

# HPE7-J02 Latest Exam Guide Help You Pass Exam with High Pass Rate - Pass4SureQuiz

P.S. Free 2026 HP HPE7-J02 dumps are available on Google Drive shared by Pass4SureQuiz: <https://drive.google.com/open?id=1KmsOSNoD3YfX4UL6aZilzshfGdM0orZx>

Our HPE7-J02 real test was designed by many experts in different area, they have taken the different situation of customers into consideration and designed practical HPE7-J02 study materials for helping customers save time. Whether you are a student or an office worker, we believe you will not spend all your time on preparing for HPE7-J02 Exam, you are engaged in studying your specialized knowledge, doing housework, looking after children and so on. With our simplified information, you are able to study efficiently. And do you want to feel the true exam in advance? Just buy our HPE7-J02 exam questions!

Many students often feel that their own gains are not directly proportional to efforts in their process of learning. This is because they have not found the correct method of learning so that they often have low learning efficiency. If you have a similar situation, we suggest you try HPE7-J02 practice materials. HPE7-J02 test guide is compiled by experts of several industries tailored to HPE7-J02 exam to help students improve their learning efficiency and pass the exam in the shortest time. Experts conducted detailed analysis of important test sites according to the examination outline, and made appropriate omissions for unimportant test sites. At the same time, HPE7-J02 Exam Dump made a detailed description of all the incomprehensible knowledge points through examples, forms, etc., so that everyone can easily understand.

## Prepare Your HP HPE7-J02: Advanced HPE Storage Integrator Solutions Written Exam Exam with High-quality HPE7-J02 Valid Exam Sims Surely

Do some fresh things each day that moves you out of your comfort zone. If you stay cozy every day, you will gradually become lazy. Now, you have the opportunity to change your current conditions. Our HPE7-J02 real exam dumps are specially prepared for you. Try our HPE7-J02 study tool and absorb new knowledge. After a period of learning, you will find that you are making progress. The knowledge you have studied on our HPE7-J02 Exam Question will enrich your life and make you wise. Our HPE7-J02 real exam dumps are manufactured carefully, which could endure the test of practice. Stable and healthy development is our long lasting pursuit. In order to avoid fake products, we strongly advise you to purchase our HPE7-J02 exam question on our official website.

### HP HPE7-J02 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.</li> </ul>

## HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q18-Q23):

### NEW QUESTION # 18

Your customer wants to use their HPE Alletra Storage MP B10000 array to store persistent data for Kubernetes-based applications. After deploying the CSI driver using Helm and creating the secret with the command `kubectl create -f hpe-backed.yaml`, what is the next required step to enable the containerized applications to consume persistent volumes on the Alletra MP array?

- A. Create a PersistentVolume by using `kubectl create -f pv.yaml`
- B. Define a StorageClass by running `kubectl create -f storageclass.yaml`
- C. Create a PersistentVolumeClaim by using `kubectl create -f my-pvc.yaml`
- D. Update the Helm repository by using `helm repo update` to recognize the CSI driver

**Answer: B**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

After installing the HPE CSI driver and creating backend secrets, the next critical step is to define a StorageClass that references the backend driver and parameters. Without the StorageClass, Kubernetes cannot dynamically provision PersistentVolumes (PVs). Once the StorageClass is created, workloads can request storage using PersistentVolumeClaims (PVCs).

Distractors:

A: Helm repo update only refreshes Helm charts; it does not enable CSI provisioning.

B: A PVC requires a StorageClass to bind dynamically - it cannot be created successfully beforehand.

C: Manually creating PVs is possible, but not the HPE best practice with CSI, which relies on StorageClass for dynamic provisioning.

Key Concept: Kubernetes CSI workflow: Secret # StorageClass # PVC # Pod.

### NEW QUESTION # 19

Which statement is correct when deploying an HPE Zerto DR solution where an Extended Journal Copy is required with a one-year retention period?

- A. HPE Zerto integrates with HPE StoreOnce to enable long-term retention for Extended Journal Copies.
- B. An additional license is required to enable the Extended Journal Copy feature.
- C. Extended Journal Copies always come from the target site to avoid impact on the production site.
- D. HPE Zerto supports a maximum of 30-day retention and cannot exceed this period.

**Answer: A**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto Extended Journal allows retention up to one year by integrating with secondary storage like HPE StoreOnce. Short-term journals (seconds to days) reside on primary replication storage, while long-term copies (weeks/months/years) are offloaded to StoreOnce for cost-efficient retention.

Distractors:

A: No separate license is required - it is a standard Zerto feature when integrated.

C: Extended Journals can be sourced from production or target, depending on setup; not "always" target.

D: Incorrect - Zerto supports >30 days retention with Extended Journal.

Key Concept: Zerto + HPE StoreOnce for long-term DR retention.

Reference: HPE Zerto with StoreOnce White Paper.

### NEW QUESTION # 20

You are sizing an HPE Alletra Storage MP B10000 as shown in the graphic below.

What change must be made to the current storage configuration to achieve maximum IOPS performance?

- A. Additional disks need to be added to the system
- B. Additional network cards or HBAs need to be added for more throughput
- C. No change needed - the system is already operating at maximum performance
- D. The controller must be upgraded to a 32-core model

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

From the exhibit, the system shows maximum estimated IOPS performance (over 250K IOPS read, 115K IOPS mixed, 62K write). These values align with HPE's published performance specifications for this model with full cores enabled. The network interface count and disk count are balanced relative to controller capability. Therefore, no further upgrades are required to achieve maximum performance.

Distractors:

A: Adding NICs/HBAs may improve throughput but will not exceed controller-bound IOPS.

B: Adding disks increases capacity, not peak IOPS, as performance is primarily controller-driven.

D: The system already matches controller capability; upgrading cores is not an option in Alletra MP B10000 mid-range systems.

Key Concept: Understanding performance sizing based on controller and architecture limits, not just capacity or NICs.

Reference: HPE Alletra MP Performance and Sizing Guide.

### NEW QUESTION # 21

You are meeting with a customer who wants to replace their current file storage system. You plan to recommend HPE GreenLake for File Storage. The customer asks whether the solution can provide cross-protocol access to the same data using both NFS and SMB simultaneously.

What is the impact on your design?

- A. This is perfectly possible with HPE GreenLake for File Storage by creating two file shares (one for each protocol) and setting up replication
- B. Two different IP pools are required, one for each access protocol. The virtual IP pool address enables cross-protocol functionality
- **C. HPE GreenLake for File Storage supports native cross-protocol access with NFS, SMB, and S3. You must enable both protocols per share**
- D. A 3rd-party SDS solution such as Qumulo or Scality should be discussed since the HPE GreenLake for File Storage does not support this

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for File Storage, powered by VAST Data software, natively supports cross-protocol access (NFS, SMB, and S3) to the same dataset. This means a file written via NFS can be accessed via SMB or S3 without replication. For cross-protocol access, both protocols must be enabled at the share/bucket level.

This is a core differentiator of HPE's GreenLake for File Storage solution.

Distractors:

A: Wrong because GreenLake for File Storage already has native multi-protocol support - no need for 3rd party SDS.

C: Incorrect, as replication between separate shares is not required; it is a native capability.

D: Misleading - IP pools are used for load balancing and client connectivity, but not required to enable cross-protocol access.

Key Concept: Multi-protocol access in HPE GreenLake for File Storage (NFS/SMB/S3).

Reference: HPE GreenLake for File Storage Technical Overview, VAST Data Universal Storage white papers

## NEW QUESTION # 22

A mid-sized enterprise needs a file storage solution that offers scalable storage and integrated data protection, backup, and disaster recovery.

Which solution best meets the company's needs?

- **A. HPE GreenLake for File Storage**
- B. Cohesity
- C. Scality
- D. Qumulo

**Answer: A**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for File Storage (powered by VAST Data) delivers scale-out NAS capabilities with native data protection, snapshots, and disaster recovery integration. It is designed for enterprises that need both scalability and integrated protection in a single consumption or CapEx model.

Distractors:

A (Qumulo): Excellent scale-out file, but lacks deep HPE ecosystem integration.

B (Scality): Primarily focused on object storage, not file workloads.

D (Cohesity): Strong in backup and secondary storage, but not primary enterprise file services.

Key Concept: HPE GreenLake for File Storage = enterprise-grade file storage + integrated protection.

Reference: HPE GreenLake for File Storage Overview.

## NEW QUESTION # 23

.....
