As long as you are willing to trust our PEGACPSA24V1 preparation materials, you are bound to get the PEGACPSA24V1 certificate. Life needs new challenge. Try to do some meaningful things.

Pegasystems Certified Pega System Architect 24 Sample Questions (Q200-Q205):

NEW QUESTION # 200

Which setting allows a case to automatically close when all child cases are resolved?

- A. Case Reassignment Rule
- **B. Parent Case Resolution Policy**
- C. Work Queue Configuration
- D. SLA Goal Adjustment

Answer: B

Explanation:

A Parent Case Resolution Policy ensures that a parent case automatically closes when all child cases reach completion. This eliminates manual intervention, reducing workload for case managers. It is commonly used in multi-step workflows like HR onboarding and claims processing. This setting ensures process efficiency and completeness.

NEW QUESTION # 201

Which feature ensures that a case automatically resumes after a condition is met?

- A. Decision Table
- B. Case Resolution Rule
- C. SLA Timer
- **D. Wait Step**

Answer: D

Explanation:

A Wait Step pauses case processing until a specific condition is met or a defined time period passes. It ensures that dependent tasks, such as receiving external data, complete before proceeding. This improves synchronization between processes. It is useful in multi-step approval workflows and background verification checks.

NEW QUESTION # 202

Which feature allows Pega to store case-related data while minimizing database queries?

- **A. Clipboard**
- B. Case Dependency
- C. SLA Timer
- D. Work Queue

Answer: A

Explanation:

The Clipboard is an in-memory storage mechanism that holds case data and Data Pages for quick access. It reduces unnecessary database queries, improving performance. Data remains available during a session, ensuring faster interactions. The Clipboard supports both transient and persistent data storage.

NEW QUESTION # 203

Which refresh condition ensures a UI section updates when a field value changes?

- **A. Reload Once Per Interaction**

- **B. Refresh When Changed**
- C. Case Assignment
- D. SLA Escalation

Answer: B

Explanation:

Refresh When Changed triggers an update when a specific field value is modified, ensuring real-time updates in the UI. This is useful for calculating totals, updating dropdown values, or adjusting form visibility. It enhances user experience by dynamically reflecting changes. This prevents users from needing to refresh the page manually.

NEW QUESTION # 204

Which tool in Pega allows viewing and managing class structures?

- A. SLA Dashboard
- **B. Class Explorer**
- C. Work Queue Monitor
- D. Case Dependency Tracker

Answer: B

Explanation:

The Class Explorer provides a visual representation of class hierarchies, helping developers understand inheritance and rule organization. This makes troubleshooting and debugging easier and more structured. SLA dashboards, work queues, and case dependencies do not manage class structures.

NEW QUESTION # 205

.....

All the IT professionals are familiar with the Pegasystems PEGACPSA24V1 exam. And all of you dream of owning the most demanding certification. So that you can get the career you want, and can achieve your dreams. With Exam4Labs's Pegasystems PEGACPSA24V1 Exam Training materials, you can get what you want.
