Axis Network Video Exam Prep Practice & ANVE Exam Torrent & Axis Network Video Exam Updated Training

Are you worried about insufficient time to prepare the exam? Do you have a scientific learning plan? Maybe you have set a series of to-do list, but it's hard to put into practice for there are always unexpected changes during the ANVE exam. Here we recommend our ANVE test prep to you. With innovative science and technology, our study materials have grown into a powerful and favorable product that brings great benefits to all customers. We are committed to designing a kind of scientific study material to balance your business and study schedule. With our ANVE Exam Guide, all your learning process includes 20-30 hours. As long as you spare one or two hours a day to study with our latest ANVE quiz prep, we assure that you will have a good command of the relevant knowledge before taking the exam. What you need to do is to follow the ANVE exam guide system at the pace you prefer as well as keep learning step by step.

Axis ANVE certification program is a comprehensive exam that covers a wide range of topics related to network video surveillance technology. ANVE exam is designed to test the knowledge and skills of professionals in the areas of IP camera technology, video compression, network design, and video management software. ANVE Exam is conducted online and is available in multiple languages, making it accessible to professionals around the world.

Axis Network Video Exam Sample Questions (Q151-Q156):

NEW QUESTION # 151

When using an external IR illuminator, what can happen if the beam angle is significantly narrower than the field of view?

- A. Focus must be set manually
- B. Heat can distort the image
- C. The backlight can increase
- D. The exposure may be uneven

Answer: D

Explanation:

When using an external IR illuminator with a beam angle significantly narrower than the field of view, the exposure may be uneven. This can result in parts of the image being overexposed (too bright) while other parts remain underexposed (too dark). Ensuring that the beam angle of the IR illuminator matches the field of view of the camera is essential for achieving uniform illumination across the entire surveillance area.

References: Axis Communications IR Illumination Guide

NEW QUESTION # 152

Field of view is determined by

- A. the sensor size and the aperture.
- B. the focal length and the sensor size.
- C. the exposure settings and the sensor size, the focal length and the exposure settings.

Answer: B

Explanation:

The field of view of a camera is determined by the focal length of the lens and the size of the sensor. The focal length affects how wide or narrow the view appears, while the sensor size impacts the overall field of view captured by the camera. Axis technical specifications detail how different combinations of focal length and sensor size influence the camera's field of view, allowing for precise control over what is captured in the frame.

NEW QUESTION # 153

Two cameras are streaming 6 Mbit/s each. Approximately how much storage is required to record one hour of video from both streams?

- A. 2.6 GB
- B. 5.4 GB
- C. 11.4 GB
- D. 24.2 GB

Answer: B

Explanation:

To calculate the storage required to record one hour of video from two cameras streaming at 6 Mbit/s each, we use the following steps:

* Total bitrate for both cameras: $6 \text{ Mbit/s} \times 2 = 12 \text{ Mbit/s}$

* Convert Mbit/s to Mbyte/s: $12 \text{ Mbit/s} \div 8 = 1.5 \text{ Mbyte/s}$

* Calculate the total data for one hour: $1.5 \text{ Mbyte/s} \times 3600 \text{ seconds} = 5400 \text{ Mbytes}$

* Convert Mbytes to Gbytes: $5400 \text{ Mbytes} \div 1024 = 5.27 \text{ Gbytes}$

Approximately, the storage required is 5.4 GB.

Reference: Axis Communications. "Calculating storage requirements." Axis Storage Calculation.

NEW QUESTION # 154

What is the red tip used for?

- A. Keeping connectors dust-free prior to installation

- B. Adapting cable for RJ48 connectors
- C. Puncturing the cable gasket cleanly
- D. Meeting fire code requirements

Answer: A

Explanation:

The red tip on the cable is used to keep the connectors dust-free prior to installation. It protects the RJ45 connector from dust and debris, ensuring a clean and reliable connection once installed. Maintaining clean connectors is essential for preventing connectivity issues and ensuring optimal network performance. Axis installation guides specify the importance of keeping connectors covered until installation to protect against contamination and ensure a proper connection.

NEW QUESTION # 155

The camera sensors in Axis' multidirectional cameras can be

- **A. individually adjusted.**
- B. stitched for a seamless image.
- C. added or removed.
- D. moved only as one unit.

Answer: A

Explanation:

The camera sensors in Axis' multidirectional cameras can be individually adjusted. This flexibility allows each sensor to be positioned independently, enabling optimal coverage of the desired areas. Such adjustability ensures that a single camera unit can cover multiple directions or areas, enhancing the efficiency and effectiveness of the surveillance setup. Axis' multidirectional camera specifications and manuals provide detailed information on this feature.

NEW QUESTION # 156

.....

With our ANVE study materials, you can make full use of those time originally spent in waiting for the delivery of exam files so that you can get preparations as early as possible. There is why our ANVE learning prep exam is well received by the general public. I believe if you are full aware of the benefits the immediate download of our PDF study exam brings to you, you will choose our ANVE actual study guide. Just come and buy it! You will be surprised about our high quality.
