

# New NSE6\_OT\_S\_AR-7.6 Test Sample, Reliable NSE6\_OT\_S\_AR-7.6 Braindumps

Computers have made their appearance providing great speed and accuracy for our work. IT senior engine is very much in demand in all over the world. Now Fortinet NSE6\_OT\_S\_AR-7.6 latest dumps files will be helpful for your career. EduDump produces the best products with high quality and high passing rate. Our valid NSE6\_OT\_S\_AR-7.6 Latest Dumps Files help a lot of candidates pass exam and obtain certifications, so that we are famous and authoritative in this filed.

## Fortinet NSE6\_OT\_S\_AR-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Monitoring and risk assessment: Covers creating event handlers in FortiAnalyzer to monitor network activity and detect threats. It also includes performing risk assessments and analyzing security reports to support ongoing risk management.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Network security: Explains how to apply security inspections specifically for industrial protocols and implement virtual patching to protect vulnerable systems. It also includes configuring automation to enhance threat response and operational efficiency.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Network access control: Focuses on OT Ethernet fundamentals and designing secure network segmentation strategies. It also includes configuring authentication methods to control and verify access to the OT network.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Asset management: Covers understanding OT standards and how Fortinet aligns with compliance requirements in industrial environments. It also includes using the Fortinet Security Fabric to manage assets and implementing device detection using FortiGate and FortiNAC.</li></ul>

## High-quality New NSE6\_OT\_S\_AR-7.6 Test Sample & Useful Tips to help you pass NSE6\_OT\_S\_AR-7.6: Fortinet NSE 6 - OT Security 7.6 Architect

The Fortinet NSE 6 - OT Security 7.6 Architect (NSE6\_OT\_S\_AR-7.6) practice questions have a close resemblance with the actual Fortinet NSE 6 - OT Security 7.6 Architect (NSE6\_OT\_S\_AR-7.6) exam. Our Fortinet NSE6\_OT\_S\_AR-7.6 exam dumps give help to give you an idea about the actual Fortinet NSE 6 - OT Security 7.6 Architect (NSE6\_OT\_S\_AR-7.6) exam. You can attempt multiple Fortinet NSE 6 - OT Security 7.6 Architect (NSE6\_OT\_S\_AR-7.6) exam questions on the software to improve your performance.

## Fortinet NSE 6 - OT Security 7.6 Architect Sample Questions (Q27-Q32):

### NEW QUESTION # 27

Refer to the exhibit. A Virtual Patching profile is shown.

#### Virtual Patching profile

**Virtual Patching profile**

Name: SCADA

Severity:  Information  Low  Medium  High  Critical

Action:  Allow  Block

Logging:  Enable  Disable

Comments:

**Virtual Patching Exemptions**

Status	Device (MAC Address)	Virtual Patch Signature
<input checked="" type="checkbox"/> Enabled	11:11:11:11:11:11	
<input checked="" type="checkbox"/> Enabled	12:12:12:12:12:12	Schneider.Electric.ClearSCADA.HTTPInterface.XSS

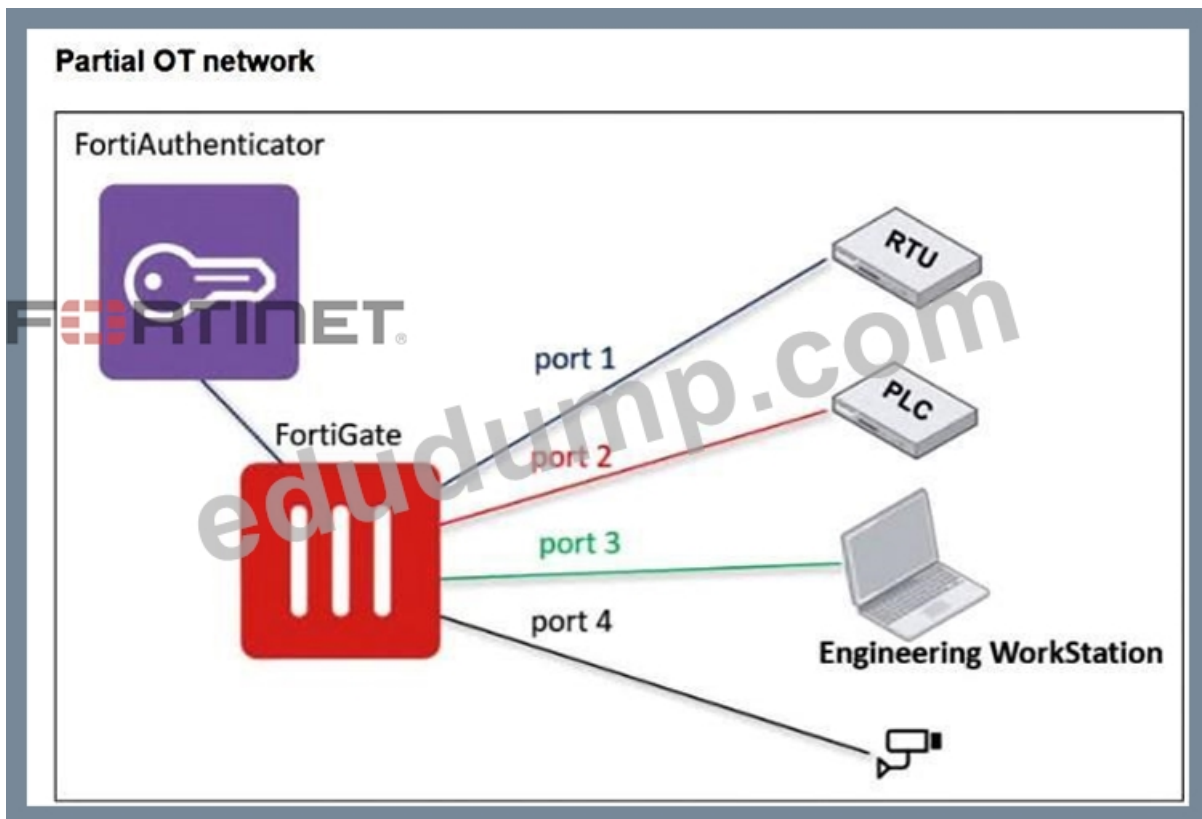

You have recently updated your SCADA system and would like to apply the SCADA virtual patching profile. Which two statements about this profile are correct? (Choose two answers)

- A. The device with the MAC address 11:11:11:11:11:11 is considered to have no vulnerabilities.
- B. This profile blocks critical severity signatures for all the devices.
- C. Low severity signatures are not blocked for the device with the MAC address 12:12:12:12:12:12.
- D. Only the vulnerability Schneider.Electric.ClearSCADA.HTTP.Interface.XSS is still present.

Answer: B,C

### NEW QUESTION # 28

Refer to the exhibits.

**Partial firewall policies configuration**

Policy	ID	Source	Destination	Schedule	Service
<b>RTU_full_access (8)</b>	8	Engineering-Workstation FortiAuthenticator	RTU	always	HTTP HTTPS ALL_ICMP
<b>RTU_limited_access (9)</b>	9	Engineering-Workstation	RTU	always	ALL

A partial OT network and firewall policies configuration are shown.

You added authentication in the firewall policy from Engineering Workstation to RTU to improve the security. When verifying your configuration, you notice that you can still access RTU from Engineering Workstation without an authentication prompt.

What must you do to enforce authentication?

- A. You must reboot FortiGate.
- B. You must enable Fortinet Single Sign-On (FSSO).
- C. You must add a local user instead of FortiAuthenticator.
- **D. You must add authentication in firewall policy 9.**

**Answer: D**

Explanation:

Firewall policies are evaluated top-down, and a matching policy without authentication is applied before the one requiring authentication. Adding authentication to the higher-priority policy ensures that all matching traffic is subject to authentication.

### NEW QUESTION # 29

An OT administrator configured and ran a default application risk and control report in FortiAnalyzer to learn more about the key application crossing the network. However, the report output is empty despite the fact that some related real-time and historical logs are visible in the FortiAnalyzer.

What are two possible reasons why the report output was empty? (Choose two.)

- A. The administrator selected the wrong hcache table for the report.
- B. The administrator selected the wrong logs to be indexed in FortiAnalyzer.
- **C. The administrator selected the wrong time period for the report.**
- **D. The administrator selected the wrong devices in the Devices section.**

**Answer: C,D**

**NEW QUESTION # 30**

What triggers Layer 2 polling of infrastructure devices connected in the network?

- A. A matched security policy
- **B. A linkup or linkdown trap**
- C. A matched profiling rule
- D. A failed Layer 3 poll

**Answer: B**

**NEW QUESTION # 31**

You want to improve access control for your large OT network using passive authentication. What must you configure on FortiGate? (Choose one answer)

- A. Local users
- B. A FortiAuthenticator device as a remote server
- **C. Fortinet Single-Sign On (FSSO)**
- D. Two-factor authentication

**Answer: C**

Explanation:

The correct answer is A. Fortinet Single-Sign On (FSSO) . The study guide states under Active and Passive Authentication that for passive authentication, "User does not receive a login prompt from FortiGate", "Credentials are determined automatically", and specifically "FSSO, RSSO, and NTLM can be used." It then explains that passive authentication occurs with the single sign-on method and explicitly identifies Fortinet SSO (FSSO) as one of those methods. The guide also says: "For passive authentication, you can implement FSSO. FSSO allows users who have already authenticated on the network through another system to be transparently identified. After initial login to any system on the network, users can access allowed resources without being prompted for credentials." That is exactly what the question asks for: improving access control in a large OT network using passive authentication .

The other options do not match passive authentication. Local users are part of local authentication, two- factor authentication adds an extra security factor but still uses active authentication, and FortiAuthenticator as a remote server supports centralized authentication for mid-to-large networks, but by itself it is not the specific passive-authentication method being asked here. The study guide is explicit that the FortiGate configuration for passive authentication is FSSO .

**NEW QUESTION # 32**

.....

To nail the NSE6\_OTC\_AR-7.6 exam, what you need are admittedly high reputable NSE6\_OTC\_AR-7.6 practice materials like our NSE6\_OTC\_AR-7.6 exam questions. What matters to exam candidates is not how much time you paid for the exam or how little money you paid for the practice materials, but how much you advance or step forward after using our practice materials. Actually our NSE6\_OTC\_AR-7.6 learning guide can help you make it with the least time but huge advancement. There are so many advantageous elements in them
