Answer: B,C,E

NEW QUESTION # 23
Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf? Note: There are 2 correct answers to this question.

- A. The test process failed the execution pre-check.
- B. Data marked for deletion is picked for execution.
- C. An execution variant has not been maintaine
- D. The process steps have been reordere

Answer: A,C

NEW QUESTION # 24
When conducting an upgrade of an SAP S/4HANA Cloud, public edition three system landscape, in which phase are the Business Roles updated?

- A. Realize
- B. Explore
- C. Discover
- D. Deploy

Answer: A

Explanation:
Upgrades in SAP S/4HANA Cloud Public Edition's three-system landscape (Sandbox, Test, Production) involve updating configurations, including Business Roles, to align with new features and maintain security.
The phase where these updates occur is critical for ensuring system readiness.
* Option A: DiscoverIncorrect. The Discover phase is for planning and assessing upgrades, not updating configurations like Business Roles. TheSAP S/4HANA Cloud Upgrade Guidestates, "The Discover phase focuses on evaluating upgrade impacts, not updating configurations such as Business Roles."
* Option B: ExploreIncorrect. The Explore phase validates new features and processes, but Business Role updates are performed later. TheSAP Activate Methodology Guidenotes, "Explore phase activities include reviewing new functionality, with Business Role updates occurring in the Realize phase."
* Option C: RealizeCorrect. Business Roles are updated in the Realize phase to incorporate new app access or restrictions introduced by the upgrade. TheSAP S/4HANA Cloud Security Guideexplains,
"During the Realize phase of an SAP S/4HANA Cloud Public Edition upgrade, Business Roles are updated using the Maintain Business Roles app to reflect new features and ensure proper access control."
* Option D: DeployIncorrect. The Deploy phase focuses on go-live and cutover, not configuration updates. TheSAP S/4HANA Cloud Upgrade Guideclarifies, "Deploy phase activities include final testing and system activation, with Business Role updates completed in the Realize phase." Extract from Official Documentation:
* SAP S/4HANA Cloud Security Guide(SAP Help Portal,https://help.sap.com): "Business Roles are updated in the Realize phase of an SAP S/4HANA Cloud Public Edition upgradeto incorporate new Fiori apps and access requirements, using the Maintain Business Roles app."
* SAP S/4HANA Cloud Upgrade Guide(SAP Community,https://community.sap.com): "In the Realize phase, configuration tasks such as updating Business Roles are performed to align with the new release, ensuring security and functionality are maintained."
Additional Context:
Updating Business Roles in the Realize phase ensures that user access aligns with new features introduced in the semi-annual upgrades, maintaining security and usability. This process, managed through the SAP Fiori Launchpad, is critical for a seamless transition to the upgraded system, aligning with SAP's cloud security model.

NEW QUESTION # 25

What defines the organizational entities that are required in SAP Central Business Configuration? Note: There are 2 correct answers to this question.

- A. Added partner content
- B. The selected scope
- C. System consistency checks
- D. The selected deployment target

Answer: B,D

Explanation:
SAP Central Business Configuration (CBC) is a tool used to configure the organizational structure and scope for SAP S/4HANA Cloud Public Edition. The definition of organizational entities depends on specific inputs during the configuration process.
* Option A: The selected scope Correct. The selected scope determines which business processes and organizational entities (e.g., company codes, plants) are required. The scope defines the functional areas to be implemented, which directly influences the organizational structure configured in CBC. SAP's documentation on CBC emphasizes that scoping decisions drive the creation of organizational entities.
* Option B: The selected deployment target Correct. The deployment target (e.g., specific system or tenant) influences the configuration of organizational entities, as it defines where the configuration will be applied. CBC uses the deployment target to ensure that entities are aligned with the target system's requirements, as per SAP's implementation guidelines.
* Option C: Added partner content Incorrect. Partner content may enhance functionality but does not directly define the organizational entities required in CBC. Entities are primarily determined by scope and deployment decisions.
* Option D: System consistency checks Incorrect. System consistency checks validate configurations but do not define the organizational entities. They ensure that the configured entities are consistent with SAP standards.
:
SAP Central Business Configuration Documentation: Details the role of scope and deployment target in defining organizational entities (https://help.sap.com).
SAP S/4HANA Cloud Public Edition Implementation Guide: Explains CBC configuration processes.
SAP Activate Methodology: Highlights scoping and deployment as key configuration drivers.
