NEW QUESTION # 43

A colleague from another company shares a link to a prompt.
When you select the link, you receive the following response: "Prompt not found. Sorry, it looks like the prompt is no longer available."
What is a possible cause of the response?

- A. The prompt is outside of your organization.
- B. The prompt is a scheduled prompt.
- C. The prompt is outdated.
- D. The prompt contains a file that has a sensitivity label applied.

Answer: A

NEW QUESTION # 44

You are a medical researcher.
You need to ensure that Microsoft 365 Copilot responds to you in a professional manner that is appropriate to your field. What is the best approach to achieve the goal?

- A. From Settings, configure Copilot Memory.
- B. From Settings, configure Custom instructions.
- C. In the conversation, create a sample prompt and save it to the Copilot Prompt Gallery.
- D. In the conversation, attach an example to your prompts.

Answer: B

Explanation:
Custom instructions allow users to define persistent preferences for tone, style, and response behavior across conversations.
Microsoft documentation explains that Custom instructions help tailor Copilot responses to professional roles, communication styles, and domain expectations.
For a medical researcher requiring consistently professional, field-appropriate responses, configuring Custom instructions in Settings ensures that Copilot maintains the desired tone and terminology in future interactions.
Attaching examples influences only a single conversation. Saving prompts to the Prompt Gallery aids reuse but does not enforce tone globally. Copilot Memory stores factual preferences but is not intended for style configuration.
Therefore, the best and most comprehensive approach is to configure Custom instructions in Settings.

NEW QUESTION # 45

You have a Microsoft 365 subscription.
You do NOT have a Microsoft 365 Copilot license.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
