C-WME-2506 Training Materials have free update for 365 days after purchasing, and the update version will be sent to you email automatically.

SAP C-WME-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.
Topic 2	<ul style="list-style-type: none">Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.

Topic 3	<ul style="list-style-type: none"> • Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.

If for any reason, a candidate fails in C-WME-2506 exam then he will be refunded his money after the refund process. Also, we offer one year free updates to our C-WME-2506 Exam esteemed user, these updates are applicable to your account right from the date of purchase. 24/7 customer support is favorable to candidates who can email us if they find any ambiguity in the C-WME-2506 exam dumps, our support will merely reply to your all SAP Certified Associate - WalkMe Digital Adoption Consultant exam product related queries.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which of the following is a capability of WalkMe's Smart Walk-Thrus?

- A. Blocking users from making changes to the software
- B. Removing unused applications from the tech stack
- **C. Providing step-by-step on-screen guidance in real time**
- D. Preventing users from interacting with pop-ups

Answer: C

Explanation:

WalkMe's Smart Walk-Thrus are designed to deliver step-by-step on-screen guidance in real time, guiding users through processes within an application. This capability uses interactive balloons and triggers to provide contextual instructions, enhancing user adoption and reducing errors without altering the underlying software.

The other options are incorrect:

- * Preventing pop-up interactions (B) is not a primary Smart Walk-Thru function, though Launchers can block elements.
- * Removing unused applications (C) is unrelated to Smart Walk-Thrus; it may relate to Discovery's License Optimization.
- * Blocking software changes (D) is not a WalkMe feature, as it focuses on guidance, not restrictions.

Extract from Official WalkMe Documentation:

According to the SAP WalkMe Digital Adoption Consultant Study Guide (Section 1.1: WalkMe Fundamentals):

"Smart Walk-Thrus provide real-time, step-by-step on-screen guidance, helping users navigate processes and complete tasks efficiently within applications." The course WalkMe Fundamentals states:

"A core capability of Smart Walk-Thrus is delivering interactive, real-time guidance directly on the screen, simplifying complex processes for users." Option A accurately describes a Smart Walk-Thru capability.

SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.1: WalkMe Fundamentals.

WalkMe Overview Guide, "Smart Walk-Thrus" Section.

Course: WalkMe Fundamentals, Module 2: Core Features.

NEW QUESTION # 40

The Dynamic Layout of a ShoutOut in the Editor consists of which three layers? Note: There are 3 correct answers to this question.

- A. Z-index

- B. Canvas
- C. Player
- D. Frame
- E. Widget

Answer: B,D,E

Explanation:

The Dynamic Layout of a WalkMe ShoutOut in the Editor is composed of three layers: theFrame,Canvas, andWidget. TheFrame defines the outer structure and positioning of the ShoutOut (e.g., size and placement on the screen). TheCanvas is the content area where text, images, or buttons are placed. TheWidget includes interactive elements, such as the call to action button or close button, that users can interact with. These layers work together to create a customizable and visually appealing ShoutOut.

The other options are incorrect:

* Z-index(C) is a CSS property that controls stacking order, not a layer of the ShoutOut's layout.

* Player(E) refers to the WalkMe Player, which delivers content but is not part of the ShoutOut's internal structure.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.9: ShoutOuts):

"The Dynamic Layout of a ShoutOut consists of three layers: the Frame, which sets the structural boundaries; the Canvas, which holds the content; and the Widget, which includes interactive components like buttons." The course Advancing Your Skills in Building WalkMe Solutions elaborates:

"When designing ShoutOuts, understand the Dynamic Layout's three layers-Frame, Canvas, and Widget- to effectively customize appearance and functionality for user engagement." Options A, B, and D are the correct layers of a ShoutOut's Dynamic Layout.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.9: ShoutOuts.

WalkMe Editor User Guide, "ShoutOut Dynamic Layout" Section.

Course: Advancing Your Skills in Building WalkMe Solutions, Module 12: Designing Effective ShoutOuts.

NEW QUESTION # 41

You have created a Smart Walk-Thru to guide users creating a new department on a site. Depending on which option users select from a dropdown at one step in the process, they may need to complete a few additional items before moving forward.

Which WalkMe feature could help address this alternate path in a Smart Walk-Thru?

- A. Split
- B. Start Point
- C. Wait For Condition
- D. Popup Step

Answer: A

NEW QUESTION # 42

You have been given a project where end users are inputting incorrect information on a form, and the company wants to add some WalkMe content to help people complete the form correctly to improve data integrity. Which of the following solutions would you suggest FIRST?

- A. Create a Smart Walk-Thru to guide users through the process
- B. Create Guidance or Validation SmartTips
- C. Onboarding Task to encourage users to complete the form
- D. Add a Resource to the Menu that provides additional details

Answer: B

Explanation:

To address incorrect form inputs and improve data integrity, Guidance or Validation SmartTips are the most direct and effective solution to suggest first. Guidance SmartTips provide on-screen instructions for each field, while Validation SmartTips check user inputs against predefined rules (e.g., format, required fields) and display error messages if incorrect. This approach targets the root issue-user errors in specific fields-and provides real-time feedback to ensure accurate data entry.

The other options are less immediate:

* Onboarding Task(B) is better for guiding users through a multi-step process, not form-specific errors.

* Smart Walk-Thru(C) is useful for complex processes but may be overkill for a single form.

* Resource in the Menu(D) requires users to seek help proactively, which is less effective than in- context guidance.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5: SmartTips):

"For forms with frequent user errors, Guidance SmartTips offer field-specific instructions, and Validation SmartTips enforce correct inputs, improving data integrity directly at the point of entry." The course Getting Started with Building WalkMe Solutions advises:

"Start with SmartTips for form-related issues, using Guidance to clarify field requirements and Validation to catch errors, as they provide targeted, real-time support." Option A, Guidance or Validation SmartTips, is the first solution to suggest.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5: SmartTips.

WalkMe Editor User Guide, "SmartTips for Forms" Section.

Course: Getting Started with Building WalkMe Solutions, Module 7: Addressing Form Errors.

NEW QUESTION # 43

How does WalkMe's Digital Experience Analytics (DXA) support organizations?

- A. By tracking how users interact with predefined on-screen elements
- B. By replacing all manual processes with automation
- C. By creating new applications to replace existing ones
- D. By eliminating the need for employee training

Answer: A

Explanation:

WalkMe's Digital Experience Analytics (DXA) supports organizations by tracking how users interact with predefined on-screen elements, such as buttons, forms, or pages. This provides insights into user behavior, friction points, and adoption gaps, enabling organizations to optimize processes and improve digital experiences. DXA integrates with WalkMe Insights to deliver actionable data.

The other options are incorrect:

* Replacing manual processes(A) is a benefit of automation, not DXA's primary role.

* Creating new applications(C) is outside WalkMe's scope.

* Eliminating training(D) is an exaggeration, as WalkMe supports training, not replaces it.

Extract from Official WalkMe Documentation:

Per the SAP WalkMe Digital Adoption Consultant Study Guide (Section 3.1: Analytics Overview):

"Digital Experience Analytics (DXA) tracks user interactions with predefined elements, offering insights into engagement and pain points to enhance digital adoption." The course WalkMe Fundamentals explains:

"DXA helps organizations by monitoring how users interact with on-screen elements, providing data to identify inefficiencies and improve user experiences." Option B correctly describes DXA's support for organizations.
