

Associate-Data-Practitioner Musterprüfungsfragen - Associate-Data-Practitioner Zertifizierung & Associate- Data-Practitioner Testfragen

Übrigens, Sie können die vollständige Version der ZertSoft Associate-Data-Practitioner Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1OiMpqcJFkyY1VNm8E-fYpq7bkXfTGzL>

Mit der Entwicklung der IT-Industrie nimmt die Zahl der IT-Lerner seit Jahren immer zu. Das führt zu immer stärkerer Konkurrenz. Und es ist undenkbar, dass Sie in IT-Industrie von anderen überschritten sind. Deshalb sollen Sie Ihre Fähigkeit ständig erhöhen und Ihre Stärke zu anderen beweisen. Wie können Sie Ihre Fähigkeit zu anderen beweisen? Immer mehr Leute wählen IT-Zertifizierungen, Ihre Fähigkeit zu beweisen. Wollen Sie auch? Kommen Sie zuerst zu Google Associate-Data-Practitioner Zertifizierungsprüfung. Das ist die wichtigste Google Prüfung und auch von vielen Unternehmen anerkannt.

Wenn Sie Dumps zur Google Associate-Data-Practitioner Zertifizierungsprüfung von ZertSoft kaufen, versprechen wir Ihnen, dass Sie 100% die Google Associate-Data-Practitioner Zertifizierungsprüfung bestehen können. Sonst zahlen wir Ihnen die gesamte Summe zurück.

Associate-Data-Practitioner Musterprüfungsfragen, Associate-Data-Practitioner Prüfungssimulationen

Als der professionelle Lieferant der IT-Zertifizierungsunterlagen, bieten wir ZertSoft immer die besten Unterlagen für Kandidaten und helfen vielen Leuten, die Google Associate-Data-Practitioner Prüfung zu bestehen. Mit denen Google Associate-Data-Practitioner Dumps von ZertSoft können Sie mehr selbstbewusster werden. Bei guter Nutzung der Dumps können Sie in sehr kurzer Zeit, die Google Associate-Data-Practitioner Prüfung zu bestehen. Finden Sie es unglaublich? Aber es ist wirklich. Wenn Sie diese Unterlagensfragen von ZertSoft benutzen, können Sie das Wunder sehen.

Google Associate-Data-Practitioner Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Data Management: This domain measures the skills of Google Database Administrators in configuring access control and governance. Candidates will establish principles of least privilege access using Identity and Access Management (IAM) and compare methods of access control for Cloud Storage. They will also configure lifecycle management rules to manage data retention effectively. A critical skill measured is ensuring proper access control to sensitive data within Google Cloud services
Thema 2	• Data Preparation and Ingestion: This section of the exam measures the skills of Google Cloud Engineers and covers the preparation and processing of data. Candidates will differentiate between various data manipulation methodologies such as ETL, ELT, and ETLT. They will choose appropriate data transfer tools, assess data quality, and conduct data cleaning using tools like Cloud Data Fusion and BigQuery. A key skill measured is effectively assessing data quality before ingestion.
Thema 3	• Data Analysis and Presentation: This domain assesses the competencies of Data Analysts in identifying data trends, patterns, and insights using BigQuery and Jupyter notebooks. Candidates will define and execute SQL queries to generate reports and analyze data for business questions. Data Pipeline Orchestration: This section targets Data Analysts and focuses on designing and implementing simple data pipelines. Candidates will select appropriate data transformation tools based on business needs and evaluate use cases for ELT versus ETL.

Google Cloud Associate Data Practitioner Associate-Data-Practitioner Prüfungsfragen mit Lösungen (Q103-Q108):

103. Frage

Your company's ecommerce website collects product reviews from customers. The reviews are loaded as CSV files daily to a Cloud Storage bucket. The reviews are in multiple languages and need to be translated to Spanish. You need to configure a pipeline that is serverless, efficient, and requires minimal maintenance. What should you do?

- A. Load the data into BigQuery using a Cloud Run function. Use the BigQuery ML create model statement to train a translation model. Use the model to translate the product reviews within BigQuery.
- B. Use a Dataflow templates pipeline to translate the reviews using the Cloud Translation API. Set BigQuery as the sink.
- C. Load the data into BigQuery using Dataproc. Use Apache Spark to translate the reviews by invoking the Cloud Translation API. Set BigQuery as the sink.
- **D. Load the data into BigQuery using a Cloud Run function. Create a BigQuery remote function that invokes the Cloud Translation API. Use a scheduled query to translate new reviews.**

Antwort: D

Begründung:

Loading the data into BigQuery using a Cloud Run function and creating a BigQuery remote function that invokes the Cloud Translation API is a serverless and efficient approach. With this setup, you can use a scheduled query in BigQuery to invoke the remote function and translate new product reviews on a regular basis. This solution requires minimal maintenance, as BigQuery handles storage and querying, and the Cloud Translation API provides accurate translations without the need for custom ML model development.

104. Frage

Your company wants to implement a data transformation (ETL) pipeline for their BigQuery data warehouse. You need to identify a managed transformation solution that allows users to develop with SQL and JavaScript, has version control, allows for modular code, and has data quality checks. What should you do?

- **A. Use Dataform to define the transformations in SQLX.**
- B. Create a Cloud Composer environment, and orchestrate the transformations by using the BigQueryinsertJob operator.
- C. Use Dataproc to create an Apache Spark cluster and implement the transformations by using PySpark SQL.
- D. Create BigQuery scheduled queries to define the transformations in SQL.

Antwort: A

Begründung:

Comprehensive and Detailed in Depth Explanation:

Why C is correct: Dataform is a managed data transformation service that allows you to define data pipelines using SQL and JavaScript.

It provides version control, modular code development, and data quality checks.

Why other options are incorrect: A: Cloud Composer is an orchestration tool, not a data transformation tool.

B: Scheduled queries are not suitable for complex ETL pipelines.

D: Dataproc requires setting up a Spark cluster and writing code, which is more complex than using Dataform.

105. Frage

You need to create a new data pipeline. You want a serverless solution that meets the following requirements:

- * Data is streamed from Pub/Sub and is processed in real-time.
- * Data is transformed before being stored.
- * Data is stored in a location that will allow it to be analyzed with SQL using Looker.

Which Google Cloud services should you recommend for the pipeline?

- A. 1. Dataflow
2. BigQuery
- B. 1. Dataproc Serverless
2. Bigtable
- C. 1. Cloud Composer
2. Cloud SQL for MySQL
- D. 1. BigQuery
2. Analytics Hub

Antwort: A

Begründung:

To build a serverless data pipeline that processes data in real-time from Pub/Sub, transforms it, and stores it for SQL-based analysis using Looker, the best solution is to use Dataflow and BigQuery. Dataflow is a fully managed service for real-time data processing and transformation, while BigQuery is a serverless data warehouse that supports SQL-based querying and integrates seamlessly with Looker for data analysis and visualization. This combination meets the requirements for real-time streaming, transformation, and efficient storage for analytical queries.

106. Frage

Your company uses Looker to generate and share reports with various stakeholders. You have a complex dashboard with several visualizations that needs to be delivered to specific stakeholders on a recurring basis, with customized filters applied for each recipient. You need an efficient and scalable solution to automate the delivery of this customized dashboard. You want to follow the Google-recommended approach. What should you do?

- A. Use the Looker Scheduler with a user attribute filter on the dashboard, and send the dashboard with personalized filters to each stakeholder based on their attributes.
- B. Embed the Looker dashboard in a custom web application, and use the application's scheduling features to send the report with personalized filters.
- C. Create a separate LookML model for each stakeholder with predefined filters, and schedule the dashboards using the Looker Scheduler.
- D. Create a script using the Looker Python SDK, and configure user attribute filter values. Generate a new scheduled plan for each stakeholder.

Antwort: A

Begründung:

Using the Looker Scheduler with user attribute filters is the Google-recommended approach to efficiently automate the delivery of a customized dashboard. User attribute filters allow you to dynamically customize the dashboard's content based on the recipient's attributes, ensuring each stakeholder sees data relevant to them. This approach is scalable, does not require creating separate models or custom scripts, and leverages Looker's built-in functionality to automate recurring deliveries effectively.

107. Frage

Your organization stores highly personal data in BigQuery and needs to comply with strict data privacy regulations. You need to ensure that sensitive data values are rendered unreadable whenever an employee leaves the organization. What should you do?

- **A. Use customer-managed encryption keys (CMEK) and delete keys when employees leave the organization.**
- B. Use AEAD functions and delete keys when employees leave the organization.
- C. Use column-level access controls with policy tags and revoke viewer permissions when employees leave the organization.
- D. Use dynamic data masking and revoke viewer permissions when employees leave the organization.

Antwort: A

Begründung:

Using customer-managed encryption keys (CMEK) allows you to encrypt highly sensitive data in BigQuery with encryption keys managed by your organization. When an employee leaves the organization, you can render the data unreadable by deleting or revoking access to the encryption keys associated with the data. This approach ensures compliance with strict data privacy regulations by making the data inaccessible without the encryption keys, providing strong control over data access and security.

108. Frage

.....

Machen Sie noch Sorge um die schweren Google Associate-Data-Practitioner Zertifizierungsprüfungen? Seien Sie nicht mehr besorgt! Unser ZertSoft bietet Ihnen die Testfragen und Antworten von Google Associate-Data-Practitioner Zertifizierungsprüfung, die von den IT-Experten durch Experimente und Praxis erhalten werden und über IT-Zertifizierungserfahrungen über 10 Jahre verfügt. Die Testaufgaben und Antworten von Google Associate-Data-Practitioner Zertifizierungsprüfung aus ZertSoft sind zur Zeit das gründlichste, das genaueste und das neueste Produkt auf dem Markt.
