It only takes you 20 hours to 30 hours to do the practice. After your effective practice, you can master the examination point from the Google-Workspace-Administrator exam torrent. Then, you will have enough confidence to pass it.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q70-Q75):

NEW QUESTION # 70
Your company has acquired a new company in Japan and wants to add all employees of the acquisition to your existing Google Workspace domain. The new company will retain its original domain for email addresses and, due to the very sensitive nature of its

work, the new employees should not be visible in the global directory. However, they should be visible within each company's separate directory. What should you do to meet these requirements?

- A. Create one dynamic group for each company based on a custom attribute defining the company. In Directory Settings > Visibility Settings, define custom directories for each company, and set up Visibility according to the dynamic group.
- B. Create a new Google Workspace domain isolated from the existing one, and create users in the new domain instead.
- C. Redesign your OU organization to have 2 child OUs for each company directly under the root. In Directory Settings > Visibility Settings, define custom directories for each company, and set up Visibility according to the OU.
- D. Under Directory Settings > Contact sharing, disable the contact sharing option and wait for 24 hours to allow the settings to propagate before creating the new employee accounts.

Answer: C

Explanation:
Organizational Units (OUs):
Create separate OUs for each company under the root OU.
This allows for customized settings and policies per company.
Visibility Settings:
Customize the directory visibility settings to ensure each company's users are only visible within their own directory.
Navigate to Directory Settings in the Admin console.
Set up visibility rules to apply to the specific OUs:
Go to Directory > Directory settings.
Click Visibility settings.
Select the OU for each company and customize the visibility settings accordingly.

NEW QUESTION # 71
Your organization has users in the United States and Europe. For compliance reasons, you want to ensure that user data is always stored in the region where the user is located. What should you do?

- A. Populate the Address field on each user record, ensuring the country information is accurate.
- B. Create two Google Groups titled "United States" and "Europe." Assign users to either group based on location.
- C. Specify a data region policy for each Organizational Unit (OU) where users are grouped by location.
- D. Do nothing. No extra configuration is needed because user data is always stored in the region the user is located.

Answer: C

NEW QUESTION # 72
Your organization is expected to start using Google Workspace Enterprise Standard in several countries.
During the planning phase, the change management leadership team mandates that meeting rooms near each participant's office location should be suggested when someone creates a Google Calendar event, to simplify the user experience and avoid booking rooms when people would not be able to move easily. What should you do?

- A. Share each room only with the Dynamic Group defined per each user location so that they can only book the rooms nearby.
- B. Organize users for each location in separate Google Groups. Add room resources to the corresponding groups so that meeting rooms would be suggested accordingly.
- C. Organize users for each location in separate organizational units (OUs). Add room resources to the corresponding OUs so that meeting rooms would be suggested accordingly.
- D. Define users' work locations by setting building ID. floor name, and floor section if applicable as the-buildings and rooms are defined.

Answer: D

Explanation:
* Navigate to Google Admin Console: Go to admin.google.com and sign in with your admin account.
* Access Buildings and Resources: In the Admin console, go to Menu > Directory > Buildings and resources.

* Create Buildings and Rooms: Create buildings and define floors and sections within these buildings.
Each building should represent an office location.
* Set Users' Work Locations: Assign building ID, floor name, and floor section to users. This can be done manually for each user or in bulk using a CSV file upload.
* Configure Calendar Settings: Ensure that the Google Calendar settings are configured to suggest nearby meeting rooms based on users' work locations.
This setup allows Google Calendar to suggest meeting rooms near the users' defined work locations, improving the user experience and avoiding the booking of inconvenient rooms.

* Manage buildings, features & resources
* Set up work locations

NEW QUESTION # 73
A user does not follow their sign-in pattern and signs In from an unusual location As an admin, what should you do in response to this alert for this user during this investigation?

- A. Add Two Factor Authentication to the Domain
- B. Investigate the account for unauthorized activity in the Login and Security Audit Log
- C. First suspend the account and then investigate
- D. Enhance your security alerts for tracking sign-in patterns

Answer: B

Explanation:
As an admin, you should investigate the user account in question thoroughly. Check the Login and Security Audit Log to review all recent sign-in activity, IP addresses, geolocations, and any other relevant information. Look for any signs of unauthorized access or suspicious activities. If you find any suspicious activity, take appropriate actions, such as resetting passwords, revoking access, or communicating with the user to verify their identity.

NEW QUESTION # 74
Your team wants to schedule meetings based on your availability. You need to securely and efficiently share your calendar with your team. What should you do?

- A. Make your calendar public and set the permissions for events to show free/busy details.
- B. Create a new group calendar and share it with your team members. Set the sharing permissions for the calendar to show free/busy details.
- C. Export your calendar and then have your team import it into their Calendar environment.
- D. Share your calendar with your team. Set the sharing permissions for the calendar to show free/busy details.

Answer: D

Explanation:
Setting the Sharing Permissions of Google Calendar to show free/busy details prevents other users from viewing details regarding your meetings, maintaining privacy.

NEW QUESTION # 75
......
