

Pass Guaranteed Latest Cyber AB - CMMC-CCP - Accurate Certified CMMC Professional (CCP) Exam Answers

BONUS!!! Download part of Actualtests4sure CMMC-CCP dumps for free: https://drive.google.com/open?id=1pNzasf5bs1u_E5SDC-CJaWX7_NrtKFN-

You can try the Cyber AB CMMC-CCP exam dumps demo before purchasing. If you like our Certified CMMC Professional (CCP) Exam (CMMC-CCP) exam questions features, you can get the full version after payment. Actualtests4sure Certified CMMC Professional (CCP) Exam (CMMC-CCP) dumps give surety to confidently pass the Certified CMMC Professional (CCP) Exam (CMMC-CCP) exam on the first attempt.

Cyber AB CMMC-CCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • CMMC-AB Code of Professional Conduct (Ethics): This section of the exam measures the integrity of cybersecurity professionals by evaluating their understanding of the CMMC-AB Code of Professional Conduct. It emphasizes ethical responsibilities, including confidentiality, objectivity, professionalism, conflict-of-interest avoidance, and respect for intellectual property, ensuring candidates can uphold ethical standards throughout their CMMC-related duties.

Topic 2	<ul style="list-style-type: none"> • CMMC Ecosystem: This section of the exam measures the skills of consultants and compliance professionals and focuses on the different roles and responsibilities across the CMMC ecosystem. Candidates must understand the functions of entities such as the Department of Defense, CMMC-AB, Organizations Seeking Certification, Registered Practitioners, and Certified CMMC Professionals, as well as how the ecosystem supports cybersecurity standards and certification.
Topic 3	<ul style="list-style-type: none"> • CMMC Assessment Process (CAP): This section of the exam measures the planning and execution skills of audit and assessment professionals, covering the end-to-end CMMC Assessment Process. This includes planning, executing, documenting, reporting assessments, and managing Plans of Action and Milestones (POA&M) in alignment with DoD and CMMC-AB methodology.
Topic 4	<ul style="list-style-type: none"> • CMMC Model Construct and Implementation Evaluation: This section of the exam measures the evaluative skills of cybersecurity assessors, focusing on the application and assessment of the CMMC model. It includes understanding its levels, domains, practices, and implementation criteria, and how to assess whether organizations meet the required cybersecurity practices using evidence-based evaluation.
Topic 5	<ul style="list-style-type: none"> • Scoping: This section of the exam measures the analytical skills of cybersecurity practitioners, highlighting their ability to properly define assessment scope. Candidates must demonstrate knowledge of identifying and classifying Controlled Unclassified Information (CUI) assets, recognizing the difference between in-scope, out-of-scope, and specialized assets, and applying logical and physical separation techniques to determine accurate scoping for assessments

If you purchasing our CMMC-CCP simulating questions, you will get a comfortable package services afforded by our considerate after-sales services. We respect your needs toward the useful CMMC-CCP practice materials by recommending our CMMC-CCP Guide preparations for you. Only in a few minutes, your ordered CMMC-CCP exam questions are sent to you, and whenever you have any question on the CMMC-CCP practice guide, you can contact with our service at 24/7.

Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which phase of the CMMC Assessment Process includes developing the assessment plan?

- **A. Phase 1**
- B. Phase 3
- C. Phase 2
- D. Phase 4

Answer: A

Explanation:

Understanding the Phases of the CMMC Assessment Process

The CMMC Assessment Process (CAP) consists of multiple phases, with each phase focusing on a different aspect of the assessment. Developing the assessment plan occurs in Phase 1, which is the Pre-Assessment Phase.

Key Activities in Phase 1 - Pre-Assessment Phase

Engagement Agreement: The OSC (Organization Seeking Certification) and the Certified Third-Party Assessment Organization (C3PAO) formalize the assessment contract.

Developing the Assessment Plan: The Lead Assessor and the assessment team create an Assessment Plan, which outlines:

Scope of the assessment

CMMC Level requirements

Assessment methodology

Timeline and logistics

Initial Data Collection: Review of system documentation, policies, and relevant security controls.

Why is the Correct Answer "Phase 1" (A)?

A). Phase 1 # Correct

Phase 1 is where the assessment plan is developed.

It ensures clarity on scope, methodology, and logistics before the assessment begins.

B). Phase 2 # Incorrect

Phase 2 is the Assessment Conduct Phase, where assessors execute the plan by examining evidence and interviewing personnel.

C). Phase 3 # Incorrect

Phase 3 is the Post-Assessment Phase, which involves finalizing findings and submitting reports, not developing the plan.

D). Phase (Incomplete Answer) # Incorrect

The question requires a specific phase, and the correct one is Phase 1.

CMMC 2.0 References Supporting this Answer:

CMMC Assessment Process (CAP) Document

Defines Phase 1 as the stage where the assessment plan is developed.

CMMC Accreditation Body (CMMC-AB) Guidelines

Specifies that planning and pre-assessment activities occur in Phase 1.

CMMC 2.0 Certification Workflow

Outlines the assessment planning process as part of the initial engagement between the C3PAO and the OSC.

NEW QUESTION # 19

Which term describes a group of individuals that conduct operational network vulnerability evaluations and provide mitigation techniques to customers?

- A. Penetration test team
- B. Blue team
- C. Red team
- D. White hat hackers

Answer: A

Explanation:

The best match is Penetration test team because penetration testing is an authorized, structured security evaluation intended to find vulnerabilities in systems or networks and produce results that enable remediation/mitigation.

Authoritatively, NIST SP 800-115 (Technical Guide to Information Security Testing and Assessment) is a primary federal reference for technical security testing. It describes the purpose of technical testing as helping organizations plan and conduct tests, analyze findings, and develop mitigation strategies - which aligns directly with "vulnerability evaluations" and "providing mitigation techniques." The DoD also points its Components to NIST SP 800-115 as guidance for penetration testing activities.

By contrast, a Red Team is typically framed as an "ethical adversary" that emulates attackers to test detection/response and overall readiness; it is often broader, scenario-driven, and focused on demonstrating what a capable adversary can accomplish rather than performing a scoped vulnerability evaluation with remediation-oriented outputs. A Blue Team is primarily defensive operations (monitoring, detection, response), not the group defined by conducting vulnerability evaluations for customers. "White hat hackers" is a general label for ethical hackers, but it is less specific than the established service construct of a penetration test team.

Because the question emphasizes operational network vulnerability evaluations plus mitigation techniques, the most precise and standard term is D: Penetration test team, supported by NIST's testing-and- mitigation framing.

NEW QUESTION # 20

In CMMC High-Level scoping, which definition BEST describes an HQ organization?

- A. The teams, services, and technologies that provide support to a Host Unit
- B. The entity that carries out the tasks under a contract
- C. The entity legally responsible for the delivery of products or services under a contract
- D. The unit to which a CMMC Level is applied for each contract

Answer: C

Explanation:

In CMMC scoping terminology, an HQ Organization is the entity legally responsible for contract performance and delivery of products or services.

Supporting Extracts from Official Content:

* CMMC Scoping Guide: "HQ Organization is the legal entity responsible for the performance and delivery of contract requirements." Why Option D is Correct:

* The HQ Org is legally accountable, while Host Units (option A/B) are subordinate entities.

* Option C refers to shared services, not the HQ.

References (Official CMMC v2.0 Content):

* CMMC Scoping Guide, High-Level Scoping Definitions.

NEW QUESTION # 21

In performing scoping, what should the assessor ensure that the scope of the assessment covers?

- A. All assets processing, storing, or transmitting FCI/CUI and security protection assets
- B. All entities, regardless of the line of business, associated with the organization
- C. All assets documented in the business plan
- D. All assets regardless if they do or do not process, store, or transmit FCI/CUI

Answer: A

Explanation:

Scoping Requirements in CMMC Assessments
The CMMC 2.0 Scoping Guide and CMMC Assessment Process (CAP) Document clearly define what should be included in the scope of an assessment.

The assessment scope must cover:

* All assets that process, store, or transmit FCI/CUI

* Security Protection Assets (ESP)- these assets help protect FCI/CUI, such as firewalls, endpoint detection systems, and encryption mechanisms.

Thus, the correct scope includes both:

#FCI/CUI Assets (Data storage, processing, or transmission assets)

#Security Protection Assets (ESP) (Firewalls, security tools, etc.)

* A. All assets documented in the business plan #Incorrect. Business plans may include assets unrelated to FCI/CUI, making this scope too broad. Only assets relevant to FCI/CUI should be assessed.

* B. All assets regardless if they do or do not process, store, or transmit FCI/CUI #Incorrect. CMMC does not require organizations to include assets that have no connection to FCI/CUI.

* C. All entities, regardless of the line of business, associated with the organization #Incorrect. Only the assets relevant to FCI/CUI or security protection should be assessed. Unrelated business divisions (like a non-federal commercial division) are out-of-scope.

Why the Other Answers Are Incorrect

* CMMC 2.0 Scoping Guide - Level 1 & Level 2

* CMMC Assessment Process (CAP) Document

CMMC Official References
Thus, option D (All assets processing, storing, or transmitting FCI/CUI and security protection assets) is the correct answer as per official CMMC assessment scoping requirements.

NEW QUESTION # 22

Which words summarize categories of data disposal described in the NIST SP 800-88 Revision 1. Guidelines for Media Sanitation?

- A. Clear, overwrite, destroy
- B. Clear, overwrite, purge
- C. Clear redact, destroy
- D. Clear, purge, destroy

Answer: D

NEW QUESTION # 23

.....

Our Cyber AB CMMC-CCP desktop and web-based practice software are embedded with mock exams, just like the actual Cyber AB Data Center certification exam. The Actualtests4sure designs its mock papers so smartly that you can easily prepare for the Certified CMMC Professional (CCP) Exam exam. All the essential questions are included, which have a huge chance of appearing in the real Certified CMMC Professional (CCP) Exam exam. Our mock exams may be customized so that you can

change the topics and timings for each exam according to your preparation.
