Materials, if you fail to pass the exam, we will give you full refund, and the money will be returned to your payment account. We have online and offline service, and if you have any questions for AAPC-CPC exam braindumps, you can consult us.

Medical Tests American Academy of Professional Coders: Certified Professional Coder Sample Questions (Q91-Q96):

NEW QUESTION # 91

A new, 29-year-old female patient is seen for a preventative visit and receives counseling that totals 30 minutes about contraceptive management. How would the provider code the CPT code(s) for this visit?

- A. 99385, 99402-25
- B. 99385, 99417, 99417
- C. 0
- D. 99385, 99203-25

Answer: C

Explanation:

If 99402 is part of a more complex service, it would not be separately identifiable, thus eliminating answer A. Because 99385 includes counseling/anticipatory guidance/risk factor reduction interventions, the additional 30 minutes that the provider spent discussing contraceptives would not be considered a significant, separately identifiable E/M service, eliminating answer B. Last, because time is not a factor when selecting a preventative service, 99417 reflected in answer C, indicating a prolonged outpatient E/M service totaling 30 minutes would not apply.

NEW QUESTION # 92

Which term describes a procedure in which real-time moving images of an organ are displayed on a screen so that a physician can examine its function and/or structure?

- A. Magnetic resonance imaging
- B. Computed tomography
- C. Tomography
- D. Fluoroscopy

Answer: D

Explanation:

Magnetic resonance imaging (MRI) uses magnets, radio waves, and a computer to display detailed pictures of the inside of the body. Tomography uses waves of energy to create three-dimensional, computer-generated images of any internal structure. Computed tomography is cross-sectional images of the body obtained by a narrow beam of x-rays that quickly rotates around the body.

NEW QUESTION # 93

Under the oversight of the pediatrician, a nurse reviews the vaccine and allergy history of a 13-year-old established patient just prior to administering a live varicella virus vaccine subcutaneously. What procedure code(s) should be reported?

- A. 90716, 90460
- B. 99211-25, 90716, 90471
- C. 90716, 90471
- D. 99211-25, 90716, 90460

Answer: C

Explanation:

Although CPT 99211 can be reported for limited assessments performed by nonphysician staff members, the vaccine and allergy history intake is considered vaccine related and not separately reportable. CPT 90460 is reported when a physician provides counseling about the benefits and risks associated with the vaccine and signs and symptoms that would indicate an adverse reaction. Because the physician did not document seeing the patient at this encounter, report CPT 90471 for the administration of the immunization.

NEW QUESTION # 94

A urologist performs a laparoscopic adrenalectomy and excises a retroperitoneal mass in the same session. How should this be coded?

- A. 60650, 49203-51
- B. 0
- C. 60650-22
- D. 1

Answer: C

Explanation:

CPT 60650 describes a laparoscopic adrenalectomy with a biopsy but not the complete removal of a retroperitoneal mass. In contrast, adding modifier 22 indicates increased work and complexity and can be used because there is no CPT to describe a laparoscopic retroperitoneal mass resection. CPT 49329 represents an unlisted laparoscopy procedure that can be used to describe the removal of a retroperitoneal mass but would have to be used in conjunction with CPT 60650 to describe the adrenalectomy procedure. CPT 60545 describes an adrenalectomy with excision of a retroperitoneal mass by means of an abdominal or posterior incision. CPT 49203 also does not describe the procedure because it involves an open excision of an intra-abdominal tumor.

NEW QUESTION # 95

An established patient presents complaining of clumpy, white discharge for 3 days. A vaginal exam reveals an old tampon, which is removed. Diflucan is sent to the pharmacy, instructions given, and the patient is told to follow up in 1 week. How would the provider code the visit?

- A. 99213, N89.8, T19.2LXA
- B. 57415, T19.2XXA, N89.8
- C. 57415, 99212-25, T19.2kVA
- D. 99213, T19.2XXA, N89.8

Answer: D

Explanation:

Although a foreign body was removed, 57415 in answers A and B cannot be reported because anesthesia was not used. The documentation supports low-level medical decision making, so the appropriate E/M would be 99213. When comparing answers C and D, bear in mind that ICD-IO-CM requires sequencing "the underlying condition first, followed by the manifestation."

NEW QUESTION # 96

.....

By concluding quintessential points into American Academy of Professional Coders: Certified Professional Coder practice materials, you can pass the exam with the least time while huge progress. Our experts are responsible to make in-depth research on the exams who contribute to growth of our AAPC-CPC practice materials. Their highly accurate exam point can help you detect flaws on the review process and trigger your enthusiasm about the exam. What is more, AAPC-CPC practice materials can fuel your speed and the professional backup can relieve you of stress of the challenge.
