International Code Council M2 Reliable Exam Cost - New M2 Exam Objectives

The unmatched and the most workable study guides of ExamDiscuss are your real destination to achieve your goal. The pathway to pass M2 was not so easy and perfectly reliable as it has become now with the help of our products. Just you need to spend a few hours daily for two week and you can surely get the best insight of the syllabus and command over it. The M2 Questions and answers in the guide are meant to deliver you simplified and the most up to date information in as fewer words as possible.

International Code Council Commercial Mechanical Inspector Sample

Questions (Q24-Q29):

NEW QUESTION # 24

Indoor combustion air shall be provided within:

- A. 1 foot of the ceiling and 2 feet of the floor.
- B. 2 feet of the ceiling and 2 feet of the floor.
- C. 2 feet of the ceiling and 1 foot of the floor.
- **D. 1 foot of the ceiling and 1 foot of the floor.**

Answer: D

NEW QUESTION # 25

For the installation of listed fuel-burning appliances, the required clearances should be found:

- A. in the mechanical code.
- **B. on the nameplate of the appliance.**
- C. on the approved plans and specifications for the building.
- D. by using a calculation based on the Btu/h output rating of the appliance.

Answer: B

Explanation:

The IMC requires fuel-burning units to be marked with the hourly rating, approved fuel type, and required clearances. That means the appliance marking/nameplate is the direct source for the required clearance information for listed fuel-burning appliances. This is why B is the correct answer.

NEW QUESTION # 26

ERV systems shall not be installed in which of the following except:

- A. equipment designed to assist in the evacuation of occupants.
- **B. systems utilizing coil-type exchangers.**
- C. common exhaust systems for clothes dryers.
- D. exhaust systems emitting corrosive materials.

Answer: B

Explanation:

The IMC prohibits energy recovery ventilation systems in several applications, including hazardous exhaust systems, smoke control systems, commercial kitchen exhaust systems, and clothes dryer exhaust systems. Equipment intended to assist with occupant evacuation falls under smoke-control/life-safety type applications and is not an allowed ERV use. By contrast, systems utilizing coil-type exchangers are the exception among the listed choices because they are not one of the prohibited applications in this question. Therefore, Option A is correct.

NEW QUESTION # 27

The minimum rise required for a 10-foot run of vent connector is _____ inches.

- **A. 2-1/2**
- B. 1-1/2
- C. 0
- D. 1-1/4

Answer: A

Explanation:

Vent connectors must be installed with a minimum rise of 1/4 inch per foot. For a 10-foot run, the required rise is:
 $10 \times 1/4 \text{ inch} = 2.5 \text{ inches}$.

That equals 2-1/2 inches, so Option D is correct.

NEW QUESTION # 28

When testing dampers located in corridors, the dampers shall demonstrate acceptable closure performance when subjected to _____ fpm velocity across the face of the damper using the UL 555 fire exposure test.

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Corridor damper testing under the referenced standard requires acceptable closure performance at 150 fpm across the face of the damper. Therefore Option C is correct.

NEW QUESTION # 29

.....

So we are looking forward to establishing a win-win relation with you by our M2 training engine. In our trade with merchants of various countries, we always adhere to the principles of mutual benefits rather than focusing solely on our interests on the M2 Exam Questions.
