

TOP 312-50v13 Prep Guide 100% Pass | High-quality Certified Ethical Hacker Exam (CEHv13) Free Sample Questions Pass for sure

BONUS!!! Download part of Pass4training 312-50v13 dumps for free: https://drive.google.com/open?id=10I20DTx2B_MvCfeW788hWxRQAmk2n97h

Here we want to give you a general idea of our 312-50v13 exam questions. Our website is operated with our 312-50v13 practice materials related with the exam. We promise you once you make your choice we can give you most reliable support and act as your best companion on your way to success. We not only offer 312-50v13 free demos for your experimental overview of our practice materials, but being offered free updates for whole year long.

Even though our 312-50v13 training materials have received quick sale all around the world, in order to help as many candidates for the exam as possible to pass the 312-50v13 exam, we still keep the most favorable price for our best 312-50v13 test prep. In addition, if you keep a close eye on our website you will find that we will provide discount in some important festivals, we can assure you that you can use the least amount of money to buy the best product in here. We aim at providing the best 312-50v13 Exam Engine for our customers and at trying our best to get your satisfaction.

312-50v13 Free Sample Questions | 312-50v13 Valid Test Preparation

We provide all candidates with 312-50v13 test torrent that is compiled by experts who have good knowledge of exam, and they are very experience in compile study materials. Not only that, our team checks the update every day, in order to keep the latest information of 312-50v13 latest question. Once we have latest version, we will send it to your mailbox as soon as possible. our 312-50v13 Exam Questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the 312-50v13 exam, so little time great convenience for some workers. It must be your best tool to pass your exam and achieve your target.

ECCouncil Certified Ethical Hacker Exam (CEHv13) Sample Questions (Q320-Q325):

NEW QUESTION # 320

Peter, a Network Administrator, has come to you looking for advice on a tool that would help him perform SNMP enquires over the network.

Which of these tools would do the SNMP enumeration he is looking for? Select the best answers.

- A. SNScan
- B. NMap
- C. SNMPUtil
- D. Solarwinds IP Network Browser
- E. SNMPScan

Answer: A,C,D

NEW QUESTION # 321

Which Nmap switch helps evade IDS or firewalls?

- A. -T
- B. -D
- C. -0N/-0X/-0G
- D. -n/-R

Answer: B

Explanation:

In CEH v13 Module 03: Scanning Networks, Nmap's evasion techniques are discussed for bypassing or confusing Intrusion Detection Systems (IDS) and firewalls.

The -D option in Nmap is used to enable decoy scanning. It inserts false IP addresses in the scan to obfuscate the true origin of the scan.

This technique helps in masking the attacker's IP and can confuse IDS logs.

Option Clarification:

A). -n/-R: Disables DNS resolution (-n) or uses reverse DNS (-R), does not evade detection.

B). -0N/-0X/-0G: Output formats (normal, XML, grepable), not related to evasion.

C). -T: Controls timing (e.g., -T0 is stealthy, -T5 is aggressive), but not explicitly for IDS evasion.

D). -D: Correct. Used for IDS/firewall evasion by using decoy IPs.

NEW QUESTION # 322

Jane is working as a security professional at CyberSol Inc. She was tasked with ensuring the authentication and integrity of messages being transmitted in the corporate network. To encrypt the messages, she implemented a security model in which every user in the network maintains a ring of public keys. In this model, a user needs to encrypt a message using the receiver's public key, and only the receiver can decrypt the message using their private key. What is the security model implemented by Jane to secure corporate messages?

- A. Zero trust network
- B. Secure Socket Layer (SSL)
- C. Web of trust (WOT)
- D. Transport Layer Security (TLS)

Answer: C

Explanation:

The scenario describes a decentralized cryptographic trust model where each user maintains a ring or database of public keys, and communications are encrypted using the recipient's public key. This aligns precisely with the Web of Trust (WOT) model.

According to the CEH v13 Official Courseware:

* Web of Trust (WOT) is a decentralized trust model used primarily in PGP (Pretty Good Privacy) environments.

* In WOT:

* Each user maintains a local keyring of trusted public keys.

- * There is no central Certificate Authority (CA).
- * Trust is built based on mutual verification and endorsement of public keys among users.
- * It uses asymmetric cryptography: messages are encrypted using the receiver's public key and decrypted using the corresponding private key.
- * This model provides authentication (via digital signatures) and message integrity (via cryptographic hash functions).

Incorrect Options:

- * A. Zero Trust Network is a security architecture that enforces strict access control but is not a cryptographic trust model.
- * B. TLS (Transport Layer Security) is a protocol for securing data in transit, commonly used in HTTPS, and relies on the PKI trust model (not WOT).
- * C. SSL (Secure Socket Layer) is an outdated version of TLS, also based on centralized certificate authorities.

Reference - CEH v13 Official Courseware:

- * Module 20: Cryptography
- * Section: "Public Key Infrastructure (PKI) and Trust Models"
- * Subsection: "Web of Trust (WOT) Model"
- * Study Guide Table: Comparison of Trust Models - PKI vs WOT vs Hybrid

Lab references in CEH Engage may also cover key signing and verifying concepts in decentralized environments.

NEW QUESTION # 323

Bella, a security professional working at an IT firm, finds that a security breach has occurred while transferring important files. Sensitive data, employee usernames, and passwords are shared in plaintext, paving the way for hackers to perform successful session hijacking. To address this situation, Bella implemented a protocol that sends data using encryption and digital certificates. Which of the following protocols is used by Bella?

- A. IP
- B. HTTPS
- **C. FTPS**
- D. FTP

Answer: C

Explanation:

The File Transfer Protocol (FTP) is a standard organization convention utilized for the exchange of PC records from a worker to a customer on a PC organization. FTP is based on a customer worker model engineering utilizing separate control and information associations between the customer and the server.[1] FTP clients may validate themselves with an unmistakable book sign-in convention, ordinarily as a username and secret key, however can interface namelessly if the worker is designed to permit it. For secure transmission that ensures the username and secret phrase, and scrambles the substance, FTP is frequently made sure about with SSL/TLS (FTPS) or supplanted with SSH File Transfer Protocol (SFTP).

The primary FTP customer applications were order line programs created prior to working frameworks had graphical UIs, are as yet dispatched with most Windows, Unix, and Linux working systems.[2][3] Many FTP customers and mechanization utilities have since been created for working areas, workers, cell phones, and equipment, and FTP has been fused into profitability applications, for example, HTML editors.

NEW QUESTION # 324

What is the least important information when you analyze a public IP address in a security alert?

- **A. ARP**
- B. Whois
- C. DNS
- D. Geolocation

Answer: A

NEW QUESTION # 325

.....

ECCouncil exam simulation software is the best offline method to boost preparation for the ECCouncil 312-50v13 examination. The software creates a 312-50v13 real practice test-like scenario where aspirants face actual 312-50v13 exam questions. This feature

creates awareness among users about Certified Ethical Hacker Exam (CEHv13) exam pattern and syllabus. With the desktop ECCouncil 312-50v13 Practice Exam software, you can practice for the test offline via any Windows-based computer.
