Reliable Study HP HPE6-A86 Questions - Online HPE6-A86 Training Materials

We EduDump are built in years of 2010. Recent years we are offering reliable certification HPE6-A86 exam torrent materials and gain new & old customers' praise based on our high pass rate. We put much emphasis on our HPE6-A86 exam questions quality and we are trying to provide the best after-sale customer service on HPE6-A86 training guide for buyers. If you are looking for professional & high-quality HPE6-A86 preparation materials, you can trust us and choose our HPE6-A86 study materials. Our HPE6-A86 exam guide is able to help you clear exams at the first attempt.

HPE Network Switching Associate Exam Sample Questions (Q77-Q82):

NEW QUESTION # 77

A Junior Network Engineer is tasked with the initial setup of a new HPE Aruba Networking CX 6100 switch. The switch needs to be configured with a hostname, a secure local administrator password, and a management IP address so it can be accessed on the network.

Initial State:

- * The switch is in its factory default state.
- * The engineer is connected to the switch via the console port.

Required Configuration:

- * Hostname: `ALS-01`
- * Admin Password: `Aruba!CX!2023`
- * Management Interface: `vlan 1`
- * Management IP Address: `192.168.5.10/24`

Which of the following configuration sets correctly implements all the specified initial settings?

- A. `switch# configure terminal`
`switch(config)# hostname ALS-01`
`ALS-01(config)# password administrator`
`Enter password: Aruba!CX!2023`
`Retype password: Aruba!CX!2023`
`ALS-01(config)# interface vlan 1`
`ALS-01(config-if-vlan)# ip address 192.168.5.10/24`
- B. `switch# configure`
`switch(config)# hostname ALS-01`
`ALS-01(config)# password administrator`
`Enter password: Aruba!CX!2023`
`Retype password: Aruba!CX!2023`
`ALS-01(config)# interface default`
`ALS-01(config-if)# ip address 192.168.5.10 255.255.255.0`
- C. `switch(config)# set hostname ALS-01`
`switch(config)# password administrator Aruba!CX!2023`
`switch(config)# vlan 1 ip address 192.168.5.10/24`
- D. `switch# configure terminal`
`switch(config)# hostname ALS-01`
`ALS-01(config)# password administrator plaintext Aruba!CX!2023`
`ALS-01(config)# interface vlan 1`
`ALS-01(config-if-vlan)# ip address 192.168.5.10/24`

Answer: A

NEW QUESTION # 78

A customer requires a network upgrade to replace their existing core switches. The new solution must support 100G speeds to the aggregation layer, with the ability to scale to a 12U chassis.

Which HPE Aruba Networking CX switch model would you initially propose?

- A. CX 9300
- B. CX 10000
- C. CX8325
- D. CX 6400

Answer: B

Explanation:

The CX 10000 series is a high-end modular core platform designed for large deployments with support for 100 Gbps interfaces and scalability up to a 12-rack-unit chassis, making it suitable as a replacement core that can grow with aggregation requirements.

NEW QUESTION # 79

Which firewall port needs to be opened between your HPE Aruba Networking CX switches and the Network Monitoring System

to send monitoring alerts using SNMP?

- A. TCP 1156
- **B. UDP 162**
- C. TCP 161
- D. UDP 1157

Answer: B

Explanation:

The correct answer is D. UDP 162. SNMP monitoring commonly uses two different UDP ports depending on direction and purpose. SNMP polling requests and responses use UDP 161, while SNMP traps and notifications are sent to a monitoring or management station on UDP 162. The question specifically asks about sending monitoring alerts using SNMP, which refers to SNMP traps or notifications from the switch to the Network Monitoring System. HPE Aruba Networking AOS-CX SNMP documentation states that the `snmp-server host` command configures a trap or inform receiver to which the SNMP agent sends SNMP traps or informs. The same documentation identifies the UDP port parameter for notifications and lists the default as 162. Therefore, the required firewall allowance for SNMP alert notifications from CX switches to the NMS is UDP 162. Option A is incorrect because TCP 161 is not the standard SNMP polling transport. Option B and option C use incorrect ports and protocols for SNMP alert delivery.

NEW QUESTION # 80

What is modulated to transmit data over a multi-mode cable?

- A. Pressure
- B. Voltage
- C. Radio
- **D. Light**

Answer: D

Explanation:

The correct answer is B. Light. Multi-mode cable refers to multi-mode fiber-optic cabling. In fiber-optic transmission, data is carried using light through the fiber core. HPE Aruba Networking's transceiver documentation explains that multimode fibers have thicker fiber cores and can transport light in multiple modes. The same HPE Aruba Networking transceiver guidance discusses optical transceivers transmitting light pulses and managing light loss across fiber-optic cabling. Therefore, in the context of multi-mode fiber, the signal being modulated to represent data is light. Option A is incorrect because radio is used in wireless transmission, not fiber-optic cabling. Option C is incorrect because voltage is associated with electrical copper cabling, such as twisted-pair Ethernet, rather than optical fiber. Option D is incorrect because pressure is not used as the signaling method for standard Ethernet fiber links. This question is focused on Layer 1 media behavior, and multi-mode fiber is a Physical Layer medium that transports optical signals between network transceivers.

NEW QUESTION # 81

A security auditor asks whether you use any insecure management protocols to configure your CX-6200 switches from their factory default state. What can you tell them?

- A. No, Telnet and HTTPS are enabled by default.
- **B. No, SSH and HTTPS are enabled by default.**
- C. Yes, HTTP is enabled by default.
- D. Yes, Telnet is enabled by default.

Answer: B

Explanation:

From the factory default state, CX-6200 switches have secure management protocols enabled, specifically SSH for CLI access and HTTPS for web access, ensuring encrypted communication for device configuration.

NEW QUESTION # 82

.....

You no longer have to buy information for each institution for an HPE6-A86 exam, nor do you need to spend time comparing which institution's data is better. HPE6-A86 provides you with the most comprehensive learning materials. Our company employs the most qualified experts who hold a variety of information. At the same time, they use years of experience to create the most scientific HPE6-A86 Learning Engine.
