

High-quality Peoplecert New DevOps-Foundation Exam Guide Technically Researched by Peoplecert First-Grade Trainers

BONUS!!! Download part of Exam4Tests DevOps-Foundation dumps for free: <https://drive.google.com/open?id=1YuTEWljq2Mu86Nx3VPPnas5-Kpr40poR>

This quality of our DevOps-Foundation exam questions is so high that the content of our DevOps-Foundation study guide polishes your skills and widens your horizons intellectually to ace challenges of a complex certification like the DevOps-Foundation Exam Certification. And with our DevOps-Foundation learning quiz, your success is 100% guaranteed. You can just look at the data on our website. Our pass rate of the worthy customers is high as 98% to 100%.

The PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam questions can help you gain the high-in-demand skills and credentials you need to pursue a rewarding career. To do this you just need to pass the PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) certification exam which is not easy to crack. You have to put in some extra effort, and time and prepare thoroughly to pass the Peoplecert DevOps-Foundation Exam. For the quick, complete, and comprehensive PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam dumps preparation you can get help from top-notch and easy-to-use DevOps-Foundation Questions.

Updated Peoplecert New DevOps-Foundation Exam Guide offer you accurate Exam Dumps Collection | PeopleCert DevOps Foundationv3.6Exam

In the competitive society, if you want to compete with others, you should equip yourself with strong technological skills. Recently, the proficiency of DevOps-Foundation certification has become the essential skills in job seeking. Now, DevOps-Foundation latest exam torrent will give you a chance to be a certified professional by getting Peoplecert certification. With the study of DevOps-Foundation Study Guide torrent, you will feel more confident and get high scores in your upcoming exams.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.

Topic 2	<ul style="list-style-type: none"> • Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.
Topic 3	<ul style="list-style-type: none"> • Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.
Topic 4	<ul style="list-style-type: none"> • Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.
Topic 5	<ul style="list-style-type: none"> • Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI • CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78

Regardless of structure, what should a DevOps team NOT be?

- A. Balanced in terms of people and automation skills
- **B. Isolated**
- C. Flat
- D. Continuously engaged

Answer: B

Explanation:

A core goal of DevOps is to eliminate isolation between roles, teams, and departments. Isolated teams—cut off from other parts of the value stream—create bottlenecks, reduce visibility, and slow feedback.

While flat hierarchies (A), continuous engagement (C), and balanced skills (D) are positive traits, B is the opposite of DevOps principles.

Therefore, B is the correct "NOT" choice.

NEW QUESTION # 79

Successful DevOps relies on the adoption and integration of multiple frameworks including:

- **A. Agile, ITSM, and Lean**
- B. Value Stream Management, Lean, Agile
- C. A shared vision, goals, and incentives
- D. Agile Service Management, Change Management, and Release Management

Answer: A

Explanation:

DevOps is not a standalone framework—it draws from several methodologies and frameworks to achieve its goals. PeopleCert emphasizes the integration of:

* Agile for iterative delivery, customer collaboration, and responsiveness

* ITSM for effective service delivery and operational stability

* Lean for waste elimination, flow optimization, and continuous improvement While lists relevant processes, they are subsets rather than foundational frameworks. C describes cultural alignment but is not a set of frameworks. D includes valuable concepts but does not match the official trio highlighted in PeopleCert's materials.

Thus, B is correct.

NEW QUESTION # 80

Which of the following is NOT a dimension of transformational leadership?

- A. Vision
- **B. Coercive communication**
- C. Personal recognition
- D. Intellectual stimulation

Answer: B

Explanation:

Coercive communication (using force or threat) is not a transformational leadership dimension.

Transformational leaders:

- * Inspire vision
- * Recognize contributions
- * Stimulate new ideas (intellectual stimulation)
- * Foster intrinsic motivation

Extract-style reference:

"Transformational leadership builds trust, motivates by vision, provides intellectual stimulation, and recognizes individuals-not by coercion, but by inspiration."

-Transformational Leadership (James Burns), PeopleCert DevOps Foundation v3.6

NEW QUESTION # 81

A healthcare organization's software developers have been practicing agile development techniques and have been able to make new features available at the end of every two-week sprint cycle. But the set-up of the production processes and infrastructure means that they have to deploy to live every quarter.

Why would DevOps be a solution to their problems?

- A. It will break the cadence between development and IT operations
- **B. IT Operations have been left behind**
- C. DevOps is focused on software development
- D. DevOps is the same as agile

Answer: B

Explanation:

When developers practice agile but operations is slow to deploy, it means IT Operations have not kept pace- classic "left behind" scenario. DevOps aims to align development and operations, breaking down barriers and enabling faster, safer, and more frequent deployments. DevOps is not only about development (B is incorrect), does not break cadence but instead aligns it (C is incorrect), and is not the same as agile but complements it (D is incorrect).

NEW QUESTION # 82

What is "Cycle Time"?

- A. The total elapsed time from the point when a user story enters the backlog, until the time it is completed
- including the time spent waiting in a backlog
- B. The time taken from a code commit to completing tests and being ready for continuous delivery

- C. The time it takes for a requirement to go from the product backlog to live
- D. The time it takes from a story to go from 'in progress' to 'done'

Answer: D

Explanation:

Cycle Time in Agile and DevOps measures the time taken for work to move from the start of active work ("in progress") to completion ("done"). It reflects the efficiency of the development process and helps identify bottlenecks in active work.

Lead Time, which includes the time spent in the backlog before work starts. It is a subset metric related to build/test time, not the full cycle time.

Shorter cycle times indicate more efficient processes and faster delivery of value. Monitoring cycle time enables continuous improvement by highlighting delays within active work.
