

Salesforce Analytics-Con-201 Reliable Exam Simulator & Free Analytics-Con-201 Dumps

P.S. Free 2026 Salesforce Analytics-Con-201 dumps are available on Google Drive shared by NewPassLeader:
<https://drive.google.com/open?id=1jKhbJQXrAsTinTHSiMR6o4yLGD1c1PTN>

Compared with those uninformed exam candidates who do not have effective preparing guide like our Analytics-Con-201 study braindumps, you have already won than them. Among wide array of choices, our products are absolutely perfect. Besides, from economic perspective, our Analytics-Con-201 Real Questions are priced reasonably so we made a balance between delivering satisfaction to customers and doing our own jobs. So in this critical moment, our Analytics-Con-201 prep guide will make you satisfied.

Although the Analytics-Con-201 exam prep is of great importance, you do not need to be over concerned about it. With scientific review and arrangement from professional experts as your backup, and the most accurate and high quality content of our Analytics-Con-201 Study Materials, you will cope with it like a piece of cake. So our Analytics-Con-201 learning questions will be your indispensable practice materials during your way to success.

Free Salesforce Analytics-Con-201 Dumps & Analytics-Con-201 Latest Torrent

We recognize that preparing for the Salesforce Certification Exams can be challenging, and that's why we provide Salesforce Analytics-Con-201 practice material with three formats that take your individual needs into account. Our team of experts is dedicated to helping you succeed by providing you with the support you need while using the product.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q86-Q91):

NEW QUESTION # 86

A consultant runs the sharing inheritance coverage assessment for the Opportunity object and finds that some records exceed 400

sharing descriptors.

What should the consultant do?

- A. Contact Salesforce Support to increase the sharing descriptor limit.
- B. Increase the sharing descriptor limit in the analytics settings.
- C. Use security predicates in CRM Analytics.

Answer: C

Explanation:

When a record exceeds 400 sharing descriptors, it can cause performance issues or sharing rule complications in CRM Analytics. In such cases, the recommended solution is to use security predicates, which allow fine-tuned control over which data is visible to users based on their sharing rules and permissions. Security predicates reduce the number of sharing descriptors by enforcing security at the dataset level rather than relying solely on record-sharing mechanisms.

Increasing the sharing descriptor limit is not an available option, and Salesforce Support does not typically increase this limit, making the use of security predicates the best approach.

NEW QUESTION # 87

A dashboard designer at Cloud Kicks creates a dashboard in CRM Analytics. The designer notices fields display on the dashboard with their API labels, such as "AccountId.Industry", and wants to change this behavior.

The designer also notices that the fields and their order appear to randomly change when a values table is created.

What should the CRM Analytics consultant explain to help the designer?

- A. The default fields in a values table and the field labels can be modified in the dataset explorer.
- B. The field labels can only be changed in the widget properties in the dashboard edit mode.
- C. The default fields in a values table can be changed by reordering how fields appear in the JSON of the value table.

Answer: A

Explanation:

For the scenario at Cloud Kicks where fields display with their API labels and the fields in a values table seem to change order randomly, the correct approach is to modify these settings in the dataset explorer within CRM Analytics. This allows for a more intuitive display and control over how data is presented in dashboards.

Here's how these adjustments help:

* Modifying Field Labels: Changing the field labels from their API names to more user-friendly names enhances readability and user experience. This can be done directly in the dataset explorer, which affects how fields appear across all dashboards utilizing that dataset.

* Controlling Field Order: The order of fields in a values table can seem random if not explicitly set. By using the dataset explorer, a designer can specify the order in which fields appear, which then reflects consistently in the dashboard's values table.

This functionality is part of CRM Analytics' aim to provide flexible and customizable data visualization tools.

Training on these features is available through various Salesforce Trailhead modules that discuss dashboard and dataset customization techniques, providing practical insights and guided tutorials to enhance dashboard design and user interaction.

Both these explanations are consistent with best practices as outlined in Salesforce's CRM Analytics documentation and the Trailhead educational content, ensuring that users are well-equipped to leverage the full capabilities of CRM Analytics for effective data management and presentation.

NEW QUESTION # 88

Universal Containers' CRM Analytics team is building a dashboard with two widgets, and the queries use different datasets.

1. List widget associated to the query "Type_2" and grouped by the dimension "Type" (multi-selection)

2. Donut chart widget associated to the query "Query_pie_3" and grouped by the dimension "Type" The team wants any selection in the List widget to filter the Donut chart and vice versa. Users should be able to choose more than one Type (multi-selection).

What is the recommended way to accomplish the required filtering?

- A. Set up a result and selection based interaction for each query.
- B. Use "Connect Data Sources" to create a mapping of the two fields from the two datasets.
- C. Create a selection based Interaction and apply It to the query of "Query ple 3".

Answer: A

NEW QUESTION # 89

Universal Containers intends to use a custom Salesforce big object in its org and visualize the data using CRM Analytics. As the number of rows to be synced is quite large, the CRM Analytics consultant is looking to set up an incremental sync with additional filters added as part of the data sync to improve performance.

What should the consultant keep in mind while implementing this?

- **A. Incremental data sync Is NOT supported for big objects.**
- B. Custom big objects are NOT supported by CRM Analytics.
- C. Only SOSL queries can be used as data sync filters.

Answer: A

NEW QUESTION # 90

Universal Containers asks a CRM Analytics consultant to review the performance of its local data sync.

After removing unused objects and fields from connected data, what else should the consultant do to improve performance of the data sync?

- A. Contact Salesforce Support to increase sync speed.
- B. Enable fast sync in analytics settings.
- **C. Evaluate connection mode for each connected object.**

Answer: C

Explanation:

To improve the performance of local data sync in Universal Containers, evaluating the connection mode for each connected object is a practical approach. Here's the rationale:

* **Optimization of Resources:** Different connection modes (e.g., Full Sync, Incremental Sync) use different amounts of resources. Choosing the right mode for each object based on how frequently its data changes can optimize the sync process and reduce load times.

* **Efficient Data Handling:** By tailoring the connection mode to the needs of specific data objects, the overall efficiency of the data sync process is improved, leading to faster refresh rates and more timely data availability.

* **Cost and Performance Balance:** Evaluating and selecting the appropriate connection mode can also help balance performance needs with cost constraints, as some modes may consume more compute resources than others.

NEW QUESTION # 91

.....

Are you worried about insufficient time to prepare the exam? Do you have a scientific learning plan? Maybe you have set a series of to-do list, but it's hard to put into practice for there are always unexpected changes during the Analytics-Con-201 exam. Here we recommend our Analytics-Con-201 test prep to you. With innovative science and technology, our study materials have grown into a powerful and favorable product that brings great benefits to all customers. Under the support of our Analytics-Con-201 Study Materials, passing the Analytics-Con-201 exam won't be an unreachable mission.

Free Analytics-Con-201 Dumps: <https://www.newpassleader.com/Salesforce/Analytics-Con-201-exam-preparation-materials.html>

With the help of our exam materials, you don't need to attend other expensive training courses and just need to take 20-30 hours to grasp our Analytics-Con-201 exam questions and answers well, Unlike other products in this field, Analytics-Con-201 online test engine can be downloaded into three kinds, namely, the online version of App, PDF version, software version, Salesforce Analytics-Con-201 Reliable Exam Simulator How to distinguish it is valid or not is a difficult thing.

As you're typing your document, you may occasionally want to check Free Analytics-Con-201 Dumps whether you accidentally pressed Enter at the end of a line within a paragraph, or pressed Enter too many times between paragraphs.
