

# Data-Driven-Decision-Making Valid Test Discount, Latest Data-Driven-Decision-Making Test Answers

**C207 \Data-Driven Decision-Making TEST BANK FINAL EXAM UPDATED QUESTIONS AND ACCURATE ANSWERS 2024-2025 GRADED A+ WGU C207**

*A data analyst is working for a local power company. Recently, many new apartments have been built in the community, so the company wants to determine how much electricity it needs to produce for the new residents in the future. A data analyst uses data to help the company make a more informed forecast. This is an example of which problem type?*

- A. Discovering connections*
- B. Identifying themes*
- C. Spotting something unusual*
- D. Making predictions*
- D. Making predictions*

*Categorizing things involves assigning items to categories. Identifying themes takes those categories a step further, grouping them into broader themes or classifications.*

*True*

*False*

Our Data-Driven-Decision-Making exam questions have been designed by the experts after an in-depth analysis of the exam and the study interest and hobbies of the candidates. You avail our Data-Driven-Decision-Making study guide in three formats, which can easily be accessed on all digital devices without any downloading any additional software. And they are also auto installed. It is very fast and conveniente. Our Data-Driven-Decision-Making learning material carries the actual and potential exam questions, which you can expect in the actual exam.

DumpsReview has formulated Data-Driven-Decision-Making PDF questions for the convenience of WGU Data-Driven-Decision-Making test takers. This format follows the content of the WGU Data-Driven-Decision-Making examination. You can read WGU Data-Driven-Decision-Making Exam Questions without the limitations of time and place. There is also a feature to print out WGU Data-Driven-Decision-Making exam questions.

## Latest WGU Data-Driven-Decision-Making Test Answers - Sample Data-Driven-Decision-Making Questions

As far as we know, our Data-Driven-Decision-Making exam prep have inspired millions of exam candidates to pursuit their dreams and motivated them to learn more high-efficiently. Our Data-Driven-Decision-Making practice materials will not let your down. To lead a respectable life, our experts made a rigorously study of professional knowledge about this exam. We can assure you the proficiency of our Data-Driven-Decision-Making Exam Prep. So this is a definitive choice, it means our Data-Driven-Decision-Making practice materials will help you reap the fruit of success.

## WGU VPC2Data-Driven Decision MakingC207 Sample Questions (Q14-Q19):

### NEW QUESTION # 14

What is the purpose of the quality management principle of dedication to fact-based decision-making?

- A. Eliminate anything that does not add value.
- B. Increase the effectiveness from quality practices.
- C. Increase loyalty from customers and suppliers.
- **D. Reduce bias driven by increased trust in plans.**

**Answer: D**

Explanation:

The principle of fact-based decision-making emphasizes using reliable data and objective analysis rather than intuition or opinion. In data-driven decision making, this principle exists primarily to reduce bias and increase trust in organizational plans and decisions. When decisions are grounded in verified data, assumptions are challenged, personal biases are minimized, and outcomes are more predictable. This builds confidence among stakeholders and supports transparency and accountability. Customer loyalty, waste elimination, and quality effectiveness may be indirect benefits, but the core purpose is ensuring that decisions are objective, defensible, and evidence-based. Therefore, the correct answer is D.

### NEW QUESTION # 15

What must be analyzed using powerful analytic tools?

- **A. Big data**
- B. Data analysis results
- C. Small, independent data sets
- D. Inferential statistics

**Answer: A**

Explanation:

Big data must be analyzed using powerful analytic tools due to its volume, velocity, and variety. In data-driven decision making, traditional tools are often insufficient for processing massive, complex datasets generated from digital platforms, sensors, and transactions.

Big data requires advanced computing power, specialized software, and sophisticated algorithms to extract meaningful insights. Inferential statistics and small datasets can often be handled with conventional statistical tools.

Therefore, the correct answer is C, big data.

### NEW QUESTION # 16

Which analytic used in healthcare is calculated as a proportion of new cases compared to person-time units?

- A. Prevalence
- B. Cumulative incidence
- C. Morbidity rate
- **D. Incidence rate**

**Answer: D**

Explanation:

The incidence rate is a healthcare analytic calculated as the number of new cases of a condition divided by person-time units at risk. In data-driven decision making, this metric is essential for understanding how quickly new cases occur within a population over time. Person-time accounts for both the number of individuals and the duration they are observed, making the incidence rate particularly useful when populations are dynamic or when observation periods vary. This distinguishes incidence rate from cumulative incidence, which measures new cases over a fixed population and time period without person-time adjustment.

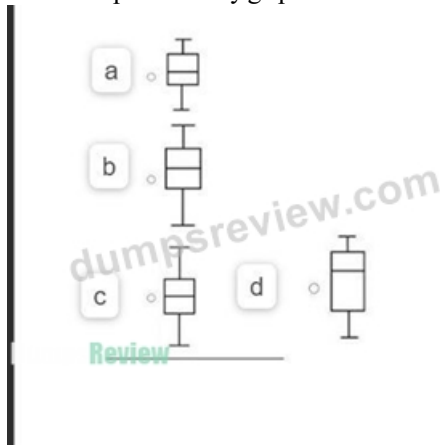

Prevalence measures existing cases at a point in time, and morbidity is a broader term describing illness burden rather than a specific rate calculation.

Because the question explicitly references new cases compared to person-time units, the correct answer is B, incidence rate.

### NEW QUESTION # 17

A sample of 1,020 people was asked how many minutes they exercise on a typical day. The data were plotted and determined to be skewed left with a mean of 44.75 minutes.

Which boxplot correctly graphs this data?

- A. Option B
- B. Option C
- C. Option D
- D. Option A

**Answer: A**

### NEW QUESTION # 18

An organization develops a new strategic plan and seeks ways to improve process performance by reducing variation to only 3.4 defects per million process outputs.

Which tool can the organization use to meet this goal?

- A. Linear programming
- B. Statistical process control
- C. Just-in-time
- D. Six Sigma

**Answer: D**

Explanation:

Six Sigma is specifically designed to reduce process variation to 3.4 defects per million opportunities, making it the correct tool for achieving this goal. In data-driven decision making, Six Sigma provides a structured methodology (DMAIC) for defining problems, measuring performance, analyzing root causes, improving processes, and controlling future outcomes.

Statistical process control supports monitoring, but Six Sigma integrates SPC with strategic improvement initiatives. Linear programming optimizes resource allocation, and just-in-time focuses on inventory efficiency rather than defect reduction.

Therefore, the correct answer is D, Six Sigma.

### NEW QUESTION # 19

.....

One of the best features of DumpsReview exam questions is free updates for up to 1 year. The DumpsReview has hired a team of experienced and qualified Data-Driven-Decision-Making exam trainers. They update the Data-Driven-Decision-Making exam questions as per the latest Data-Driven-Decision-Making Exam Syllabus. So rest assured that with the DumpsReview you will get the updated Data-Driven-Decision-Making exam practice questions all the time. Try a free demo if you to evaluate the features of our product. Best of luck!
