Full Detailed in Depth Explanation:

The Data Grid page pattern in Redwood, built on the data management page template, incorporates the Advanced Collection Container and Data Grid components. Optional drawers can be added to provide additional context or transactional subflows related to the grid data. According to the Redwood Pattern Book, these drawers can be positioned at the "Start" (left side in LTR languages) or "End" (right side in LTR languages) of the page layout. These positions align with Redwood's responsive design principles, allowing drawers to slide in from the sides to maximize usability on various screen sizes. Top (C) and Bottom (D) positions are not supported for drawers in this pattern, as they are typically reserved for headers, footers, or other UI elements in Redwood's design system.
