VMware certification 2V0-17.25 exam best training materials

Consider sitting for an VMware Cloud Foundation 9.0 Administrator exam and discovering that the practice materials you've been using are incorrect and useless. The technical staff at Pass4training has gone through the VMware certification process and knows the need to be realistic and exact. Hundreds of professionals worldwide examine and test every VMware 2V0-17.25 Practice Exam regularly. These practice tools are developed by professionals who work in fields impacting VMware VMware Cloud Foundation 9.0 Administrator, giving them a foundation of knowledge and actual competence.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q22-Q27):

NEW QUESTION # 22

An administrator needs to manage a large inventory of VMs spread across multiple data centers. Which features in vCenter can help organize these objects effectively?

- A. Tags and custom attributes
- B. vSphere Pod Security
- C. Folders for grouping VMs logically
- D. Resource Pools for CPU/memory grouping

Answer: A,C,D

Explanation:

vCenter Folders (A), Resource Pools (B), and Tags/attributes (D) all help categorize and manage large inventories. "vSphere Pod Security" (C) is not a standard vCenter feature.

NEW QUESTION # 23

What prerequisite must an administrator complete in VCF before configuring Provider Networking in VCF Automation?

- A. Create a T0 Gateway in NSX Manager.
- B. Create a vDS in vCenter.
- C. Create a T0 Gateway in the Organization.
- D. Create a vDS in Provider Management.

Answer: A

Explanation:

Before you can configure Provider Networking, an active Tier-0 (T0) Gateway must be created in NSX Manager and associated with the Provider region. This gateway provides external routing and forms the foundation for VPC and tenant networking.

NEW QUESTION # 24

An administrator is responsible for the management of a VMware Cloud Foundation (VCF)-based private cloud. The environment is configured in the following ways:

- A single Organization for VM Applications with 50 application development projects.
- Relevant configuration for the FitnessTrackerApp project:
- Project Administrators: FTA_Admins (Group)
- Project Members: FTA_Developers (Group), FTA_LeadDevelopers (Group)

Provisioning Zone(s): vcf-wld-01

The administrator has been tasked with ensuring that the newly created catalog item (Mobile Application Backend) is initially only visible to the Lead Developers of the FitnessTrackerApp project.

The administrator has already completed:

- Logged into VCF Automation.
- Updated the Content Source to include the Mobile Application Backend blueprint.

Which four additional steps must the administrator take to complete the objective? (Choose four.)

- A. Add the FTA_LeadDevelopers Group to the new policy.
- B. Create a new Content Sharing Policy.
- C. Create a new Deployment Limit Policy.
- D. Configure the Scope of the new policy to be Organization.
- E. Add the Mobile Application Backend catalog item to the new policy.
- F. Configure the Scope of the new policy to be Project and select the FitnessTrackerApp project.
- G. Add the FTA_Developers Group to the policy.

Answer: A,B,E,F

Explanation:

Administrators create Content Sharing Policies to restrict which groups can see specific catalog items.

Steps required for this scenario:

Create a new Content Sharing Policy (D): This policy governs catalog item access.

Add the catalog item to the new policy (B): The Mobile Application Backend blueprint must be explicitly added.

Configure the scope as Project FitnessTrackerApp (C): This ensures the catalog restriction applies only within the FitnessTrackerApp project.

Add the FTA_LeadDevelopers Group (F): Grants visibility only to this group, fulfilling the requirement that only Lead Developers initially see the item.

NEW QUESTION # 25

An administrator is tasked with deploying several VMware ESX hosts in a new VMware environment. The administrator wants to understand the general flow of a manual ESX installation and setup process in VMware Cloud Foundation (VCF).

What are the stages of the ESX deployment process?

- A. 1. Install ESX using VCF Installer
2. Configure host settings
3. Perform hardware compatibility check

- 4. Create datastores
- B. 1. Boot from installation media
 2. Select target disk
 3. Configure management network
 4. Set root password
- C. 1. Install vCenter Server
 2. Configure cluster settings
 3. Deploy ESX using VCF Installer
 4. Create virtual machines
- D. 1. Hardware validation
 2. Network configuration
 3. ESX installation
 4. Join vCenter

Answer: B

Explanation:

The manual ESXi installation process in VMware Cloud Foundation (before commissioning hosts into VCF) follows the standard VMware ESXi setup workflow: boot from the installation ISO, select the installation disk, configure the management network, and set the root password. This prepares the host for later commissioning into VCF.

NEW QUESTION # 26

An administrator is tasked with troubleshooting an issue where some VMs are not appearing in the vCenter inventory after a recent migration to a new vSphere environment.

Which two components should the administrator examine to resolve this issue? (Choose two.)

- A. The vSphere permissions assigned to the VMs.
- B. The compatibility of the VM hardware version with the new vSphere environment.
- C. The network settings of the new vSphere environment.
- D. The registration status of the VMs in the new vSphere environment.
- E. The storage policies applied to the VMs.

Answer: B,D

Explanation:

If the hardware version of the virtual machines is incompatible with the new vSphere environment, the VMs may not appear or may fail to register properly. Ensuring compatibility between the VM hardware version and the vSphere environment is essential for successful VM migration.

If the VMs are not correctly registered in the new vSphere environment after migration, they won't show up in the vCenter inventory. Checking the registration status helps to identify if this is the issue.

NEW QUESTION # 27

.....

For our PDF version of our 2V0-17.25 practice materials has the advantage of printable so that you can print all the materials in 2V0-17.25 study engine to paper. Then you can sketch on the paper and mark the focus with different colored pens. This will be helpful for you to review the content of the materials. If you are busy with work and can't afford a lot of spare time to review, you can choose the other two versions of our 2V0-17.25 Exam Questions: Software and APP online versions.

2V0-17.25 Certified: <https://www.pass4training.com/2V0-17.25-pass-exam-training.html>

And there are several advantages about our 2V0-17.25 valid exam vce for your reference, Our 2V0-17.25 latest dumps questions are closely linked to the content of the real examination, so after 20 to 30 hours' study, candidates can accomplish the questions expertly, and get through your VMware 2V0-17.25 smoothly, You will our 2V0-17.25 exam dumps are the best!

By computing your own high water mark score and laying it 2V0-17.25 over the graph above, you can quickly determine where you may be ahead of the game and where you may be behind.

Client and Utility Programs for Table Maintenance, And there are several advantages about our 2V0-17.25 Valid Exam Vce for your reference, Our 2V0-17.25 latest dumps questions are closely linked to the content of the real examination, so after 20 to 30

hours' study, candidates can accomplish the questions expertly, and get through your VMware 2V0-17.25 smoothly.
