Answer: D

NEW QUESTION # 140

Which of the following will always describe the critical path? The path with

- A. The shortest duration and negative float.
- B. Zero float.
- **C. The longest duration through the network.**
- D. Negative float.

Answer: C

Explanation:

A

Critical Path Characteristics:

* The critical path is the sequence of activities that determines the overall project duration.

* It represents the longest duration path through the network and typically has zero float unless delays or constraints introduce negative float.

PSP Study Guide References:

* Critical path analysis is a foundational concept in schedule management, as covered extensively in the PSP guide.

Analysis of Options:

* Option A: Correct. The critical path always has the longest duration.

* Option B: Zero float is common but not universal due to constraints or delays.

* Option C and D: Negative float describes specific scenarios but does not define the critical path universally.

Conclusion: The correct answer is A, as the critical path is the longest-duration path through the network.
