Mule-Dev-202 Exam Paper Pdf & Latest Mule-Dev-202 Exam Notes

The Salesforce Mule-Dev-202 exam questions are being updated on a regular basis. As you know the Mule-Dev-202 exam syllabus is being updated on a regular basis. To add all these changes in the Mule-Dev-202 exam dumps we have hired a team of exam experts. They regularly update the Salesforce Mule-Dev-202 Practice Questions as per the latest Salesforce Mule-Dev-202 exam syllabus. So you have the option to get free Mule-Dev-202 exam questions update for up to 1 year from the date of Salesforce Mule-Dev-202 PDF dumps purchase.

Salesforce Certified MuleSoft Hyperautomation Developer Sample Questions (Q31-Q36):

NEW QUESTION # 31

Northern Trail Outfitters (NTO) wants to automate a multi-step process that spans several departments. How do Interactive Steps in Flow Orchestration help NTO involve users at key steps of the process?

- A. They allow the user to interact with the process in between automated backend steps.
- B. They leverage AI processing to automatically interact with the customer and collect customer data.
- C. They enable users to collaborate on specific work items.
- D. They allow the user to interact directly with external systems through the Salesforce UI.

Answer: A

Explanation:

Interactive Steps in Flow Orchestration are designed to involve users at specific points within an automated process. Here's how they help NTO:

User Interaction:

Interactive Steps enable users to engage with the process during key stages. These steps are inserted between automated tasks to require human input or decision-making.

This ensures that critical user actions, such as approvals or data entry, are seamlessly integrated into the flow.

Process Continuity:

Once the user completes the required interaction, the process can automatically proceed to the next step. This creates a cohesive workflow that combines automated and manual tasks efficiently.

Use Case Examples:

Approving a document, entering additional information, or making decisions based on presented data are typical scenarios where Interactive Steps are beneficial.

NEW QUESTION # 32

AnyAirlines wants to create a new marketing campaign that sends customers special offers every month based on their accrued loyalty points. There is an existing integration for customer data using MuleSoft's API-led three-tier strategy. Loyalty information exists in an external system that can be accessed via an HTTP endpoint provided by the system, but has no current integration. The external ID used will be email address.

The desired output is a CSV file containing customers that includes only the top 10 percent of loyalty point holders.

What is the most efficient way to meet this requirement?

- A. 1. Create a Salesforce Flow that retrieves the Contact data.2. Create a Salesforce Flow that retrieves the Loyalty data.3. Create a Flow Orchestration that uses the two flows and outputs the result to a CSV file.
- B. 1. Have the MuleSoft team develop a new integration that includes a new System API to both the Customer and Loyalty systems.2. Create a Process API to output the final results.3. Create an Experience API for the business consumers to initiate the integration.
- C. 1. Have the MuleSoft team develop a new integration that includes a System API to the Loyalty system and uses the existing Customer System API.2. Create a Process API to output the final results.3. Create an Experience API for the business consumers to initiate the integration.
- D. 1. Create a MuleSoft Composer flow that utilizes the current Customer integration to select all customers.2. Create an additional MuleSoft Composer flow that retrieves all the Loyalty information.3. Create a MuleSoft Composer flow that combines the two previous results and outputs the top 10 percent to a CSV file.

Answer: C

Explanation:

Develop System API for Loyalty System:The first step is to develop a new System API that integrates with the Loyalty system. This API will handle communication with the external system via the provided HTTP endpoint.

Reference:MuleSoft API-led Connectivity

Utilize Existing Customer System API:Use the existing System API for customer data to retrieve necessary customer information.

Combining these APIs ensures a modular approach and reuse of existing assets.

Reference:API-led Connectivity

Create Process API:Develop a Process API that combines data from both the Customer and Loyalty System APIs. This API will process the data, apply business logic to filter the top 10 percent of loyalty point holders, and format the results.

Reference:Designing Process APIs

Create Experience API:Develop an Experience API to serve the business consumers. This API will provide a user-friendly interface for initiating the integration and retrieving the results as a CSV file.

Reference:API Experience Layer

NEW QUESTION # 33

Northern Trail Outfitters (NTO) uses Flow Orchestration to automate quote development. The "Review Quote" work item is performed by their team of technical writers but can be fulfilled by any technical writer on the team.

How can NTO ensure the "Review Quote" work item is assigned to the correct Salesforce user?

- A. Create a Group for the team of Salesforce Users and assign the work item to the group.
- B. Use MuleSoft RPA to review the document and submit it for approval if no issues are found.

- C. Create a user collection variable and assign the work item to the user collection.
- D. Use backend steps to automate work item assignment to the next available technical writer.

Answer: A

Explanation:

To ensure the "Review Quote" work item is assigned to the correct Salesforce user within the team of technical writers, the following approach can be used:

Creating a Group:

Create a Group in Salesforce that includes all the technical writers who are eligible to perform the "Review Quote" work item. This group acts as a collective resource pool.

Assigning the Work Item to the Group:

When the "Review Quote" work item is created in Flow Orchestration, assign it to the group rather than an individual user.

Salesforce will then allow any available technical writer within the group to pick up and complete the task.

Ensuring Flexibility and Availability:

This method ensures that the work item can be completed by any technical writer in the team, providing flexibility and improving the chances of timely completion by utilizing the group's collective availability.

NEW QUESTION # 34

Northern Trail Outfitters wants to run a bidirectional sync of data between two Salesforce orgs. They want to perform real-time updates between both systems so that if either system is updated, the other one is automatically updated with the new data.

What is the minimum number of MuleSoft Composer flows needed to meet this requirement?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

To achieve a bidirectional sync between two Salesforce orgs using MuleSoft Composer, you would need a minimum of two flows.

Flow 1: Sync from Org A to Org B: This flow monitors changes in Org A and updates Org B with the new data whenever a change occurs.

Flow 2: Sync from Org B to Org A: Similarly, this flow monitors changes in Org B and updates Org A with the new data whenever a change occurs.

This setup ensures that any change in either Salesforce org is reflected in the other, maintaining real-time synchronization between the two systems.

MuleSoft Composer for Salesforce

NEW QUESTION # 35

An RPA developer is building the implementation of an RPA process based on the BPMN created by a colleague. In the BPMN, they see the symbol below:

What does the symbol represent?

- A. A cleanup activity that is performed at the end of the process to ensure all running applications are closed
- B. One possible endpoint for the process
- **C. A point in the process where different activities are performed under different circumstances**
- D. An activity that is performed if an error occurs during processing

Answer: C

Explanation:

Symbol Meaning: The symbol shown is a diamond with an "X" inside, which represents an exclusive gateway in BPMN (Business Process Model and Notation). This gateway is used to control the flow of the process based on certain conditions or circumstances.

Reference:BPMN Gateway Types

Exclusive Gateway:An exclusive gateway routes the process flow into one of several paths based on conditions defined within the process model. Only one path is taken out of the gateway.

Reference:Exclusive Gateway Explanation

Usage in Process:When an exclusive gateway is encountered, the process evaluates the conditions on each outgoing sequence flow and chooses the path that meets the conditions. This ensures different activities are performed based on different circumstances.

Reference:BPMN Exclusive Gateway

NEW QUESTION # 36

.....

The Dumpkiller wants to become the first choice of Salesforce Mule-Dev-202 certification exam candidates. To achieve this objective the top-notch and real Salesforce Mule-Dev-202 exam questions are being offered in three easy-to-use and compatible formats. These Dumpkiller Mule-Dev-202 Exam Questions formats are PDF dumps files, desktop practice test software, and web-based practice test software.
