Microsoft PL-600 Practice Exam Pdf - PL-600 Reliable Test Camp

The Microsoft PL-600 certification exam is one of the top-rated career booster certifications in the market. This Microsoft Power Platform Solution Architect (PL-600) certification offers a great opportunity for Microsoft aspirants to validate their skills and knowledge. By doing this they can gain several personal and professional benefits. These PL-600 Certification benefits help them not only prove their expertise but also enable them to gain multiple career opportunities in the highly competitive market.

Microsoft PL-600 exam is a certification test that evaluates an individual's proficiency in developing and implementing Microsoft Power Platform solutions. PL-600 exam is essential for those who want to become a certified Microsoft Power Platform Solution Architect. PL-600 exam has been crafted to assess the candidates' ability to engage with stakeholders, translate business requirements into technical solutions, configure Power Apps, and build AI models. Successful candidates can design and implement custom solutions that exceed the standard capabilities of the Power Platform to meet customer business goals.

Passing the Microsoft PL-600 Certification Exam demonstrates to potential employers or clients that the candidate has the necessary knowledge and skills to design and implement effective business solutions using the Power Platform. Microsoft Power Platform Solution Architect certification can help individuals stand out in a crowded job market and increase their earning potential.

Microsoft Power Platform Solution Architect Sample Questions (Q52-Q57):

NEW QUESTION # 52

You need to recommend solutions to meet the integration requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Requirement	Solution
View, assign, and resolve inspection bottlenecks.	▼ Booking rules / Schedule board / Proficiency models
Automatically input measurement readings from inspection gauges	▼ Custom connector / Azure IoT Hub connector / Azure IoT Central connector / Microsoft Dataverse connector

Answer:

Explanation:

Requirement	Solution
View, assign, and resolve inspection bottlenecks.	▼ Booking rules / Schedule board / Proficiency models
Automatically input measurement readings from inspection gauges	▼ Custom connector / Azure IoT Hub connector / Azure IoT Central connector / Microsoft Dataverse connector

Explanation

| Requirement	Solution
View, assign, and resolve inspection bottlenecks.	▼ Booking rules Schedule board Proficiency models
Automatically input measurement readings from inspection gauges	▼ Custom connector Azure IoT Hub connector Azure IoT Central connector Microsoft Dataverse connector

Box 1: Schedule board

Note: The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make. When you're looking at the schedule board for the current day, you'll see a blue line that indicates the current time of day. You can also see a picture of all the resources listed on the schedule board. To quickly view contact information for a resource, hover over their name to view the contact card.

Box 2: Azure IoT Central connector

Azure IoT Central makes it easy to connect, monitor, and manage your IoT devices at scale. With the IoT Central V3 connector, you can trigger workflows when a rule has fired, and take actions by executing commands, updating properties, getting telemetry from devices, and more. Use this connector with your Azure IoT Central V3 application.

This connector is available in the following products and regions:

Service	Class	Regions
Logic Apps	Standard	All Logic Apps regions ☑ except the following: - Azure Government regions - Azure China regions
Power Automate	Premium	All Power Automate regions except the following: - US Government (GCC) - US Government (GCC High) - China Cloud operated by 21Vianet
Power Apps	Premium	All Power Apps regions except the following: - US Government (GCC) - US Government (GCC High) - China Cloud operated by 21Vianet

NEW QUESTION # 53

A new customer asks you to design a solution for a Power Apps app that uses Microsoft Dataverse.

The customer wants to keep the service process simple and save on both licensing and development time.

You need to recommend solutions for the customer.

What should you recommend? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions

| Canvas app |
| Model-driven app |
| Dynamics 365 Customer Service |

Answer Area

Scenario	Solution
Show the app in Microsoft Outlook.	Solution
Use Universal Resource Scheduling.	Solution
Take notes on a mobile phone and record GPS coordinates automatically.	Solution

Answer:

Explanation:

Solutions

| Canvas app |
| Model-driven app |
| Dynamics 365 Customer Service |

Answer Area

Scenario	Solution
Show the app in Microsoft Outlook.	Model-driven app
Use Universal Resource Scheduling.	Dynamics 365 Customer Service
Take notes on a mobile phone and record GPS coordinates automatically.	Canvas app

NEW QUESTION # 54

A company plans to deploy multiple Microsoft Dataverse environments. You are supporting the go-live process.

The company reports the following access issues:

* Users can access account records but cannot read a column m the table.
* A licensed user receives an insufficient permission error when opening leads.
* A licensed user does not appear in the list of users available for security assignment.

You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Issue	Action
Users can access account records but cannot read a column in the table.	Security role / Security group / Field security profile
A licensed user receives an insufficient permission error when opening leads.	Security role / Security group / Field security profile
A licensed user does not appear in the list of users available for security assignment.	Security role / Security group / Field security profile

Answer:

Explanation:

NEW QUESTION # 55

You need to recommend a solution for integrating luggage information.

What should you recommend? To answer, drag the appropriate types to the correct tables. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Topic 2, First Up Consulting

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each

case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

First Up Consulting recruits information technology (IT) workers for temporary or permanent positions at client companies. The company operates offices in multiple countries/regions.

First Up has both full-time and part-time employees. The company has a team or worker support agents that respond to inquiries from current and prospective workers. Some of the worker support agents are multilingual.

The company does not have a standardized tool used for reporting purposes. The organization engages you to implement a new Power Platform solution. Workers are managed by a dedicated team that includes one primary recruiter and a contract assistant. Many client companies live in areas that do not allow for mobile data connections.

Current environment

Existing systems and processes

First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.

Employee authentication with the existing system is provided by an on-premises Active Directory instance that is linked to Azure Active Directory.

An appointment record is created for each visit with a worker. The record includes worker contact information, preferred language, the date and time of the appointment, and other relevant data. This information is reviewed by the worker's primary recruiter.

First Up has no current capabilities for forecasting future worker needs based on the data held.

Client company visits

Before First Up signs a contract to place workers at a client company, a member of the audit team visits the company and interviews company management. Audit members use different types of devices including Android and iOS devices. First Up has no plans to require the use of a single type of device. Audit team members currently record information about workers on paper forms. Team members enter information from paper forms into the system when they return to the office.

First Up audits client companies at least once each year but may schedule additional visits based on feedback from workers that they place at a client company.

Requirements

General

There is no standardized communication tool across the company, and this causes communication issues between different teams.

First up employees must be able to contact each other by using a secure system to ask and answer questions about medical cases.

Workers must be able to communicate in near real-time with worker support agents.

Client company visits

Audit team records must be locked after they have been reviewed by a First Up manager. No further edits to the record can be carried out. This must be implemented using standard available system functionality.

Audit teams must be able to enter records of their visits to the companies where they have or may place workers. Audit teams must be able to update any necessary records with the latest information.

The solution must support tracking of security clearance information for a worker including the date, status, and certifying agency.

When a worker makes an appointment, the appointments must appear in the timeline for the worker's contact record.

Job history information

The solution must provide a worker appointment booking system that can access worker historical job placement data.

The solution must allow employees to associate a primary recruiter with each worker. The solution must also allow multiple secondary recruiters to be associated with each worker.

Every worker assessment performed must be validated and countersigned by the primary recruiter for a worker.

Job posting data from previous work engagements must be accessible by the Power Platform solution to ensure that new job postings are accurate.

First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Worker access

The solution must support workers that speak different languages. The solution must provide automatic translation capabilities.

The solution must support near real-time communications between workers and recruiters.

Workers must be able to view their records online. Workers must be able to enter any additional information that is required by or may be helpful to recruiters.

The solution must provide workers a way to search for general information about available positions.

Workers must be able to request copies of their records by using a chatbot. Workers must be able to provide information to a recruiter as needed.

Data platform

Audit teams must have the ability to view worker information on their mobile devices.

Audit teams must be able to record data during visits to locations where workers are placed.

The solution must support the ability for a corporate governance auditing team to periodically audit the organization's records, policies, and procedures.

Reporting and analytics

The reporting and analytics team must be able to create reports that include data from all facilities and all workers.

Management reports must present an overview of the entire organization. Other reports may be limited to specific offices.

You must create dashboards that show the status across all groups of workers. The dashboards must be embedded into the Power Platform apps. Updates to data must be displayed in near real time.

Security

Authentication for all user types must be managed by a single platform. IT teams must use PowerShell to apply security permissions for users.

Worker records must only be viewed by the recruiting office that the worker visits.

Worker still records must be archived after ten years and are then removed from the main system. Worker information must not be deleted from the system while skill and job placement history records for the worker exist in the system.

User security roles must be customized to ensure that users are able to interact only with the specific data in which they need access.

Workers must be able to sign into a portal by using their own email address. Workers must be required to use a secure method of authentication to be able to view their data.

Alerts regarding the number of recruited and placed at client companies must be updated as background processes.

Issues

The organization reports the following issues:

Recruiters report that they cannot see historical job placement data for workers.

API usage reports show that the number of API calls made exceeds limits. This causes delays saving data.

Users cannot view Power BI reports within the Power Platform apps.

Some security clearance information for workers not visible from within the Power Platform solution.

Audit teams report that they cannot view or edit worker data when the device on which they access the solution does not have network connectivity.

The testing ream reports that one of the canvas apps is not working as expected. An error message displays as specific pages load.

NEW QUESTION # 56

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

Team	Comments
Cleaning	There are three predetermined cleaning teams. Tasks are assigned to a team. Anyone on the team can complete an assigned task.
Emergency room	These teams are formed as needed based on patient needs and staff availability.
Billing	These teams are assigned to specific hospital departments. Team members must only see data for the hospital department to which they are assigned.

You need to recommend the team types to use.

Which team types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Team type
Cleaning teams	Access / Owner
Emergency room teams	Access / Owner
Billing teams	Access / Owner

Answer:

Explanation:

Requirement	Team type
Cleaning teams	Access / **Owner**
Emergency room teams	**Access** / Owner
Billing teams	Access / **Owner**
