Pass your AD0-E117 exam in 2026 Smoothly!

We are here divide grieves with you to help you pass your Adobe AD0-E117 exam with ease. You can abandon the time-consuming thought from now on. You won't regret your decision of choosing our Adobe AD0-E117 study guide. In contrast, they will inspire your potential without obscure content to feel. After getting our AD0-E117 Exam Prep, you will not live under great stress during the AD0-E117 exam period.

Adobe Experience Manager Architect Master Exam is a challenging test that evaluates candidates' abilities to design and implement scalable, robust, and secure AEM solutions. To pass AD0-E117 exam, candidates must demonstrate their proficiency in several areas, including AEM architecture, deployment, customization, integration, and troubleshooting. AD0-E117 exam consists of 60 multiple-choice questions that must be completed within 120 minutes.

The AD0-E117 exam is intended for professionals who have several years of experience in designing and architecting AEM solutions. Candidates for AD0-E117 Exam should be familiar with the end-to-end AEM development process, including designing AEM solutions, configuring AEM author and publish instances, integrating AEM with other systems, and implementing AEM-based applications. Additionally, candidates should have a strong understanding of AEM's underlying architecture, including its content repository, workflow engine, and security model.

Adobe Experience Manager Architect Master Sample Questions (Q20-Q25):

NEW QUESTION # 20

A customer's DAM and Sites is growing exponentially while preparing for a go-live. The AEM architect has noticed that the online compaction on the author failed yesterday and finds this log entry:

```
INFO [pool-23-thread-1] com.adobe.granite.maintenance.impl.MaintenanceJobsManagerImpl Name='RevisionCleanupTask', Status='ERROR', Result='Revision GC: Stopped by user.'
```

Details={'created':1668218400006,'started':1668218400006,'finished':1668229200598,'duration':10800592}'

What step would the architect take to resolve this issue for the production environment with no downtime?

- A. Configure the full compaction to run on weekdays
- **B. Increase the daily maintenance window**
- C. Perform an offline compaction
- D. Manually run the online compaction

Answer: B

NEW QUESTION # 21

AEM Site users report that the web content pages render very slowly. An Architect notices that the CPU usages of the AEM Publish instances are spiking and reviews the following entry in the log:

[Fri Nov 27 23:11:00 2019] [I] [pid 16004 (tid 140134145820416)] Current cache hit ratio: 47.94 % What should the Architect do to increase the dispatcher cache ratio and prevent the AEM Publish CPU usage spikes?

- **A. Create a cron job that will delete the dispatcher cache on a regular basis**
- B. Add additional AEM instances to the Publish Farm
- C. Add additional dispatcher servers
- D. Review and optimize the Dispatcher cache configuration

Answer: A

NEW QUESTION # 22

An Architect needs to design a deployment process without downtime for end users. The system architecture contains an AEM author, two AEM publishers, two publish Dispatchers, and a centrally managed load balancer. The publishers serve some content that cannot be cached.

Which two actions should the Architect take to meet these requirements? (Choose two.)

- A. Connect each publish Dispatcher to one AEM publish
- **B. Configure the centrally managed load balancer to connect directly to the AEM publisher that is not being dedKyed to**
- C. Deploy software package to AEM Publishers one by one
- D. Use each publish Dispatcher to load-balance to both AEM publishers
- **E. Deploy software packages by replicating them from author to publishers**

Answer: B,E

NEW QUESTION # 23

An existing AEM sites platform will receive the latest service pack. The service pack includes functional and non-functional fixes such as security patches. Which action should the Architect take to make sure the update is successful?

- A. Install the service pack in staging and ensure that all the bundles are up and running, then deploy to production.
- B. Advise the customer to request Adobe to install the fixes directly on production since they are prechecked.
- C. Identify the packages affected by the service pack after installing them into production and monitor them.
- **D. Do a full staging of the service pack including a regression test, if passed, deploy to production.**

Answer: D

Explanation:

According to Adobe Experience Manager documentation³, installing a service pack requires careful planning and testing before applying it to production environments. A full staging of the service pack includes verifying that all customizations and integrations are compatible with the new version, performing a regression test to ensure that all functionalities are working as expected, and validating that there are no performance or security issues.

NEW QUESTION # 24
