## Choosing Valid Braindumps 1Z1-947 Pdf - Say Goodbye to Oracle GoldenGate 19c Implementation Professional

Exam candidates grow as the coming of the exam. Most of them have little ideas about how to deal with it. Or think of it as a time-consuming, tiring and challenging task to cope with 1Z1-947 exam questions. So this challenge terrifies many people. Perplexed by the issue right now like others? Actually, your anxiety is natural, to ease your natural fear of the 1Z1-947 Exam, we provide you our 1Z1-947 study materials an opportunity to integrate your knowledge and skills to fix this problem.

## Oracle GoldenGate 19c Implementation Professional Sample Questions (Q85-Q90):

### NEW QUESTION # 85

Which transactions are captured if you ADD EXTRACT with BEGIN NOW at 1:00 PM, but START EXTRACT at 2:00 PM?

- A. Only transactions that started before 1:00 PM and committed after 1:00 PM
- **B. Transactions that started at or after 1:00 PM**
- C. Transactions that started before 1:00 PM and committed after 2:00 PM
- D. Only transactions that started at or after 2:00 PM

**Answer: B**

Explanation:

When you run ADD EXTRACT ... BEGIN NOW at 1:00 PM, GoldenGate records the current CSN/SCN as the starting point. So even if you start the Extract later (e.g., at 2:00 PM), it will capture transactions that started at or after 1:00 PM, ensuring no changes

are missed from the defined start point.

#### NEW QUESTION # 86

Which parameter is typically used with data pumps unless transformation is needed?

- A. Map
- B. TrailFile
- C. ASSUMETARGETDEFS
- **D. PASSTHRU**

**Answer: D**

Explanation:

PASSTHRU (used unless transformation or exit processing is needed)

#### NEW QUESTION # 87

The Integrated Replicat reads the trail, constructs logical change records that represent source DML or DDL transactions, and transmits these records to an inbound server in the Oracle target database. What statement is true about Integrated Replicat?

- A. Source must be configured as Integrated Extract.
- B. Both source and target can be Oracle and non-Oracle databases.
- C. Integrated Replicat does not need a checkpoint or a trace table for its operations.
- **D. Trail files contain data that must be in logical change records format.**

**Answer: D**

Explanation:

Integrated Replicat processes Logical Change Records (LCRs). These LCRs are read from trail files and passed to the Inbound Server. It supports parallel apply and uses Oracle Streams APIs internally.

#### NEW QUESTION # 88

You need to manually patch Oracle GoldenGate source and targets. How should you proceed?

- A. Stop access to the source and target databases. Allow Extract to finish capturing the transaction data that remains in the transaction log and stop Extract. Start applying the patch on the source. Wait until the data pump (if used) and Replicat are finished processing the data in their respective trails. Stop the data pump and Replicat. Apply the patch on the target. Start the Oracle GoldenGate processes whenever you are ready to begin capturing user activity again.
- B. Stop access to the source database. Allow Extract to finish capturing the transaction data that remains in the transaction log and stop Extract. Start applying the patch on the source and on the target. Start the Oracle GoldenGate processes whenever you are ready to begin capturing user activity again.
- **C. Stop access to the source. Allow Extract to finish capturing the transaction data that remains in the transaction log and stop Extract. Start applying the patch on the source. Wait until the data pump/Replicat are finished processing the data in their respective trails. Stop the data pump/Replicat. Apply the patch on the target. If the patches changed table defs, run DEFGEN for the source tables to generate updated source defs, and then replace the old defs with the new ones in the existing source defs file on the target. Start GG processes when ready to begin capturing activity again.**
- D. Stop access to the source and target databases. Start applying the patch on the source. Stop the data pump and Replicat. Apply the patch on the target. Start the Oracle GoldenGate processes whenever you are ready to begin capturing user activity again.

**Answer: C**

Explanation:

This is the only option that:

- \* Waits for Extract to finish capturing remaining redo/transaction log data ☐
- \* Waits for Data Pump and Replicat to reach EOF ☐
- \* Properly stops components in sequence ☐
- \* Accounts for definition file updates (DEFGEN) if metadata changes ☐

### NEW QUESTION # 89

User \_\_\_\_\_ are a set of variables.

- A. Exits
- B. Macros
- C. Procedures
- **D. Tokens**

**Answer: D**

Explanation:

Tokens are variable sets used in parameter files.

### NEW QUESTION # 90

.....

You are so busy that you have to save your time on the exam. Using our 1Z1-947 study torrent, you will find you can learn about the knowledge of your 1Z1-947 exam in a short time. Because you just need to spend twenty to thirty hours on the 1Z1-947 practice exams, our 1Z1-947 Study Materials will help you learn about all knowledge, you will successfully pass the 1Z1-947 exam and get your certificate. So if you think time is very important for you, please try to use our 1Z1-947 study materials, it will help you save your time.
