ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q87-Q92):

NEW QUESTION # 87
What can be used to derive date-effective, criteria-driven hourly rates for calculating planned and actual resource costs for a project or demand?

- A. A rate type
- B. A resource assignment
- C. A rate model
- D. A time card

Answer: C

NEW QUESTION # 88
What is a data copy of the current project's task, schedule, or structure that can be used for comparison reporting later?

- A. Forecast
- B. Accrual
- C. Baseline
- D. Commitment

Answer: C

Explanation:
A baseline is a data copy of the current project's task, schedule, or structure that can be used for comparison reporting later. A baseline captures the original plan of the project and allows you to track the changes and deviations from the plan over time. You can create multiple baselines for a project and compare them with the current state of the project. You can find more information about baselines in the Product Documentation for ServiceNow.

NEW QUESTION # 89
When can a user choose from multiple rate types for their work, while logging a time card?

- A. Only if the capability is enabled in the Project Preferences
- B. Only if the capability is enabled in the Time Sheet Policies
- C. Only one (1) rate type can apply
- D. Only if this capability is enabled in the Project Record

Answer: B

Explanation:
Explanation
According to the Using rate types and labor rate cards document, a user can choose from multiple rate types for their work, while logging a time card, only if the capability is enabled in the Time Sheet Policies. This capability allows users to select different rate

types for different tasks, such as standard, overtime, or travel.
The other options are not correct, as they are not the places where the capability can be enabled. The Project Record is used to create and update project details, such as name, description, and state. The Project Preferences are used to set the default values for project fields, such as number, type, and priority. The option C is not correct, as more than one rate type can apply if the capability is enabled.

NEW QUESTION # 90
You can forecast future costs of projects based on:
Choose 2 answers

- A. Actual cost incurred.
- B. Paired instances.
- C. Changes in project such as project requirements.
- D. Incident cost.

Answer: A,C

NEW QUESTION # 91
What is a resource event?

- A. A non-scheduled activity impacting capacity.
- B. An external event.
- C. An event scheduled by a project manager.
- D. A block of time that a resource spends on a task.
Answer: A

Explanation:
A resource event is a non-scheduled activity that affects the availability and capacity of a resource or a group of resources. Examples of resource events are vacations, holidays, training, or sick leave. Resource events can be created by resource managers or resources themselves, and they can be viewed in the resource calendar or the resource workbench. You can find more information about resource events in the Product Documentation for ServiceNow.
