100-160 Reliable Guide Files & 100-160 Study Guides

About some esoteric points, they illustrate with examples for you. Our 100-160 practice materials are the accumulation of professional knowledge worthy practicing and remembering, so you will not regret choosing our 100-160 practice materials. The best way to gain success is not cramming, but to master the discipline and regular exam points of question behind the tens of millions of questions. Our 100-160 practice materials can remove all your doubts about the exam. If you believe in our products this time, you will enjoy the happiness of success all your life.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q109-Q114):

NEW QUESTION # 109

Which of the following is an example of a detective control in information assurance?

- A. Intrusion Prevention System (IPS)
- B. Security Information and Event Management (SIEM) system
- C. Security awareness training
- D. Encryption of sensitive data

Answer: B

Explanation:

A Security Information and Event Management (SIEM) system is a detective control in information assurance. It collects, correlates, and analyzes security event data from various sources within an organization's network to identify potential security incidents or breaches. It provides real-time monitoring and analysis to detect and respond to security events.

NEW QUESTION # 110

Which of the following is true about security policies and procedures?

- A. They should only be accessible to the IT department.
- B. They should be documented once and never changed.
- C. They should be regularly reviewed and updated to reflect changing threats and technologies
- D. They should be kept confidential and not shared with employees.

Answer: C

Explanation:

Option 1: Correct: Security policies and procedures should be regularly reviewed and updated to ensure they align with changing threats and technologies. This helps to maintain the effectiveness of the policies and processes.

Option 2: Incorrect: Security policies and procedures should be accessible to relevant employees and stakeholders, not restricted only to the IT department. It is important for everyone to understand and adhere to the policies and procedures.

Option 3: Incorrect: Security policies and procedures should be regularly updated as needed, not documented once and never changed. The changing threat landscape and evolving technologies necessitate the periodic review and update of security policies and procedures.

Option 4: Incorrect: Security policies and procedures should be communicated and shared with employees to ensure everyone understands and follows them. Keeping them confidential and not sharing them would hinder their effectiveness.

NEW QUESTION # 111

Which of the following best describes social engineering?

- A. A method of manipulating individuals to disclose sensitive information
- B. A type of malware attack
- C. A network security protocol
- D. A physical security control

Answer: A

Explanation:

Social engineering refers to the practice of manipulating and deceiving individuals into revealing sensitive information or performing certain actions that may compromise security. It involves exploiting human psychology and trust to gain unauthorized access to systems or obtain confidential information. Social engineering tactics can include phishing emails, impersonation, pretexting, or other forms of manipulation to trick individuals into divulging passwords, account numbers, or other confidential data.

NEW QUESTION # 112

Which of the following is a recommended practice for securing a wireless SoHo network?

- A. Disabling encryption for ease of use
- B. Sharing Wi-Fi passwords with neighbors
- C. Regularly updating the router's firmware
- D. Using the default network name (SSID)

Answer: C

Explanation:

Regularly updating the router's firmware is a recommended practice for securing a wireless SoHo network. Router manufacturers often release firmware updates to address security vulnerabilities and improve performance. By installing the latest firmware updates, you can ensure that your router has the latest security patches. Disabling encryption (A) would make the network vulnerable to unauthorized access. Sharing Wi-Fi passwords with neighbors (B) may compromise security. Using the default network name (D) (SSID) can make it easier for attackers to identify and target your network.

NEW QUESTION # 113

What is the purpose of Tactics in the context of cybersecurity?

- A. To determine the motive behind a cyberattack
- B. To track the impact of a cyberattack on the integrity of data
- C. To identify specific cyber threat actors
- D. To categorize the methods and strategies employed by cyber threat actors

Answer: D

Explanation:

Tactics in cybersecurity refer to the methods and strategies used by cyber threat actors to achieve their objectives. Understanding and categorizing these tactics help organizations assess their vulnerability to specific attacks and develop appropriate defense measures.

NEW QUESTION # 114

.....

It will provide them with the 100-160 exam pdf questions updates free of charge if the 100-160 certification exam issues the latest changes. If you work hard using our top-rated, updated, and excellent Cisco 100-160 PDF Questions, nothing can refrain you from getting the Cisco 100-160 certificate on the maiden endeavor.
