ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q57-Q62):

NEW QUESTION # 57

Which platform feature can be used to determine the relationships between field in an Import Set table to field in an existing ServiceNow table?

- A. CI Relationship Builder
- B. Data Sources
- C. Business Service Management Map
- **D. Transform Map**

Answer: D

Explanation:

A transform map determines the relationships between fields displaying in an Import Set table and fields in an existing ServiceNow table, such as the Incidents or Users table.

Reference:

The following platform feature can be used to determine the relationships between fields in an Import Set table to fields in an existing ServiceNow table:

Transform Map. This is a feature that defines the mapping between the fields of an Import Set table and the fields of a target table, such as incident, problem, or user. A transform map also specifies the logic and rules for transforming the imported data, such as coalescing, scripting, or applying data policies.

The following platform features are not used to determine the relationships between fields in an Import Set table to fields in an existing ServiceNow table:

Business Service Management Map. This is a feature that provides a graphical representation of the configuration items (CIs) and their relationships in the Configuration Management Database (CMDB). A Business Service Management Map can be used to visualize the impact of incidents, changes, or problems on the CIs and the services they support.

Data Sources. This is a feature that defines the connection and authentication information for an external data source, such as a file, a JDBC database, or a web service. A data source is used to import data from the external source into an Import Set table.

CI Relationship Builder. This is a feature that creates relationships between CIs in the CMDB based on predefined or custom rules. A CI Relationship Builder can be used to populate the CMDB with the dependencies and connections between the CIs. Reference: Transform Maps, Business Service Management Map, Data Sources, CI Relationship Builder

NEW QUESTION # 58

Which one of the following is NOT part of the Form Designer?

- A. Form layout
- B. Page header
- **C. Schema map**
- D. Field navigator

Answer: C

Explanation:

https://developer.servicenow.com/dev.do#!/learn/courses/sandiego/app_store_learnv2_learnmore_sandiego_learn_more/app_store_learnv2_learnmore_sandiego_form_and_list_layouts/app_store_learnv2_learnmore
The Form Designer is a tool that allows you to create and customize forms on the ServiceNow platform. The Form Designer has four main components:

Form layout: The form layout shows the preview of the form and allows you to drag and drop fields, sections, and related lists onto the form. You can also resize, reorder, and delete the elements on the form layout.
Page header: The page header shows the name of the table and the form that you are editing. You can also access the form properties, save the form, and switch to the form view from the page header.

Field navigator: The field navigator shows the list of available fields for the table and allows you to search, filter, and add fields to the form. You can also create new fields and edit existing fields from the field navigator.

Schema map: The schema map is not part of the Form Designer. The schema map is a separate tool that shows the relationships between tables and fields on the platform. You can access the schema map from the System Definition > Tables module or from the context menu of a table.

NEW QUESTION # 59

What is the ServiceNow store?

- A. Downloadable content ServiceNow script archive
- B. The source for ServiceNow Community created developer content
- **C. Marketplace for free and paid certified ServiceNow applications and integrations**
- D. Alternate name for the ServiceNow Developer Share site

Answer: C

Explanation:

The ServiceNow Store is a marketplace for free and paid certified ServiceNow applications and integrations. The ServiceNow Store provides customers with access to Now Certified enterprise workflow apps from partners that complement and extend ServiceNow products and solutions. Customers can browse, try, buy, and deploy apps and integrations that suit their needs and enhance their ServiceNow experience. The ServiceNow Store is not the source for ServiceNow Community created developer content, as that is available on the Developer Portal or the Share site. The ServiceNow Store is not a downloadable content ServiceNow script archive, as that is available on the Script Library or the Script Repository. The ServiceNow Store is not an alternate name for the ServiceNow Developer Share site, as that is a separate site where developers can share applications, code snippets, UI pages, etc. Reference: ServiceNow Store

NEW QUESTION # 60

In an Email Notification, which one of the following is NOT true for the Weight field?

- **A. A Weight value of zero means that no email should be sent**
- B. A Weight value of zero means the Notification is always sent when the Notification's When to send criteria is met
- C. The Weight value defaults to zero
- D. Only Notifications with the highest weight for the same record and recipients are sent

Answer: A

Explanation:

https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/administer/notification/task/t_CreateANotification.html

https://developer.servicenow.com/dev.do#!/learn/learning-plans/quebec/new_to_servicenow/app_store_learnv2_automatingapps_quebec_when_to_send

NEW QUESTION # 61

Which methods can be used to install an application on a ServiceNow instance?

Choose 3 answers

- **A. Download and install a third-party application from the ServiceNow Store**
- **B. Import an application from an XML file**
- **C. Install an application from the Application Repository**
- D. Use the 'Install' button on the application record
- E. Install from the Google Play Store
- F. Download from Stack Overflow

Answer: A,B,C

Explanation:

ServiceNow provides several methods to install applications onto an instance, each suited to different scenarios:

Import an Application from an XML File (Option A):

Description: Developers can export an application as an XML file and then import it into another ServiceNow instance.

Use Case: This method is commonly used for moving applications between instances, such as from development to production.

Procedure:

Navigate to "System Applications" > "Applications."

Click on the "Import" button.

Upload the XML file of the application.

Reference:

Install an Application from the Application Repository (Option E):

Description: The Application Repository is a centralized location within ServiceNow where developers can publish applications. Instances with the appropriate permissions can install these applications directly.

Use Case: Ideal for deploying custom applications across multiple instances within the same organization.

Procedure:

Navigate to "System Applications" > "All Available Applications" > "All." Search for the desired application.

Click "Install" to add it to your instance.

Download and Install a Third-Party Application from the ServiceNow Store (Option F):

Description: The ServiceNow Store offers a marketplace of third-party applications that extend the platform's capabilities.

Use Case: When seeking pre-built solutions or integrations developed by third-party vendors.

Procedure:

Visit the ServiceNow Store.

Browse or search for the desired application.

Click "Get" or "Request App" to initiate the installation process.

Incorrect Options:

Option B: Use the 'Install' button on the application record - This option is not a standard method for installing applications in ServiceNow. Applications are typically installed via the Application Repository, the ServiceNow Store, or by importing XML files.

Option C: Install from the Google Play Store - The Google Play Store is intended for Android applications and is not used for ServiceNow application installations.

Option D: Download from Stack Overflow - Stack Overflow is a platform for asking and answering programming questions and does not host ServiceNow applications for download.

NEW QUESTION # 62

.....

Different with other similar education platforms on the internet, the Certified Application Developer-ServiceNow guide torrent has a high hit rate, in the past, according to data from the students' learning to use the CAD test torrent, 99% of these students can pass the qualification test and acquire the qualification of their yearning, this powerfully shows that the information provided by the CAD Study Tool suit every key points perfectly, targeted training students a series of patterns and problem solving related routines, and let students answer up to similar topic.
