

Accurate 1Z0-1055-25 Study Material - 2026 First-grade Oracle 1Z0-1055-25 Latest Cram Materials

What's more, part of that DumpsMaterials 1Z0-1055-25 dumps now are free: <https://drive.google.com/open?id=1CrtPChWIuW4lfOcjQOKfJhlqGjpNEISn>

We are living in a good society; everything is changing so fast with the development of technology. So an ambitious person must be able to realize his dreams if he is willing to make efforts. Winners always know the harder they work the luckier they are. If you purchase our study materials to prepare the 1Z0-1055-25 exam, your passing rate will be much higher than others. Also, the operation of our study material is smooth and flexible and the system is stable and powerful. You can install the 1Z0-1055-25 Exam Guide on your computers, mobile phone and other electronic devices. There are no restrictions to the number equipment you install. In short, it depends on your own choice. We sincerely hope that you can enjoy the good service of our products.

Our 1Z0-1055-25 exam quiz is unlike other exam materials that are available on the market, our 1Z0-1055-25 study dumps specially proposed different versions to allow you to learn not only on paper, but also to use mobile phones to learn. This greatly improves the students' availability of fragmented time. So you can achieve your 1Z0-1055-25 Certification easily without disrupting your daily routine. And we will give you 100% success guaranteed on the 1Z0-1055-25 training guide.

1Z0-1055-25 Latest Cram Materials | 1Z0-1055-25 Latest Exam Book

The PDF version of the DumpsMaterials Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) prep material is easily accessible. This format is ideal for someone who is constantly on the move, as you can prepare for your Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) exam whether you are using your smartphone, tablet, or laptop. You can study anywhere, at any time, without having to worry about installing anything. Furthermore, you can study with a hard copy by printing all of your Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) PDF questions. We offer regular updates in PDF format to improve Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) questions according to changes in the exam.

Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.
Topic 2	<ul style="list-style-type: none"> Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.
Topic 3	<ul style="list-style-type: none"> Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.
Topic 4	<ul style="list-style-type: none"> Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.
Topic 5	<ul style="list-style-type: none"> Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q47-Q52):

NEW QUESTION # 47

You are trying to use the Match in Full option for a purchase order, but your search for the PO is returning no results. Which two are the reasons for this?

- A. The Purchase Order is already partially matched to an invoice
- B. The Supplier or Purchase Order is set up for self-billing
- C. The match approval level is set to 3-way matching
- D. The match approval level is set to 4-way matching

Answer: A,B

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Match in Full feature allows users to create invoices by matching the full amount of a purchase order (PO) efficiently. However, certain conditions can prevent a PO from appearing in the Match in Full search results.

Analysis of Each Option:

A . The match approval level is set to 4-way matching

The match approval level determines the matching requirements between the PO, receipt, inspection, and invoice. A 4-way matching requires that the PO, receipt, accepted quantities from inspection, and invoice quantities all match within defined tolerances before payment approval. This setting, however, does not impact the availability of the PO in the Match in Full search results. Therefore, a 4-way matching configuration is not a reason for the PO not appearing in the search results.

B . The Supplier or Purchase Order is set up for self-billing

Self-billing arrangements mean that the buyer generates the invoice on behalf of the supplier. In such scenarios, the Match in Full feature is not applicable because the invoicing process is handled differently. As per Oracle documentation, "Match in Full can't be

used in the following circumstances:... A supplier or the purchase order is set up for self-billing." docs.oracle.com Therefore, if the supplier or PO is configured for self-billing, the PO will not appear in the Match in Full search results.

C . The match approval level is set to 3-way matching

Similar to 4-way matching, a 3-way matching requires that the PO, receipt, and invoice quantities match within tolerances before payment approval. This setting ensures that the goods received and invoiced align with the PO terms. However, the match approval level, whether 3-way or 4-way, does not affect the PO's availability in the Match in Full search results. Thus, a 3-way matching configuration is not a reason for the PO not appearing in the search results.

D . The Purchase Order is already partially matched to an invoice

The Match in Full feature is designed for situations where the supplier sends an invoice for the full amount of the PO. If a PO has already been partially matched to an invoice, it indicates that some portions of the PO have been invoiced, and the remaining amounts do not represent the full PO value. According to Oracle documentation, "Match in Full can't be used in the following circumstances:... The purchase order has already been partially matched to an invoice." docs.oracle.com Therefore, a PO that has been partially matched will not appear in the Match in Full search results.

Conclusion:

The two reasons preventing the purchase order from appearing in the Match in Full search results are:

B . The Supplier or Purchase Order is set up for self-billing

D . The Purchase Order is already partially matched to an invoice

These conditions make the Match in Full feature inapplicable, thereby excluding the PO from the search results.

NEW QUESTION # 48

You need to issue an off-cycle, single payment for a supplier before the next scheduled payment run. The invoice you need to pay has been uploaded into the system, yet it is not available for selection on the Create Payment page.

Select two potential reasons for this:

- A. The invoice is not yet due.
- **B. The payment supplier site you selected is different from the supplier site on the invoice.**
- **C. The invoice is not validated.**
- D. The invoice is not accounted.

Answer: B,C

Explanation:

Comprehensive and Detailed In-Depth

For an invoice to be available for payment processing in Oracle Payables, it must meet specific criteria. If an invoice is missing from the Create Payment page, the following could be the reasons:

The Invoice is Not Validated (Option A):

Invoices must be validated to ensure data accuracy and compliance with business rules. If an invoice is not validated, it remains in an Incomplete status and is not available for payment.

Resolution: Run the Invoice Validation process to validate the invoice. Once validated, it will appear in the Create Payment page for selection.

Reference:

The Payment Supplier Site Selected Differs from the Supplier Site on the Invoice (Option C):

Invoices are tied to a specific supplier site. If the supplier site selected when creating the payment does not match the supplier site on the invoice, the invoice will not be available for selection.

Resolution: Ensure that the supplier site selected on the Create Payment page matches the supplier site associated with the invoice.

Options B and D Analysis:

The Invoice is Not Yet Due (Option B):

While an invoice's due date impacts its eligibility for automatic payment processing (such as Payment Process Requests), it does not prevent an invoice from being selected manually for an off-cycle, single payment.

Verdict: Not a valid reason for invoice non-selection.

The Invoice is Not Accounted (Option D):

An invoice does not need to be accounted before payment; payment can be processed first, and accounting entries can be created afterward.

Verdict: Not a valid reason for invoice non-selection.

Thus, the correct answers are A. The invoice is not validated and C. The supplier site on the invoice does not match the supplier site

selected during payment creation.

NEW QUESTION # 49

You are testing the Payables to General Ledger Reconciliation report at the ledger level for your UK Ledger. You have run and selected the extract for the report but the request returned the message: "No data to display".

What is the reason for this?

- A. The reconciliation flag has not been enabled for your liability accounts.
- B. You did not select the business units associated to the UK Ledger.
- C. You did not specify the range of liability accounts to include in the extract.
- D. The financial category of Accounts Payable is not assigned to the liability accounts.

Answer: D

NEW QUESTION # 50

Your company will be utilizing the Campaign Management for Early Payment Discount Offers feature to maximize early payment discounts. This feature allows companies to send email-based campaigns offering suppliers the opportunity to enroll in an early payment discounts program. There is a predefined list of response options that suppliers can choose from, and such supplier responses are then automatically processed and applied in the system.

Which two are predefined response options available to suppliers?

- A. Accept All Offers
- B. Subscribe
- C. Enroll in a Standing Offer
- D. Decline the Offer

Answer: C,D

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Campaign Management for Early Payment Discount Offers feature enables organizations to send email campaigns to suppliers, inviting them to participate in early payment discount programs. Suppliers receiving these offers have predefined response options that are automatically processed by the system.

Predefined Supplier Response Options:

Accept a One-Time Offer:

Suppliers can choose to accept a discount offer for specific invoices that are currently eligible for early payment. This action applies the discount to the selected invoices, and they are processed for early payment accordingly.

Enroll in a Standing Offer:

By selecting this option, suppliers agree to participate in an ongoing early payment discount program. All future invoices that meet the agreed-upon criteria will automatically be eligible for early payment discounts without the need for individual acceptances.

Decline the Offer:

Suppliers may opt to decline the current early payment discount offer. Declining does not prevent them from receiving future offers; it simply indicates that they are not interested in the present offer.

Unsubscribe:

If a supplier chooses to unsubscribe, they will no longer receive email notifications regarding early payment discount offers from the campaign. This action effectively removes them from the current and any future campaigns.

Analysis of the Provided Options:

A . Accept All Offers:

There is no predefined response option that allows suppliers to accept all past and future offers in a single action. Acceptance is either for a specific one-time offer or through enrollment in a standing offer for future invoices.

B . Decline the Offer:

This is a valid predefined response. Suppliers can choose to decline the current offer, indicating they are not interested in the proposed early payment discount for the specified invoices.

C . Subscribe:

While suppliers can unsubscribe from receiving future offers, there isn't a specific "Subscribe" option. Suppliers are considered participants by default and can choose to enroll in standing offers or accept individual offers.

D . Enroll in a Standing Offer:

This is a valid predefined response. Suppliers can enroll in a standing offer, agreeing to early payment discounts on all future eligible invoices automatically.

Conclusion:

The correct predefined response options available to suppliers are B. Decline the Offer and D. Enroll in a Standing Offer. These options provide suppliers with the flexibility to manage their participation in early payment discount programs effectively.

NEW QUESTION # 51

You have created an approval rule as follows:

Rule 1: If the invoice amount > \$1000, route it to User 1.

Rule 2: If the invoice amount < \$1000, auto-approve it.

What will happen if a user creates an invoice for \$1000 and routes it for approval?

- A. Invoice will be sent to User 1 for approval.
- B. The initiate option is greyed out for the invoice.
- C. Invoice will be auto-approved.
- **D. The workflow will fail once approval is initiated, and the invoice will not get processed.**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Payables, when configuring invoice approval rules, it's crucial to ensure that all possible scenarios are accounted for to prevent workflow errors. In the given setup:

Rule 1: Invoices with an amount greater than \$1000 are routed to User 1 for approval.

Rule 2: Invoices with an amount less than \$1000 are auto-approved.

However, there is no rule defined for invoices equal to \$1000. This omission creates a gap in the approval process. When an invoice for exactly \$1000 is submitted, the system doesn't find a matching rule to apply, leading to a workflow failure. As a result, the approval process cannot proceed, and the invoice remains unprocessed.

Best Practice: To avoid such issues, it's essential to define comprehensive and inclusive approval rules that cover all possible scenarios. In this case, modifying the rules to include invoices equal to \$1000 would resolve the problem. For example:

Revised Rule 1: If the invoice amount \geq \$1000, route it to User 1.

Revised Rule 2: If the invoice amount < \$1000, auto-approve it.

This adjustment ensures that invoices with an amount of exactly \$1000 are routed appropriately, preventing workflow failures.
