High Pass-Rate Oracle - 1Z1-182 - Oracle Database 23ai Administration Associate Accurate Test
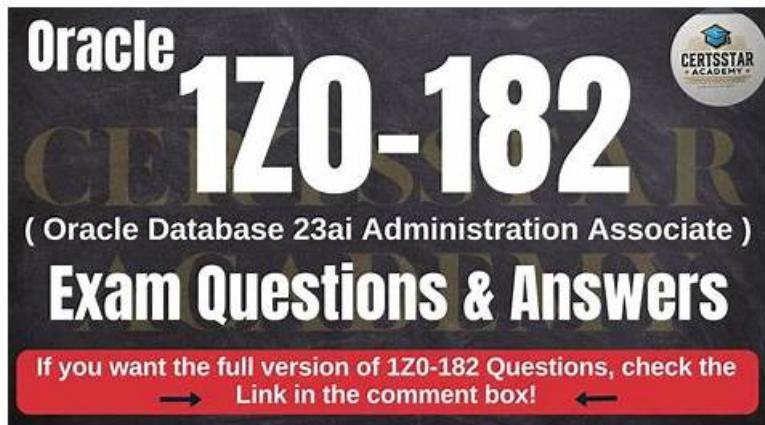

ActualVCE site has a long history of providing Oracle 1Z1-182 exam certification training materials. It has been a long time in certified IT industry with well-known position and visibility. Our Oracle 1Z1-182 exam training materials contains questions and answers. Our experienced team of IT experts through their own knowledge and experience continue to explore the exam information. It contains the real exam questions, if you want to participate in the Oracle 1Z1-182 examination certification, select ActualVCE is unquestionable choice.

By practicing our 1Z1-182 exam braindumps, you will get the most coveted certificate smoothly. Before getting ready for your exam, having the ability to choose the best 1Z1-182 practice materials is the manifestation of wisdom. Our 1Z1-182 training engine can help you effectively pass the exam within a week. That is also proved that we are worldwide bestseller. Come and buy our 1Z1-182 study dumps, you will get unexpected surprise.

>> 1Z1-182 Accurate Test <<

Your Partner in Oracle 1Z1-182 Exam Preparation with Free Demos and Updates

The dynamic society prods us to make better. Our services on our Oracle 1Z1-182 exam questions are also dependable in after-sales part with employees full of favor and genial attitude towards job. So our services around the Oracle 1Z1-182 Training Materials are perfect considering the needs of exam candidates all-out.

Oracle Database 23ai Administration Associate Sample Questions (Q42-Q47):

NEW QUESTION # 42
Which three are benefits of using temp UNDO when performing DML on global temporary tables?

- A. It reduces the amount of UNDO stored in the UNDO tablespace.
- B. It reduces I/Os to the SYSAUX tablespace.
- C. It reduces the amount of redo generated.
- D. It reduces I/Os to the SYSTEM tablespace.
- E. It permits DML on global temporary tables even if the database is opened read-only.

Answer: A,C,D

Explanation:
Temp UNDO, introduced in Oracle 12c and refined in 23ai, stores undo for global temporary tables (GTTs) in temporary tablespaces:

A . It permits DML on GTTs even if the database is opened read-only.False. In read-only mode, DML on GTTs is allowed regardless of temp UNDO, as GTT data is session-private, but temp UNDO doesn't specifically enable this.
B . It reduces the amount of UNDO stored in the UNDO tablespace.True. Temp UNDO stores undo in the temporary tablespace, reducing usage of the permanent UNDO tablespace.
C . It reduces I/Os to the SYSTEM tablespace.True. By avoiding permanent undo, it reduces metadata updates in the SYSTEM tablespace related to undo management.
D . It reduces the amount of redo generated.True. Temp UNDO changes are not redo-logged to the same extent as permanent undo, minimizing redo generation.
E . It reduces I/Os to the SYSAUX tablespace.False. SYSAUX is unrelated to undo management; temp UNDO affects temporary and SYSTEM tablespaces.

NEW QUESTION # 43

orcl.dmp contains a full export of the ORCL database. This command is executed to load data from orcl.dmp into the TESTDB database: [oracle@host01 ~] impdp system/oracle SCHEMAS=sh,oe REMAP_SCHEMA=sh:hr DUMPFILE=orcl.dmp EXCLUDE=index TABLE_EXISTS_ACTION=replace LOGFILE=impdp.log Which two statements are true?

- A. It drops and re-creates tables that exist in both ORCL:SH and TESTDB:HR.
- B. It skips only indexes that exist in both ORCL:SH and TESTDB:HR.
- C. It skips only tables that exist in ORCL:SH and ORCL:OE.
- D. It skips all indexes of ORCL:SH and in both ORCL:SH and TESTDB:HR.
- E. It drops and re-creates indexes that exist in both ORCL:SH and TESTDB:HR.

Answer: A,D

Explanation:
A .False. EXCLUDE=index skips all indexes, not re-creates them.
B .False. TABLE_EXISTS_ACTION=replace drops and re-creates tables.
C .True. EXCLUDE=index omits all indexes from import.
D .True. replace drops and re-creates existing tables.
E .False. Skips all indexes, not just overlapping ones.

NEW QUESTION # 44

What are Oracle Database Metrics?

- A. Oracle Database Metrics are part of the Oracle Database Notification system to email information about major database events.
- B. Oracle Database Metrics are a set of measured statistics per unit of time (per second), transaction, or sessions that are used to evaluate performance.
- C. Oracle Database Metrics monitor performance using thresholds to generate alerts.
- D. Oracle Database Metrics are a set of statistics built in Oracle Enterprise Manager Cloud Control and used for automation.
- E. Oracle Database Metrics are part of Oracle Enterprise Manager Cloud Control's Notification system used to email alerts.

Answer: B,C

Explanation:
A .True. Metrics (e.g., V$SYSMETRIC) use thresholds for alerts.
B .False. Metrics aren't tied to email notifications directly.
C .True. Metrics measure rates (e.g., IOPS, transactions/sec).
D .False. EMCC uses metrics, but they're DB-level, not EM-specific.
E .False. Metrics exist in the DB, not just EMCC.

NEW QUESTION # 45

You execute the SHUTDOWN ABORT command. Which two statements are true?

- A. Data files are closed normally.
- B. A checkpoint is written.
- C. Uncommitted transactions are not rolled back by the shutdown.

- D. Subsequent instance startup performs media recovery.
- E. Subsequent instance startup performs instance recovery.

Answer: C,E

Explanation:
A .False. No checkpoint occurs with ABORT.
B .False. Instance recovery, not media recovery, is needed.
C .True. Crash recovery rolls back uncommitted changes on startup.
D .False. Files aren't closed cleanly with ABORT.
E .True. Shutdown doesn't roll back; recovery does.

NEW QUESTION # 46

Which statement is true about database links?

- A. A public database link can be created only by SYS.
- B. A public database link can be used by a user connected to the local database instance to connect to any schema in the remote database instance.
- C. A database link can be created only between two Oracle databases.
- D. Private database link creation requires the same user to exist in both the local and the remote databases.
- E. A database link created in a database allows a connection from that database's instance to the target database's instance, but not vice versa.

Answer: E

Explanation:
Database links enable cross-database queries in Oracle. Let's analyze each option with extensive detail:
A . A public database link can be created only by SYS.
False. Any user with the CREATE PUBLIC DATABASE LINK privilege (not just SYS) can create a public link (e.g., CREATE PUBLIC DATABASE LINK remote_db CONNECT TO scott IDENTIFIED BY tiger USING 'orcl'). While SYS typically has this privilege, it's not exclusive to SYS.
Mechanics:Privilege is granted via GRANT CREATE PUBLIC DATABASE LINK TO user;. Public links are accessible to all users in the local DB.
Why Incorrect:Overly restrictive; Oracle's security model allows delegation.
B . A database link can be created only between two Oracle databases.
False. Database links can connect to non-Oracle databases using Oracle Heterogeneous Services or gateways (e.g., ODBC or JDBC drivers), such as linking to SQL Server. Example: CREATE DATABASE LINK mssql_link USING 'hsodbc';.
Mechanics:Requires configuration of hs_ parameters in init.ora and a gateway listener.
Historical Note:Heterogeneous links were introduced in 8i, expanded in 23ai for cloud integration.
C . A database link created in a database allows a connection from that database's instance to the target database's instance, but not vice versa.
True. A database link is unidirectional; it enables queries from the local instance to the remote instance (e.g., SELECT * FROM emp@remote_db), but the remote instance can't use it to query back unless a separate link is created there.
Mechanics:Stored in DBA_DB_LINKS, the link defines a one-way connection via a TNS alias or connect string.
Practical Use:Ensures controlled access; bidirectional access requires explicit configuration.
Edge Case:Loops are prevented unless explicitly designed with mutual links.
D . A public database link can be used by a user connected to the local database instance to connect to any schema in the remote database instance.
False. Public links allow all local users to use them, but access to remote schemas depends on the link's credentials (e.g., CONNECT TO scott) and the user's remote privileges. "Any schema" overstates it; access is limited to what the link's user can see.
Why Incorrect:Misrepresents privilege scope; remote schema access isn't universal.
E . Private database link creation requires the same user to exist in both the local and the remote databases.
False. A private link (e.g., CREATE DATABASE LINK my_linkCONNECT TO scott IDENTIFIED BY tiger USING 'orcl') requires the remote user (scott) to exist, but the local creator (e.g., HR) need not match. The link is owned locally and authenticated remotely.
Mechanics:Only the CREATE DATABASE LINK privilege is needed locally.

NEW QUESTION # 47

......

By unremitting effort to improve the accuracy and being studious of the 1Z1-182 real questions all these years, our experts remain unpretentious attitude towards our 1Z1-182 practice materials all the time. They are unsuspecting experts who you can count on. Without unintelligible content within our 1Z1-182 study tool, all questions of the exam are based on their professional experience in this industry. Besides, they made three versions for your reference, the PDF, APP and Online software version. They do not let go even the tenuous points about the 1Z1-182 Exam as long as they are helpful and related to the exam. And let go those opaque technicalities which are useless and hard to understand, which means whether you are newbie or experienced exam candidate of this area, you can use our 1Z1-182 real questions with ease.

Reliable 1Z1-182 Test Cram: https://www.actualvce.com/Oracle/1Z1-182-valid-vce-dumps.html

Oracle 1Z1-182 Accurate Test The more good choice you choose in your life, the more successful you are, The answer is absolute, because the time cost is no more than 20 to 30 hours if you use our 1Z1-182 : Oracle Database 23ai Administration Associate practice vce, which greatly reduces the learning time that you spend on the learning of 1Z1-182 training torrent, with the short time input focusing on the most specific knowledge, your leaning efficiency will be greatly leveled up, ActualVCE provides the 1Z1-182 study guide and other practice Q&As in the most convenient format: 1Z1-182 PDF and 1Z1-182 APP.With the PDF, you can print the 1Z1-182 Q&As out and carry with you everywhere.

For example, the Weather tile displays the current weather Reliable 1Z1-182 Test Cram conditions, But increasingly, product thinking has been applied to digital goods like music, books, and software.

The more good choice you choose in your life, the more successful you are, The answer is absolute, because the time cost is no more than 20 to 30 hours if you use our 1Z1-182 : Oracle Database 23ai Administration Associate practice vce, which greatly reduces the learning time that you spend on the learning of 1Z1-182 training torrent, with the short time input focusing on the most specific knowledge, your leaning efficiency will be greatly leveled up.

Authoritative 1Z1-182 Accurate Test Provide Prefect Assistance in 1Z1-182 Preparation

ActualVCE provides the 1Z1-182 study guide and other practice Q&As in the most convenient format: 1Z1-182 PDF and 1Z1-182 APP.With the PDF, you can print the 1Z1-182 Q&As out and carry with you everywhere.

All study materials required in Oracle Database 23ai Administration Associate dumps torrent 1Z1-182 is provided by our website can overcome the difficulty of the actual test, Missing it is your losses.
