What functionality should the administrator use to fulfill the team's request?

- A. PREVGROUPVALUE
- B. Bucket field
- C. Matrix Report
- D. Summary Formula

Answer: B

NEW QUESTION # 17
An administrator is creating a custom Opportunity record page for Sales users for new logo opportunities. They need to control what fields display on the record when a sales user is viewing the opportunity.
Where should the administrator edit what fields display in the details of the record page?

- A. Custom Lightning Component
- B. Record Types
- C. Record Detail Component
- D. Page Layout

Answer: C

NEW QUESTION # 18
An administrator at Cloud kicks recently built a screen flow in a sandbox that creates a case and follow-up task. When the flow runs in the sandbox, it works just as expected. When tested in production, the flow errors when creating the records.
Choose 2 answers

- A. Change the user experiencing the issue to the System Administrator profile.
- B. Open the flow In Debug mode and Run the Flow as another user.
- C. Change the Default Case Creator to the user's manager.
- D. Log in as another user and run the flow.

Answer: B,D

Explanation:
Opening the flow in Debug mode and running it as another user allows simulating how the flow behaves for different users with different permissions and settings. This can help identify any issues related to user

NEW QUESTION # 19
DreamHouse Realty wants better insights into potential revenue in the next quarter and is considering using Collaborative Forecasts.
What should the administrator consider when setting up Collaborative Forecasts?

- A. Opportunity Split data cannot be viewed in a forecast.
- B. The default forecast categories cannot be customized.
- C. A single org can have up to six different types of forecasts.
- D. A forecast can be either revenue-based or quantity-based.

Answer: D

Explanation:
A forecast is a projection of how much revenue or quantity you can generate from your sales pipeline for a given period of time. A forecast can be either revenue-based or quantity-based, depending on what you want to measure and track. A revenue-based

forecast shows the amount of money expected from closed sales, while a quantity-based forecast shows the number of units expected from closed sales. You can choose the forecast type that best suits your business needs and goals when you set up Collaborative Forecasts in Salesforce.
