimnisvoll wie Sie glauben. Wir können richtige Geräte benutzen, erfolgreich zu werden. Solange Sie die richtigen Geräte wählen, ist es sehr einfach erfolgreich zu werden. Wissen Sie, was ist das beste Gerät? Ja, ISTQB ISTQB-CTFL Dumps von ITZert sind die besten Geräte. Diese Dumps sammeln und analysieren viele vorherige ISTQB-CTFL Prüfungsfragen. Und sie fügen auch viele neue Prüfungsfragen laut der Prüfungsvorschriften hinzu. Das ist die Dumps, die Sie ISTQB ISTQB-CTFL Prüfung einmalig bestehen können.

ISTQB Certified Tester Foundation Level (CTFL v4.0) ISTQB-CTFL Prüfungsfragen mit Lösungen (Q187-Q192):

187. Frage

Consider the following user story about the authentication functionality of an e-commerce website:

"As a logged-in user, I want to change my current password with a new one, so that I can make my account safer".

The following are some of the acceptance criteria defined for the user story:

[a] After the logged-in user has successfully changed his password, an email confirming the change must be sent to him

[b] To successfully change the password, the logged-in user must enter the current password, enter a new valid password, and finally confirm by pressing the 'Change Password' button

[c] To be valid, the new password entered by the logged-in user is not only required to meet the criteria related to the length and type of characters, but must also be different from the last 5 passwords of that user
[d] A dedicated error message must be presented to the logged-in user when he enters a wrong current password
[e] A dedicated error message must be presented to the logged-in user when he enters the correct current password, but enters an invalid password Based only on the given information, which of the following ATDD tests is most likely to be written first?

- A. The logged-in user enters the correct current password, enters an invalid password, and finally views the dedicated error
- B. The logged-in user enters a wrong current password and views the dedicated error message
- C. The logged-in user submits a purchase order containing ten items, selects to pay with a Visa credit card, enters credit card information of a valid card, presses the 'Confirm' button, and finally views the dedicated message confirming that the purchase has been successful
- **D. The logged-in user enters the correct current password, enters a valid new password (different from the last 5 passwords), presses the 'Change Password' button, and finally receives the e-mail confirming that the password has been successfully changed**

Antwort: D

Begründung:

ATDD stands for Acceptance Test-Driven Development, which is a collaborative approach to software development and testing, in which the acceptance criteria of a user story are defined and automated as executable tests before the implementation of the software system. ATDD tests are usually written in a Given- When-Then format, which describes the preconditions, the actions, and the expected outcomes of a test scenario. ATDD tests are intended to verify that the software system meets the expectations and the needs of the users and the stakeholders, as well as to provide feedback and guidance for the developers and the testers.

Based on the given information, the ATDD test that is most likely to be written first is the one that corresponds to option B, which is: Given the logged-in user is on the Change Password page When the user enters the correct current password, enters a valid new password (different from the last 5 passwords), and presses the Change Password button Then the user receives an email confirming that the password has been successfully changed This ATDD test is most likely to be written first, because it covers the main functionality and the happy path of the user story, as well as the most important acceptance criterion [a]. It also verifies that the user can change the password with a valid new password that meets the criteria related to the length, the type of characters, and the history of the passwords, as specified in the acceptance criterion [c]. The other options are not likely to be written first, because they either cover less critical or less frequent scenarios, such as entering a wrong current password [d] or an invalid new password [e], or they are not related to the user story or the acceptance criteria at all, such as submitting a purchase order [d]. 188. Frage

The following chart represents metrics related to testing of a project that was completed. Indicate what is represented by tie lines A, B and the axes X.Y

- A.

- B. X - Time
Y - Percent
A - % of functional tests in the test suite
B - % of non-functional tests in the test suite

- C. X - Time
Y - Number of defects
A - Number of open defects
B - Number of closed defects

- D. X - Time
Y - Count
A - Total number of executed tests
B - Number of open bugs

Antwort: D

Begründung:

Option D correctly explains what is represented by the lines A, B and the axes X, Y in a testing metrics chart.

According to option D:

- * X-axis represents Time
- * Y-axis represents Count
- * Line A represents Number of open bugs
- * Line B represents Total number of executed tests

This information is essential in understanding and analyzing the testing metrics of a completed project.

189. Frage

Which of the following statements is CORRECT about White-box testing?

- A. White-box testing helps find defects even when specifications are vague because it takes into account the code
- B. White-box testing helps find defects because it focuses on defects rather than failures
- C. box testing helps find defects because it provides for requirements based coverage
- D. White-box testing helps find defects because they can be used to measure statement coverage

Antwort: D

190. Frage

For each test case to be executed, the following table specifies its dependencies and the required configuration of the test environment for running such test case:

Test Case	Dependencies	Configuration
TC1		CONF2
TC2	TC4	CONF2
TC3	TC4	CONF1
TC4		CONF1
TC5	TC1	CONF2

Assume that CONF1 is the initial configuration of the test environment Based on this assumption, which of the following is a test execution schedule that is compatible with the specified dependencies and allows minimising the number of switches between the

different configurations of the test environment
