Downloadable Palo Alto Networks XSOAR-Engineer PDF - XSOAR-Engineer Clearer Explanation

Under the leadership of a professional team, we have created the most efficient learning XSOAR-Engineer training guide for our users. Our users use their achievements to prove that we can get the most practical knowledge in the shortest time. XSOAR-Engineer exam questions are tested by many users and you can rest assured. If you want to spend the least time to achieve your goals, XSOAR-Engineer Learning Materials are definitely your best choice. You can really try it we will never let you down!

Palo Alto Networks XSOAR Engineer Sample Questions (Q100-Q105):

NEW QUESTION # 100
Which content type cannot be managed using remote repositories?

- A. Jobs
- B. Exclusion List
- C. Pre-processing rules
- D. Lists

Answer: D

NEW QUESTION # 101

In a Dev/Prod deployment model, what is available only in the development tenant?.

- A. "Export all custom content" feature.
- B. Marketplace.
- C. Custom integration instances.
- D. Content Repository page.

Answer: A

Explanation:

In Cortex XSOAR's documented Dev/Prod deployment model, the development tenant is designed to be the workspace where engineers create, modify, test, and validate content before promoting it into production. As part of this workflow, the development tenant includes the "Export all custom content" feature, which generates a structured content bundle containing custom playbooks, integrations, fields, layouts, lists, and other artifacts. This bundle is then imported into the production tenant to ensure controlled, versioned, and tested promotion of content.

The Admin Guide highlights that this export capability is restricted to the development environment to preserve the integrity and stability of the production tenant. Production systems are intentionally limited, allowing only the import (not export) of custom content to prevent accidental overwriting, drift, or unintended modifications.

Marketplace access (A) exists in both tenants. Custom integration instances (C) can be created in either tenant. The Content Repository page (B) is also available across both environments.

Therefore, the only feature exclusive to the development tenant is D: "Export all custom content." This ensures a safe, repeatable Dev#Prod promotion model aligned with enterprise change-control requirements.

NEW QUESTION # 102

Inside the Incidents table view, which actions can be performed on the selected incidents? (Choose two.)

- A. Assign, Edit, and Mark as Duplicate for all selected incidents regardless of their status
- B. Export incidents as JSON and change incident status
- C. Run Command, Export, and Close and Delete for all selected incidents regardless of their status
- D. Run Command for all selected incidents having Active status

Answer: A,C

NEW QUESTION # 103

You need to retrieve a list of all malicious hashes over the last 30 days. What is the correct query to use?

- A. type:File verdict:Malicious sourcetimestamp:<="30 days ago"
- B. type:File reputation:Malicious sourcetimestamp:="30 days ago"
- C. type:File verdict:Malicious sourcetimestamp:>="30 days ago"
- D. type:File reputation:Malicious sourcetimestamp:"30 days ago"

Answer: D

NEW QUESTION # 104

When is the post-processing script executed in XSOAR?

- A. Just after the pre-processing is executed
- B. Just after the Close Incident button is clicked
- C. Just after the playbook is executed
- D. Just after the incident is created

Answer: C
