2025 Latest ITExamDownload NCP-US-6.5 PDF Dumps and NCP-US-6.5 Exam Engine Free Share:  
<https://drive.google.com/open?id=1keA5RRSUwCY0z84fa5upytdhGJRKVGwJ>

You may have been learning and trying to get the NCP-US-6.5 certification hard, and good result is naturally become our evaluation to one of the important indices for one level. You need to use our NCP-US-6.5 exam questions to testify the knowledge so that you can get the NCP-US-6.5 Test Prep to obtain the qualification certificate to show your all aspects of the comprehensive abilities, and the NCP-US-6.5 exam guide can help you in a very short period of time to prove yourself perfectly and efficiently.

This is a good way to purchase valid exam preparation materials for your coming NCP-US-6.5 test. Good choice will make you get double results with half efforts. Good exam preparation will point you a clear direction and help you prepare efficiently. Our NCP-US-6.5 exam preparation can not only give a right direction but also cover most of the real test questions so that you can know the content of exam in advance. You can master the questions and answers of Nutanix NCP-US-6.5 Exam Preparation, even adjust your exam mood actively.

## Latest Nutanix NCP-US-6.5 Exam Objectives - Exam NCP-US-6.5 Questions Answers

The above formats of ITExamDownload are made to help customers prepare as per their unique styles and crack the NCP-US-6.5 exam certification on the very first attempt. Our Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) questions product is getting updated regularly as per the original Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) practice test's content. So that customers can prepare according to the latest NCP-US-6.5 exam content and pass it with ease.

## Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Sample Questions (Q50-Q55):

### NEW QUESTION # 50

An administrator has deployed a new Files cluster within a Windows Environment. After some days, the Files environment is not able to synchronize users with the Active Directory server anymore. The administrator observes a large time difference between the Files environment and the Active Directory Server that is responsible for the behavior. How should the administrator prevent the Files environment and the AD Server from having such a time difference in future?

- A. Use 0.pool.ntp.org as the NTP Server for the AD Server.
- B. Use 0.pool.ntp.org as the NTP Server for the Files environment.
- **C. Use the same NTP Servers for the File environment and the AD Server.**
- D. Connect to every FSVM and edit the time manually.

**Answer: C**

Explanation:

The administrator should prevent the Files environment and the AD Server from having such a time difference in future by using the same NTP Servers for the File environment and the AD Server. NTP (Network Time Protocol) is a protocol that synchronizes the clocks of devices on a network with a reliable time source. NTP Servers are devices that provide accurate time information to other devices on a network. By using the same NTP Servers for the File environment and the AD Server, the administrator can ensure that they have consistent and accurate time settings and avoid any synchronization issues or errors. ### NEW QUESTION # 51

Which user is authorized to deploy File Analytics?

- A. Prism Element administrator
- **B. Prism Central administrator**
- C. AD user mapped to a Cluster admin role
- D. AD user mapped to a Prism admin role

**Answer: B**

Explanation:

The user that is authorized to deploy File Analytics is Prism Central administrator. Prism Central is a web-based user interface that allows administrators to manage multiple Nutanix clusters and services, including Files and File Analytics. Prism Central administrator is a user role that has full access and control over all Prism Central features and functions. To deploy File Analytics, the user must log in to Prism Central as a Prism Central administrator and follow the steps in the File Analytics Deployment wizard. ### NEW QUESTION # 52

What best describes the data protection illustrated in the exhibit?

- A. NearSync
- **B. Smart DR**
- C. Availability Zones
- D. Metro Availability

**Answer: B**

Explanation:

The data protection illustrated in the exhibit is Smart DR. Smart DR is a feature that allows share-level replication between active file server instances for disaster recovery. Smart DR can replicate shares from a primary FSI to one or more recovery FSIs on different clusters or sites. Smart DR can also perform failover and failback operations in case of a disaster or planned maintenance. The exhibit shows a Smart DR configuration with one primary FSI and two recovery FSIs. Reference: Nutanix Files Administration Guide, page 79; Nutanix Files Solution Guide, page 9

### NEW QUESTION # 53

An organization currently has a Files cluster for their office data including all department shares. Most of the data is considered cold Data and they are looking to migrate to free up space for future growth or newer data.

The organization has recently added an additional node with more storage. In addition, the organization is using the Public Cloud for .. storage needs.

What will be the best way to achieve this requirement?

- A. Setup another cluster and replicate the data with Protection Domain.
- **B. Enable Smart Tiering in Files within the File Console.**
- C. Migrate cold data from the Files to tape storage.
- D. Backup the data using a third-party software and replicate to the cloud.

**Answer: B**

Explanation:

The organization uses a Nutanix Files cluster, part of Nutanix Unified Storage (NUS), for back office data, with most data classified as Cold Data (infrequently accessed). They want to free up space on the Files cluster for future growth or newer data. They have added a new node with more storage to the cluster and are already using the Public Cloud for other storage needs. The goal is to migrate Cold Data to free up space while considering the best approach.

Analysis of Options:

\* Option A (Set up another cluster and replicate the data with Protection Domain): Incorrect.

Setting up another cluster and using a Protection Domain to replicate data is a disaster recovery (DR) strategy, not a solution for migrating Cold Data to free up space. Protection Domains are used to protect and replicate VMs or Volume Groups, not Files shares directly, and this approach would not address the goal of freeing up space on the existing Files cluster-it would simply create a copy on another cluster.

\* Option B (Enable Smart Tiering in Files within the Files Console): Correct. Nutanix Files supports Smart Tiering, a feature that allows data to be tiered to external storage, such as the Public Cloud (e.g., AWS S3, Azure Blob), based on access patterns. Cold Data (infrequently accessed) can be automatically tiered to the cloud, freeing up space on the Files cluster while keeping the data accessible through the same share. Since the organization is already using the Public Cloud, Smart Tiering aligns perfectly with their infrastructure and requirements.

\* Option C (Migrate cold data from Files to tape storage): Incorrect. Migrating data to tape storage is a manual and outdated process for archival. Nutanix Files does not have native integration with tape storage, and this approach would require significant manual effort, making it less efficient than Smart Tiering. Additionally, tape storage is not as easily accessible as cloud storage for future retrieval.

\* Option D (Back up the data using a third-party software and replicate to the cloud): Incorrect.

While backing up data with third-party software and replicating it to the cloud is feasible, it is not the best approach for this scenario. This method would create a backup copy rather than freeing up space on the Files cluster, and it requires additional software and management overhead. Smart Tiering is a native feature that achieves the goal more efficiently by moving Cold Data to the cloud while keeping it accessible.

Why Option B?

Smart Tiering in Nutanix Files is designed for exactly this use case: moving Cold Data to a lower-cost storage tier (e.g., Public Cloud) to free up space on the primary cluster while maintaining seamless access to the data.

Since the organization is already using the Public Cloud and has added a new node (which increases local capacity but doesn't address Cold Data directly), Smart Tiering leverages their existing cloud infrastructure to offload Cold Data, freeing up space for future growth or newer data. This can be configured in the Files Console by enabling Smart Tiering and setting policies to tier Cold Data to the cloud.

Exact Extract from Nutanix Documentation:

From the Nutanix Files Administration Guide (available on the Nutanix Portal):

"Smart Tiering in Nutanix Files allows administrators to tier Cold Data to external storage, such as AWS S3 or Azure Blob, to free up space on the primary Files cluster. This feature can be enabled in the Files Console, where policies can be configured to identify and tier infrequently accessed data while keeping it accessible through the same share."

:

Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Section: "Nutanix Files Data Management Features".

## NEW QUESTION # 54

An administrator needs to scale out an existing Files instance. Based on the Company's requirements, File instance has four FSVMs configured and needs to expand to six.

How many additional Client IP addresses and Storage IP addresses does the administrator require to complete this task?

- **A. 2 Client IPs and 2 Storage IPs**
- B. 2 Client IPs and 3 Storage IPs
- C. 3 Client IPs and 2 Storage IPs

- D. 3 Client IPs and 3 Storage IPs

**Answer: A**

Explanation:

To scale out an existing Files instance, the administrator needs to add one Client IP and one Storage IP for each additional FSVM. Since the Files instance needs to expand from four FSVMs to six FSVMs, the administrator needs to add two Client IPs and two Storage IPs in total. The Client IPs are used for communication between the FSVMs and the clients, while the Storage IPs are used for communication between the FSVMs and the CVMs. References: Nutanix Files Administration Guide, page 28; Nutanix Files Solution Guide, page 7

## NEW QUESTION # 55

.....

With the rapid development of society, people pay more and more attention to knowledge and skills. So every year a large number of people take NCP-US-6.5 tests to prove their abilities. But even the best people fail sometimes. In addition to the lack of effort, may also not make the right choice. A good choice can make one work twice the result with half the effort, and our NCP-US-6.5 Study Materials will be your right choice.

**Latest NCP-US-6.5 Exam Objectives:** <https://www.itexamdownload.com/NCP-US-6.5-valid-questions.html>

Nutanix NCP-US-6.5 Knowledge Points You can enter a better company and improve your salary if you obtain the certification for the exam, All these versions of NCP-US-6.5 training online questions include the key point information that you need to know to pass the test, Through demo, you can get to know the general situation of our NCP-US-6.5 pass-sure training materials, as a result of which you can decide if our Nutanix NCP-US-6.5 exam braindumps are your longing ones or not, Including the key points about the Latest NCP-US-6.5 Exam Objectives - Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 exam training torrent.

Leaders must make sure all individuals understand NCP-US-6.5 the strategies that the group has targeted to meet its objectives, Creating the Web Project, You can enter a better Latest NCP-US-6.5 Exam Objectives company and improve your salary if you obtain the certification for the exam.

## Pass Guaranteed 2026 Nutanix High-quality NCP-US-6.5 Knowledge Points

All these versions of NCP-US-6.5 Training Online questions include the key point information that you need to know to pass the test, Through demo, you can get to know the general situation of our NCP-US-6.5 pass-sure training materials, as a result of which you can decide if our Nutanix NCP-US-6.5 exam braindumps are your longing ones or not.

Including the key points about the Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 exam training torrent, We will provide you with one-year free update NCP-US-6.5 exam answers after payment and some discount will be offered in check-out.
