

Data-Cloud-Consultant Visual Cert Exam - Data-Cloud-Consultant Exam Training

BTW, DOWNLOAD part of ITdumpsfree Data-Cloud-Consultant dumps from Cloud Storage: <https://drive.google.com/open?id=1nHrRwgaFZXBEJq-WJxJRCHBMVIsCZWs5>

When we choose the employment work, you will meet a bottleneck, how to let a company to choose you to be a part of him? We would say ability, so how does that show up? There seems to be only one quantifiable standard to help us get a more competitive job, which is to get the test Data-Cloud-Consultant certification and obtain a qualification. If you want to have a good employment platform, then take office at the same time there is a great place to find that we have to pay attention to the importance of qualification examination.

Salesforce Data-Cloud-Consultant Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Segmentation and Insights: This topic defines basic concepts of segmentation and use cases, identifies scenarios for analyzing segment membership, configuring, refining, and maintaining segments within Data Cloud, and differentiating between calculated and streaming insights.
Topic 2	<ul style="list-style-type: none">Act on Data: This topic defines activations and their basic use cases, using attributes and related attributes, identifying and analyzing timing dependencies affecting the Data Cloud lifecycle. Additionally it focuses on troubleshooting common problems with activations, and using data actions, including their requirements and intended use cases.
Topic 3	<ul style="list-style-type: none">Data Cloud Overview: This topic covers Data Cloud's function, key terminology, business value, typical use cases, the Data Cloud lifecycle, dependencies, and principles of data ethics. These sub-topics provide an overview of Data Cloud's capabilities and applications.
Topic 4	<ul style="list-style-type: none">Identity Resolution: It describes matching and how its rule sets are applied. Furthermore, it discusses reconciling data and its rule sets, the results of identity resolution, and use cases.
Topic 5	<ul style="list-style-type: none">Data Ingestion and Modeling: This topic covers the different transformation capabilities within Data Cloud. It includes describing processes and considerations for data ingestion from various sources, defining, mapping, and modeling data using best practices aligned with identity resolution. Lastly, it discusses using available tools to inspect and validate ingested and modeled data.

Valid Data-Cloud-Consultant Visual Cert Exam & Correct Data-Cloud-Consultant Exam Training & Actual Data-Cloud-Consultant Test

Holding a Salesforce Certified Data 360 Consultant (Data-Con-101) Data-Cloud-Consultant Certification in a certain field definitely shows that one have a good command of the Data-Cloud-Consultant knowledge and professional skills in the related field. However, it is universally accepted that the majority of the candidates for the Salesforce Certified Data 360 Consultant (Data-Con-101) exam are those who do not have enough spare time and are not able to study in the most efficient way.

Salesforce Certified Data 360 Consultant (Data-Con-101) Sample Questions (Q42-Q47):

NEW QUESTION # 42

A consultant is setting up a data stream with transactional data, Which field type should the consultant choose to ensure that leading zeros in the purchase order number are preserved?

- A. Number
- B. Serial
- C. Decimal
- **D. Text**

Answer: D

Explanation:

The field type Text should be chosen to ensure that leading zeros in the purchase order number are preserved. This is because text fields store alphanumeric characters as strings, and do not remove any leading or trailing characters. On the other hand, number, decimal, and serial fields store numeric values as numbers, and automatically remove any leading zeros when displaying or exporting the data123. Therefore, text fields are more suitable for storing data that needs to retain its original format, such as purchase order numbers, zip codes, phone numbers, etc. References:

Zeros at the start of a field appear to be omitted in Data Exports

Keep First '0' When Importing a CSV File

Import and export address fields that begin with a zero or contain a plus symbol

NEW QUESTION # 43

A retailer wants to unify profiles using Loyalty ID which is different than the unique ID of their customers. Which object should the consultant use in identity resolution to perform exact match rules on the Loyalty ID?

- **A. Party Identification object**
- B. Individual object
- C. Loyalty Identification object
- D. Contact Identification object

Answer: A

Explanation:

The Party Identification object is the correct object to use in identity resolution to perform exact match rules on the Loyalty ID. The Party Identification object is a child object of the Individual object that stores different types of identifiers for an individual, such as email, phone, loyalty ID, social media handle, etc. Each identifier has a type, a value, and a source. The consultant can use the Party Identification object to create a match rule that compares the Loyalty ID type and value across different sources and links the corresponding individuals.

The other options are not correct objects to use in identity resolution to perform exact match rules on the Loyalty ID. The Loyalty Identification object does not exist in Data Cloud. The Individual object is the parent object that represents a unified profile of an individual, but it does not store the Loyalty ID directly. The Contact Identification object is a child object of the Contact object that stores identifiers for a contact, such as email, phone, etc., but it does not store the Loyalty ID.

NEW QUESTION # 44

The recruiting team at Cumulus Financial wants to identify which candidates have browsed the jobs page on its website at least twice within the last 24 hours. They want the information about these candidates to be available for segmentation in Data Cloud and the candidates added to their recruiting system.

Which feature should a consultant recommend to achieve this goal?

- **A. Streaming insight**
- B. Calculated insight
- C. Streaming data transform
- D. Batch data transform

Answer: A

Explanation:

A streaming insight is a feature that allows users to create and monitor real-time metrics from streaming data sources, such as web and mobile events. A streaming insight can also trigger data actions, such as sending notifications, creating records, or updating fields, based on the metric values and conditions. Therefore, a streaming insight is the best feature to achieve the goal of identifying candidates who have browsed the jobs page on the website at least twice within the last 24 hours, and adding them to the recruiting system. The other options are incorrect because:

* A streaming data transform is a feature that allows users to transform and enrich streaming data using SQL expressions, such as filtering, joining, aggregating, or calculating values. However, a streaming data transform does not provide the ability to monitor metrics or trigger data actions based on conditions.

* A calculated insight is a feature that allows users to define and calculate multidimensional metrics from data using SQL expressions, such as LTV, CSAT, or average order value. However, a calculated insight is not suitable for real-time data analysis, as it runs on a scheduled basis and does not support data actions.

* A batch data transform is a feature that allows users to create and schedule complex data transformations using a visual editor, such as joining, aggregating, filtering, or appending data.

However, a batch data transform is not suitable for real-time data analysis, as it runs on a scheduled basis and does not support data actions. NEW QUESTION # 45

An analyst from Cloud Kicks needs to get quick Insights to determine the average sales per day during the past week.

What should a consultant recommend?

- A. Segment activation to Azure
- **B. Salesforce reports**
- C. Lightning web component utilizing Query API
- D. Salesforce flows

Answer: B

NEW QUESTION # 46

A global insurance provider has tasked a Data 360 Consultant with optimizing performance for analytical queries running several times per hour against an external Redshift table in Salesforce Data 360 with no real-time needs. Which federation approach should the consultant recommend to balance performance and cost?

- A. Use live query federation so every request hits the external compute engine directly.
- **B. Configure cached acceleration to store and refresh external data for repeat queries.**
- C. Implement file federation exclusively using Data 360 compute on storage.
- D. Ingest the external data into Salesforce Data 360 as a standard object.

Answer: B

Explanation:

The architecture principle is to avoid unnecessary data movement when the external platform can be queried or shared securely. Configure cached acceleration to store and refresh external data for repeat queries. aligns with the zero-copy model because Data 360 can expose or query governed data without building another extract pipeline. That is important when teams want freshness, reduced duplication, and lower operational burden while still respecting permissions and platform boundaries. The distractors fall short because they either move the problem into the wrong system, add needless duplication, ignore Data 360 object relationships, or rely on a feature built for a different lifecycle stage. In a real implementation, those choices usually create brittle pipelines, stale data, security exposure, or segments that look correct on paper but fail when activated. Thinking like an architect, the selected option places the logic where Data 360 can govern it and reuse it reliably. This is the nuance exam questions often test: the platform capability must match both the technical layer and the business timing requirement, not just sound related to data.

NEW QUESTION # 47

.....

We provide you with high-quality Data-Cloud-Consultant learning materials for you, since the experienced experts compile and verify Data-Cloud-Consultant learning materials, therefore the quality and the correctness can be guaranteed. By using Data-Cloud-Consultant exam dumps of us, you will get a certificate successfully, hence you can enter a good enterprise and your salary will also be improved. At the same time, if you choose Data-Cloud-Consultant Learning Materials of us, we have complete online and offline service stuff and after-service, and you can consult us anytime.
