

High Splunk Enterprise Certified Architect passing score, SPLK-2002 exam review

BTW, DOWNLOAD part of PrepAwayTest SPLK-2002 dumps from Cloud Storage: https://drive.google.com/open?id=1-kxiD9J5SxQPpSOc_erGsvXYed0TRWPP

Although we have carried out the SPLK-2002 exam questions for customers, it does not mean that we will stop perfecting our study materials. Our experts are still testing new functions for the SPLK-2002 study materials. Even if you have purchased our study materials, you still can enjoy our updated SPLK-2002 Practice Engine. We will soon upload our new version of our SPLK-2002 guide braindumps into our official websites.

We are the fastest to pursue acquiring SPLK-2002 certification; we are the highest to pursue protecting your benefits. Our PrepAwayTest ensures the accuracy and the most coverage of SPLK-2002 Certification Exam Dumps. If you purchase SPLK-2002 certification exam dumps, we will ensure that you can get free update service in one year.

SPLK-2002 Advanced Testing Engine & Pass SPLK-2002 Exam

In order to meet the needs of all customers, Our SPLK-2002 study torrent has a long-distance aid function. If you feel confused about our SPLK-2002 test torrent when you use our products, do not hesitate and send a remote assistance invitation to us for help, we are willing to provide remote assistance for you in the shortest time. We have professional IT staff, so your all problems about Splunk Enterprise Certified Architect guide torrent will be solved by our professional IT staff. We can make sure that you will enjoy our considerate service if you buy our SPLK-2002 study torrent. There are many IT staffs online every day; you can send your problem, we are glad to help you solve your problem. If you have any question about our SPLK-2002 test torrent, do not hesitate and remember to contact us.

Splunk Enterprise Certified Architect Sample Questions (Q99-Q104):

NEW QUESTION # 99

A new Splunk customer is using syslog to collect data from their network devices on port 514. What is the best practice for ingesting this data into Splunk?

- A. Use a Splunk forwarder to collect the input on port 514 and forward the data.
- B. Use a Splunk indexer to collect a network input on port 514 directly.
- C. Configure syslog to send the data to multiple Splunk indexers.
- D. Configure syslog to write logs and use a Splunk forwarder to collect the logs.

Answer: D

Explanation:

Explanation

The best practice for ingesting syslog data from network devices on port 514 into Splunk is to configure syslog to write logs and use a Splunk forwarder to collect the logs. This practice will ensure that the data is reliably collected and forwarded to Splunk, without losing any data or overloading the Splunk indexer. Configuring syslog to send the data to multiple Splunk indexers will not guarantee data reliability, as syslog is a UDP protocol that does not provide acknowledgment or delivery confirmation. Using a Splunk indexer to collect a network input on port 514 directly will not provide data reliability or load balancing, as the indexer may not be able to handle the incoming data volume or distribute it to other indexers. Using a Splunk forwarder to collect the input on port 514 and forward the data will not provide data reliability, as the forwarder may not be able to receive the data from syslog or buffer it in case of network issues. For more information, see [Get data from TCP and UDP ports] and [Best practices for syslog data] in the Splunk documentation.

NEW QUESTION # 100

Which of the following is a good practice for a search head cluster deployer?

- A. The deployer only distributes configurations to search head cluster members with splunk apply shcluster-bundle.
- B. The deployer must distribute configurations to search head cluster members to be valid configurations.
- **C. The deployer only distributes configurations to search head cluster members when they "phone home".**
- D. The deployer must be used to distribute non-replicable configurations to search head cluster members.

Answer: C

NEW QUESTION # 101

Stakeholders have identified high availability for searchable data as their top priority. Which of the following best addresses this requirement?

- A. Increasing the number of search heads in the cluster.
- **B. Increasing the search factor in the cluster.**
- C. Increasing the replication factor in the cluster.
- D. Increasing the number of CPUs on the indexers in the cluster.

Answer: B

Explanation:

Increasing the search factor in the cluster will best address the requirement of high availability for searchable data. The search factor determines how many copies of searchable data are maintained by the cluster. A higher search factor means that more indexers can serve the data in case of a failure or a maintenance event.

Increasing the replication factor will improve the availability of raw data, but not searchable data. Increasing the number of search heads or CPUs on the indexers will improve the search performance, but not the availability of searchable data. For more information, see Replication factor and search factor in the Splunk documentation.

NEW QUESTION # 102

A Splunk architect has inherited the Splunk deployment at Buttercup Games and end users are complaining that the events are inconsistently formatted for a web source. Further investigation reveals that not all weblogs flow through the same infrastructure: some of the data goes through heavy forwarders and some of the forwarders are managed by another department.

Which of the following items might be the cause of this issue?

- **A. The indexers may have different configurations than the heavy forwarders.**
- B. The search head may have different configurations than the indexers.
- C. The forwarders managed by the other department are an older version than the rest.
- D. The data inputs are not properly configured across all the forwarders.

Answer: A

Explanation:

Explanation

The indexers may have different configurations than the heavy forwarders, which might cause the issue of inconsistently formatted events for a web sourcetype. The heavy forwarders perform parsing and indexing on the data before sending it to the indexers. If the

indexers have different configurations than the heavy forwarders, such as different props.conf or transforms.conf settings, the data may be parsed or indexed differently on the indexers, resulting in inconsistent events. The search head configurations do not affect the event formatting, as the search head does not parse or index the data. The data inputs configurations on the forwarders do not affect the event formatting, as the data inputs only determine what data to collect and how to monitor it. The forwarder version does not affect the event formatting, as long as the forwarder is compatible with the indexer. For more information, see [Heavy forwarder versus indexer] and [Configure event processing] in the Splunk documentation.

NEW QUESTION # 103

(A high-volume source and a low-volume source feed into the same index. Which of the following items best describe the impact of this design choice?)

- A. High volume data is optimized by the presence of low volume data.
- B. Low volume data may move out of the index based on volume rather than age.
- C. Low volume data will improve the compression factor of the high volume data.
- D. Search speed on low volume data will be slower than necessary.

Answer: B,D

NEW QUESTION # 104

.....

Our SPLK-2002 free dumps demo will provide you some basic information for the accuracy of our exam materials. All questions and answers in our SPLK-2002 real dumps are tested by our certified trainers with rich experience and one or two days is enough for you practicing Valid SPLK-2002 Exam Pdf. Our SPLK-2002 dumps torrent contains everything you want to solve the challenge of real exam

SPLK-2002 Advanced Testing Engine: <https://www.prepawaytest.com/Splunk/SPLK-2002-practice-exam-dumps.html>

Splunk Valid Braindumps SPLK-2002 Questions We update in accord with the vendors if they change the question, our professional team will update our question and answer in a week, Splunk Valid Braindumps SPLK-2002 Questions But that is the result of your efforts and persistence, Free of virus for our SPLK-2002 Advanced Testing Engine - Splunk Enterprise Certified Architect PDF dumps, Our SPLK-2002 cram materials analysis the popular trend among the industry and the possible answers and questions which may appear in the real exam fully.

With the help of our Splunk SPLK-2002 dumps pdf and product and material, you can easily pass the SPLK-2002 installing and configuring Splunk Enterprise Certified Architect exam, General Communications Management.

We update in accord with the vendors if they change the question, SPLK-2002 our professional team will update our question and answer in a week, But that is the result of your efforts and persistence.

Pass Guaranteed Quiz Splunk - SPLK-2002 Updated Valid Braindumps Questions

Free of virus for our Splunk Enterprise Certified Architect PDF dumps, Our SPLK-2002 cram materials analysis the popular trend among the industry and the possible answers and questions which may appear in the real exam fully.

If you are the first time to prepare the SPLK-2002 exam, it is better to choose a type of good study materials.
