NEW QUESTION # 146

Which of the following is NOT an advantage of Salesforce Connect over ETL?

- A. If the origin is offline, the data is still available via Salesforce Connect.
- B. The data is always fetched on demand
- C. Standard protocols like OData can easily proxy external data into Salesforce.
- D. Data security can be enforced using per-user or per-application authentication.

Answer: A

NEW QUESTION # 147

Which Is an effect of "locking" an application that belongs to a Heroku Enterprise Team?

- A. The application cannot be deployed until is unlocked.
- B. Members of the Enterprise Team who are not administrators have their permissions for the application revoked.
- C. Members of the Enterprise Team cannot be granted new permissions for the application until it's unlocked.
- D. New members of the Enterprise Team are granted no automatic permissions for the application.

Answer: D

NEW QUESTION # 148

A hospital wants to build a mobile app that allows patients to check the status of submitted insurance claims, which the hospital stores in Salesforce Health Cloud. The app's back end will run on Heroku.

Which two measures should an Architect recommend to help ensure that the app is compliant with HIPAA? (Choose two.)

- A. Ensure that the mobile app can only run when on the hospital's intranet, which is connected to the back end's Shield Private Space via VPN.
- B. Ensure that the back-end application's code encrypts all claim data before writing it to a Heroku Postgres database.
- C. Use only Heroku Shield Postgres databases to store claim data outside of Salesforce Health Cloud.
- D. Use Heroku Shield Connect to sync claim data from Salesforce to a Heroku Postgres database.

Answer: B,D

NEW QUESTION # 149
