NEW QUESTION # 79

What are some security safeguards categories? Note: There are 3 correct answers to this question.

- **A. Technical**
- **B. Organizational**
- C. Financial
- D. Access Control
- **E. Physical**

Answer: A,B,E

Explanation:

Security safeguards in SAP systems are categorized to address various aspects of system protection. Physical safeguards involve securing physical infrastructure, such as data centers and hardware, to prevent unauthorized access or damage. Organizational safeguards include policies, procedures, and training to ensure that personnel follow security best practices, fostering a culture of compliance. Technical safeguards encompass tools and technologies, such as encryption, firewalls, and authorization controls, to

protect system data and processes from cyber threats. These categories collectively form a comprehensive security framework. Access Control, while critical, is a subset of technical safeguards rather than a standalone category, and Financial safeguards are not a recognized category in SAP's security framework, as they pertain more to business processes than security measures. These distinctions ensure a holistic approach to securing SAP environments.
