Our three versions of CloudSec-Pro study materials are the PDF, Software and APP online. They have their own advantages differently and their prolific CloudSec-Pro practice materials can cater for the different needs of our customers, and all these CloudSec-Pro simulating practice includes the new information that you need to know to pass the test for we always update it in the first time. So you can choose them according to your personal preference.

Palo Alto Networks Cloud Security Professional Sample Questions (Q84-Q89):

NEW QUESTION # 84

If you are required to run in an air-gapped environment, which product should you install?

- A. Prisma Cloud Enterprise Edition
- B. Prisma Cloud with self-hosted plugin
- **C. Prisma Cloud Compute Edition**
- D. Prisma Cloud Jenkins Plugin

Answer: C

Explanation:

Reference: <https://docs.paloaltonetworks.com/prisma/prisma-cloud.html>

Prisma Cloud Compute Edition is the suitable product for air-gapped environments, where there is no direct internet access. This edition can be installed and operated in isolated environments, providing cloud security capabilities without the need for external connectivity.

NEW QUESTION # 85

Which alert deposition severity must be chosen to generate low and high severity alerts in the Anomaly settings when user wants to report on an unknown browser and OS, impossible time travel, or both due to account hijacking attempts?

- **A. Aggressive**
- B. Conservative
- C. High
- D. Moderate

Answer: A

Explanation:

Aggressive: For unusual user activity-Report on either unknown location or service, or both to classify an anomaly. For account hijacking-Report on unknown browser and Operating System, impossible time travel, or both. For anomalous compute provisioning activity-Reports on low and higher severity alerts.

NEW QUESTION # 86

An administrator wants to install the Defenders to a Kubernetes cluster. This cluster is running the console on the default service endpoint and will be exporting to YAML.

Console Address: \$CONSOLE_ADDRESS Websocket Address: \$WEBSOCKET_ADDRESS User: \$ADMIN_USER

Which command generates the YAML file for Defender install?

- A. <PLATFORM>/twistcli defender export kubernetes --address \$WEBSOCKET_ADDRESS --user \$ADMIN_USER --cluster-address \$CONSOLE_ADDRESS
- **B. <PLATFORM>/twistcli defender export kubernetes --address \$CONSOLE_ADDRESS --user \$ADMIN_USER --cluster-address \$WEBSOCKET_ADDRESS**
- C. <PLATFORM>/twistcli defender YAML kubernetes --address \$CONSOLE_ADDRESS --user \$ADMIN_USER --cluster-address \$WEBSOCKET_ADDRESS
- D. <PLATFORM>/twistcli defender --address \$CONSOLE_ADDRESS --user \$ADMIN_USER -- cluster-address \$CONSOLE_ADDRESS

Answer: B

Explanation:

The correct command to generate the YAML file for Defender install in a Kubernetes cluster, considering the console and websocket addresses, as well as the admin user, would typically involve specifying the addresses and user details. The option D seems most aligned with standard practices for such commands, where you export the Defender configuration for Kubernetes, specifying the console and websocket addresses along with the user details.

Reference: https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/install/install_kubernetes.html

NEW QUESTION # 87

What is the behavior of Defenders when the Console is unreachable during upgrades?

- A. Defenders will fail closed until the web-socket can be re-established.
- B. Defenders will fail open until the web-socket can be re-established.
- **C. Defenders continue to alert and enforce using the policies and settings most recently cached before upgrading the Console.**
- D. Defenders continue to alert, but not enforce, using the policies and settings most recently cached before upgrading the Console.

Answer: C

Explanation:

When the Console is unreachable during upgrades, Defenders continue to alert and enforce using the policies and settings most recently cached before the upgrade (option D). This behavior ensures that security enforcement remains active and consistent, even when the central management console is temporarily unavailable. The cached policies enable Defenders to maintain the security posture based on the last known configuration, ensuring continuous protection against threats and compliance with established security policies. This approach reflects Prisma Cloud's design principle of ensuring uninterrupted security enforcement, thereby safeguarding the environment against potential vulnerabilities during maintenance periods.

NEW QUESTION # 88

Which two roles have access to view the Prisma Cloud policies? (Choose two.)

- A. Build AND Deploy Security
- B. Defender Manager
- **C. Dev SecOps**
- D. Auditor

Answer: C,D

Explanation:

In Prisma Cloud, roles with access to view policies include Auditor and Dev SecOps. The Auditor role is typically focused on compliance and oversight, allowing users to review configurations, policies, and compliance status without making changes. The Dev SecOps role bridges the gap between development, security, and operations, focusing on integrating security practices within the CI/CD pipeline. Both roles require access to Prisma Cloud policies to perform their functions effectively, ensuring that security and compliance are maintained throughout the cloud environment and application lifecycle.

NEW QUESTION # 89

.....

In fact, in real life, we often use performance of high and low to measure a person's level of high or low, when we choose to find a good job, there is important to get the CloudSec-Pro certification as you can.
