When conducting a business impact analysis (BIA) for a cybersecurity program, what is the key objective?

Response:

- A. Identifying which business units should be excluded from security measures
- B. Defining the least critical business units
- C. Simplifying security processes across all business functions
- D. Assessing the potential impact of security incidents on business operations and identifying critical processes that must be protected

**Answer: D**

#### **NEW QUESTION # 109**

What is the primary purpose of aligning cybersecurity strategy with an organization's business vision and mission?

Response:

- A. To allow the security team to work autonomously from business stakeholders
- B. To ensure the cybersecurity strategy supports business goals and adds value to the organization
- C. To prevent the cybersecurity program from receiving excessive funding
- D. To ensure that the cybersecurity strategy operates independently of business objectives

**Answer: B**

#### **NEW QUESTION # 110**

Which communication skill is most important for a leader to possess when addressing a diverse, multi-disciplinary cybersecurity team?

Response:

- A. Persuasion
- B. Time management
- C. Active listening
- D. Delegation

**Answer: C**

#### **NEW QUESTION # 111**

During a security program analysis, you discover that the organization's incident response process is slow, leading to extended downtime during cyberattacks. The executive team is concerned about the financial impact of these delays. How would you address this issue to improve the incident response process and minimize downtime in the future?

Response:

- A. Ignore the delays since no major breaches have occurred
- B. Rely solely on external vendors for incident response
- C. Implement a formal incident response plan with clear roles, conduct regular incident response drills, and invest in automated tools to accelerate detection and response
- D. Assign all incident response duties to a single employee to streamline the process

**Answer: C**
