## Google Associate-Google-Workspace-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Managing Objects: This section of the exam measures the skills of Google Workspace Administrators and covers the management of user accounts, shared drives, calendars, and groups within an organization. It assesses the ability to handle account lifecycles through provisioning and deprovisioning processes, transferring ownership, managing roles, and applying security measures when access needs to be revoked. Candidates must understand how to configure Google Cloud Directory Sync (GCDS) for synchronizing user data, perform audits, and interpret logs. Additionally, it tests knowledge of managing Google Drive permissions, lifecycle management of shared drives, and implementing security best practices. The section also focuses on configuring and troubleshooting Google Calendar and Groups for Business, ensuring proper access control, resource management, and the automation of group-related tasks using APIs and Apps Script.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Data Access and Authentication:</b> This section of the exam evaluates the capabilities of Security Administrators and focuses on configuring policies that secure organizational data across devices and applications. It includes setting up Chrome and Windows device management, implementing context-aware access, and enabling endpoint verification. The section assesses the ability to configure Gmail Data Loss Prevention (DLP) and Access Control Lists (ACLs) to prevent data leaks and enforce governance policies. Candidates must demonstrate an understanding of configuring secure collaboration settings on Drive, managing client-side encryption, and restricting external sharing. It also covers managing third-party applications by controlling permissions, approving Marketplace add-ons, and deploying apps securely within organizational units. Lastly, this section measures the ability to configure user authentication methods, such as two-step verification, SSO integration, and session controls, ensuring alignment with corporate security standards and compliance requirements.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Supporting Business Initiatives:</b> This section of the exam measures the skills of Enterprise Data Managers and covers the use of Google Workspace tools to support legal, reporting, and data management initiatives. It assesses the ability to configure Google Vault for retention rules, legal holds, and audits, ensuring compliance with legal and organizational data policies. The section also involves generating and interpreting user adoption and usage reports, analyzing alerts, monitoring service outages, and using BigQuery to derive actionable insights from activity logs. Furthermore, candidates are evaluated on their proficiency in supporting data import and export tasks, including onboarding and offboarding processes, migrating Gmail data, and exporting Google Workspace content to other platforms.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Configuring Services:</b> This section of the exam evaluates the expertise of IT Systems Engineers and emphasizes configuring Google Workspace services according to corporate policies. It involves assigning permissions, setting up organizational units (OUs), managing application and security settings, and delegating Identity and Access Management (IAM) roles. The section also covers creating data compliance rules, applying Drive labels for data organization, and setting up feature releases such as Rapid or Scheduled Release. Candidates must demonstrate knowledge of security configurations for Google Cloud Marketplace applications and implement content compliance and security integration protocols. Furthermore, it includes configuring Gmail settings such as routing, spam control, email delegation, and archiving to ensure communication security and policy alignment across the organization.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Troubleshooting:</b> This section of the exam measures the skills of Technical Support Specialists and focuses on identifying, diagnosing, and resolving issues within Google Workspace services. It tests the ability to troubleshoot mail delivery problems, interpret message headers, analyze audit logs, and determine root causes of communication failures. Candidates are expected to collect relevant logs and documentation for support escalation and identify known issues. The section also evaluates knowledge in detecting and mitigating basic email attacks such as phishing, spam, or spoofing, using Gmail security settings and compliance tools. Additionally, it assesses troubleshooting skills for Google Workspace access, performance, and authentication issues across different devices and applications, including Google Meet and Jamboard, while maintaining service continuity and network reliability.</li> </ul>

## **Associate-Google-Workspace-Administrator Practice Exams Free | Associate-Google-Workspace-Administrator New Practice Questions**

Dear customers, if you are prepared to take the exam with the help of excellent Associate-Google-Workspace-Administrator learning materials on our website, the choice is made brilliant. Our Associate-Google-Workspace-Administrator training materials are your excellent choices, especially helpful for those who want to pass the exam without bountiful time and eager to get through it successfully. Let us take a try of our amazing Associate-Google-Workspace-Administrator Exam Questions and know the advantages first!

### **Google Associate Google Workspace Administrator Sample Questions (Q32-Q37):**

**NEW QUESTION # 32**

External sharing at your company is only permitted for the sales and marketing department.

Engineering is not allowed to share externally. You need to configure the sharing settings to comply with this policy. What should you do?

- A. Create organizational units (OUs) for each department. Configure different external sharing settings for each OU.
- B. Create separate shared drives for each department with different external sharing settings.
- C. Use a data loss prevention (DLP) solution to control external sharing based on user groups.
- D. Configure Drive trust rules to restrict the engineering department from sharing externally.

**Answer: A**

Explanation:

By creating separate organizational units (OUs) for each department, you can apply different external sharing settings based on the department's requirements. For example, you can configure the sales and marketing department's OU to allow external sharing, while configuring the engineering department's OU to restrict external sharing. This approach allows you to enforce departmental policies efficiently without impacting other departments.

### NEW QUESTION # 33

You are migrating your organization's email to Google Workspace. Your organization uses the terramearth.com email domain. You need to configure Google Workspace to receive emails sent to terramearth.com. What should you do?

- A. Configure an email address in Google Workspace to capture emails sent to unverified domains, including terramearth.com.
- B. Establish a Transport Layer Security (TLS) connection between your company's existing mail servers and Google's mail servers.
- C. Add terramearth.com as a primary, secondary, or alias domain in Google Workspace. Update the Mail Exchange (MX) records with your domain registrar to direct mail flow to Google's mail servers.
- D. Create a domain alias for terramearth.com in Google Workspace. Configure email forwarding to redirect emails to the new Google Workspace accounts.

**Answer: C**

Explanation:

To receive emails for your domain (terramearth.com) in Google Workspace, you need to add the domain to Google Workspace as either a primary, secondary, or alias domain, depending on your organization's requirements. After adding the domain, you must update the Mail Exchange (MX) records at your domain registrar to point to Google's mail servers. This step is essential to ensure that emails are correctly routed to Google Workspace.

### NEW QUESTION # 34

Your organization has enabled Google Groups for Business to let employees create and manage their own email distribution lists and web forums. You need to ensure that users cannot join external Google Groups with their Google Workspace accounts without interrupting internal group usage.

What should you do?

- A. In Additional Google Services, turn Google Groups OFF at the root organizational unit.
- B. Use the Directory API to change the settings of user-created groups to disable features that allow external users to access, view, or post on groups.
- C. Set the setting for Google Groups for Business called Accessing groups from outside this organization to Private.
- D. Set the setting for Google Groups for Business called Default for permission to view conversations to All organization users.

**Answer: C**

Explanation:

By setting the Accessing groups from outside this organization to Private, you prevent users from joining external Google Groups while still allowing internal users to use Google Groups within the organization. This setting ensures that only members of your organization can join and interact with internal groups, effectively stopping external access without affecting internal group usage.

### NEW QUESTION # 35

Today your company signed up for Google Workspace Business Starter with an existing domain name. You want to add team members and manage their access to email and other services. However, you are unable to create new user accounts or change user settings. You need to fix this problem. What should you do?

- A. Wait 24 hours after signing up for the features to become active.
- B. Upgrade to a Google Workspace Enterprise edition.
- C. Run the Transfer tool to bring unmanaged users to your Workspace account.
- **D. Check domain ownership in the DNS settings.**

**Answer: D**

Explanation:

To manage users and settings in Google Workspace, you must verify domain ownership. If the domain is not verified, you won't be able to create new user accounts or modify user settings.

Checking the DNS settings and completing the domain verification process will resolve the issue and allow you to manage users and services in Google Workspace.

### NEW QUESTION # 36

An employee is leaving your company and has numerous files stored in My Drive. Their manager wants to retain access to these files. You need to offboard the departing employee's Google Workspace account while ensuring that the manager can still access the files while following Google-recommended practices. What should you do?

- A. Download the departing employee's Drive data by using Google Takeout. Upload the data to the manager's Drive before deleting the departing employee's Google Workspace account.
- B. Use Google Vault to establish a retention policy for the organizational unit (OU) of the departing employee. Assign the Google Archived User license.
- C. Instruct the departing employee to share their My Drive folder with the manager before leaving. Delete the Google Workspace account on the departing employee's last day.
- **D. Transfer ownership of the departing employee's files to the manager during the user deletion process.**

**Answer: D**

Explanation:

Transferring ownership of the departing employee's files to the manager ensures that the manager retains access to all the files, including those stored in My Drive, without requiring additional steps like downloading or sharing files. This method follows Google-recommended practices and ensures that the files remain under proper management even after the employee's account is deleted. This process can be done efficiently during the offboarding process to ensure continuity of access.

### NEW QUESTION # 37

.....

Our services before, during and after the clients use our Associate-Google-Workspace-Administrator certification material are considerate. Before the purchase, the clients can download and try out our Associate-Google-Workspace-Administrator learning file freely.
