

Latest PSM-I Test Pdf, PSM-I Exam Simulator Fee

PSM 1 Practice Test

Scrum is founded on - answer Empiricism

Empiricism asserts that knowledge comes from experience and making decisions based on what is known.

Who is responsible for crafting the Sprint Goal at the Sprint Planning? - answer The Scrum Team

After the Development Team forecasts the Product Backlog items it will deliver in the Sprint, the Scrum Team crafts a Sprint Goal.

How does Definition of "Done" help to the Scrum Team? - answer1) DoD ensures artifact transparency

2) DoD is used to assess when work is complete on the product Increment

3) DoD guides the Development Team in knowing how many Product Backlog items it can select during a Sprint Planning

The Daily Scrum always should take exactly 15 minutes. For example, if your team managed doing it in 5 minutes, you should spend 10 more minutes on some useful team activity like Product Backlog refinement, but not more (T/F) - answerFalse

All events in Scrum are time-boxed. It means that every event has a maximum duration. However, the Scrum Guide does not require a minimal duration for any event. As Scrum Teams mature, they can do some events faster (e.g. the Sprint Planning or the Sprint Retrospective).

Who has the authority to cancel the Sprint? - answerThe Product Owner

Only the Product Owner has the authority to cancel the Sprint, although he or she may do so under influence from the stakeholders, the Development Team, or the Scrum Master.

The Scrum Master does the following regarding the Daily Scrum - answerTeaches the Development Team to keep the Daily Scrum within the 15-minute time-box

Ensures that the Development Team has the meeting

If others are present at the Daily Scrum, ensures that they do not disrupt the meeting

Therefore, we can see that in the actual PSM-I exam questions, how the arrangement plays a crucial role in the teaching effect. The PSM-I Study Guide in order to allow the user to form a complete system of knowledge structure, the qualification PSM-I examination of test interpretation and supporting course practice organic reasonable arrangement together.

Scrum Professional Scrum Master I Sample Questions (Q180-Q185):

NEW QUESTION # 180

What is the tactic a Scrum Master should use to divide a group of 100 people into multiple Development Teams?

- A. Ask the developers to divide themselves into teams.
- B. Ask the Product Owner to assign the people to teams.
- C. Create teams based on their skills across multiple layers (such as database, UI, etc.)

Answer: A

NEW QUESTION # 181

Who determines how many Product Backlog items the Developers select for a sprint? (choose the best answer)

- A. The Product Owner
- B. The Scrum Master
- C. The Developers
- D. The stakeholders attending Sprint Planning
- E. The Scrum Team

Answer: C

Explanation:

The Developers determine how many Product Backlog items they select for a Sprint, as stated in the Scrum Guide: "The Developers select items from the Product Backlog to include in the current Sprint. The Scrum Team may refine these items during this process, which increases understanding and confidence."

NEW QUESTION # 182

What activities would a Product Owner typically undertake in the phase between the end of the current Sprint and the start of the next Sprint?

- A. Work with the Quality Assurance departments on the Increment of the current Sprint.
- B. Refine the Product Backlog.
- C. Update the project plan with stakeholders.
- D. There are no such activities. The next Sprint starts immediately after the current Sprint.

Answer: D

Explanation:

There are no activities that a Product Owner would typically undertake in the phase between the end of the current Sprint and the start of the next Sprint, because there is no such phase. The next Sprint starts immediately after the current Sprint, without any gaps or breaks. The other options are either activities that occur during a Sprint (such as refining the Product Backlog) or activities that are not consistent with Scrum (such as working with Quality Assurance departments or updating project plans).

NEW QUESTION # 183

During Sprint Planning the Product Owner and the Developers are unable to reach an understanding about the highest order Product

Backlog items. Because of this, the Developers are unable to determine how many Product Backlog items they can forecast for the upcoming Sprint. However, the Product Owner and the Developers are able to agree on a Sprint Goal.

Which of the following actions should the Scrum Master support?

(choose the best two answers)

- A. Cancel the Sprint. Send the entire team to an advanced Scrum training and then start a new Sprint.
- B. Continue the Sprint Planning event past its timebox until an adequate number of Product Backlog items are well enough understood for the Developers to make a complete forecast. Then start the Sprint.
- C. Forecast the Product Backlog items that are most likely to meet the Sprint Goal and create the Sprint Backlog. Conclude Sprint Planning and start the development work. Continue to analyze, decompose, and create additional
- D. During the next Sprint Retrospective discuss why this happened and what changes will make it less likely to recur.

Answer: C,D

Explanation:

functionality during the Sprint

E.

Ask everyone to take as much time as needed to analyze the Product Backlog first, and then reconvene another Sprint Planning meeting.

Explanation:

According to the Scrum Guide, two actions that the Scrum Master should support in this scenario are forecasting the Product Backlog items that are most likely to meet the Sprint Goal and creating the Sprint Backlog, and discussing why this happened and what changes will make it less likely to recur during the next Sprint Retrospective. These actions are consistent with Scrum values and principles, such as empiricism, adaptation, and continuous improvement. The other options are not valid actions, as they are either wasteful (such as canceling the Sprint or continuing the Sprint Planning past its timebox) or ineffective (such as asking everyone to take more time to analyze the Product Backlog).

NEW QUESTION # 184

The Scrum Master observes the Product Owner struggling with ordering the Product Backlog. What is an appropriate action for the Scrum Master to take? (Choose the best answer.)

- A. Suggest the Product Owner extend the Sprint, so he can have more time to order the Product Backlog.
- B. Present the Product Owner with an ordered Product Backlog to use.
- C. Offer the Product Owner help in understanding that the goal of ordering the Product Backlog is to maximize value.
- D. Suggest that the Development Team does the ordering to be sure that it is a feasible ordering of work.
- E. Encourage the Product Owner to work with the Development Team to see which items technically are fastest to implement.

Answer: D

NEW QUESTION # 185

.....

You must hold an optimistic belief for your life. There always have solutions to the problems. We really hope that our PSM-I study materials will greatly boost your confidence. In fact, many people are confused about their future and have no specific aims. Then our PSM-I practice quiz can help you find your real interests. Just think about that you will get more opportunities to bigger enterprise and better position in your career with the PSM-I certification. It is quite encouraging!
