If you want to pass your exam just one time, then our Identity-and-Access-Management-Architect exam torrent will be your best choice. We can help you pass your exam just one time, and if you fail the exam in your first attempt after using Identity-and-Access-Management-Architect exam torrent, we will give you refund, and no other questions will be asked. Moreover, [Identity-and-Access-Management-Architect Exam Braindumps](#) of us are high-quality, and we have helped lots of candidates pass the exam successfully. We have received many good feedbacks from our customers. We offer you online and offline chat service stuff, if you have any questions about Identity-and-Access-Management-Architect exam torrent, you can consult them.

DumpsTests has hired a team of experts who keeps an eye on the Salesforce Certified Identity and Access Management Architect real exam content and updates our Identity-and-Access-Management-Architect study material according to new changes on daily basis. Moreover, you will receive free Salesforce Certified Identity and Access Management Architect exam questions updates if there are any updates in the content of the Salesforce Certified Identity and Access Management Architect test. These updates will be given within up to 1 year of your purchase. The 24/7 support system has been made for your assistance to solve your technical problems while using our product. Don't wait anymore. Buy real Salesforce Certified Identity and Access Management Architect questions and start preparation for the [Identity-and-Access-Management-Architect](#) test today!

## NetSec-Architect exam torrent pdf & NetSec-Architect latest vce & NetSec-Architect training vce

Do you want to pass NetSec-Architect certification exam easily? Then it is necessary to have TestInsides NetSec-Architect exam certification training materials. TestInsides NetSec-Architect test training materials are summarized by IT experts with constant practice, which is the combination of NetSec-Architect Exam Dumps and answers, and can't be matched by any NetSec-Architect test training materials from others. TestInsides will take you to a more beautiful future.

## Palo Alto Networks Network Security Architect Sample Questions (Q20-Q25):

### NEW QUESTION # 20

An organization wants to reduce attack surface by allowing only sanctioned applications while blocking unknown traffic. What is the BEST approach?

- A. Allow all and monitor logs
- B. Use only antivirus profiles
- C. Block all ports except 80/443
- D. Use App-ID with allow-list policy

**Answer: D**

Explanation:

An allow-list using App-ID ensures only approved applications are permitted, reducing attack surface significantly. Blocking ports alone is insufficient because applications can use non-standard ports. Antivirus profiles detect threats but do not enforce application-level access control.

### NEW QUESTION # 21

A retail organization wants to sanction the use of a particular third-party SaaS-based AI application for inventory management. This application will need network layer data access to the organization's internal supply chain database with confidential information highly secured in its own DMZ. The implementation is delayed because the CISO is concerned that the sanctioned third-party AI application could get compromised and then used to exfiltrate customer PII from the internal database. Which solution will address the CISO's concern?

- A. Prisma AIRS with AI Security content updates to inspect the model's behavior and block anomalous database queries
- B. Prisma AIRS with the AI agent deployed on the database server to monitor for unauthorized access attempts
- C. AI Access Security with an App-ID Cloud Engine subscription to precisely identify and then block the inventory management application entirely
- D. AI Access Security with an Enterprise DLP subscription to identify and block the PII within the traffic to and from the SaaS application

**Answer: D**

Explanation:

Enterprise DLP integrated with AI Access Security inspects traffic to and from the SaaS application and can detect sensitive data such as customer PII. It enforces policies to prevent exfiltration even if the application is compromised, allowing the organization to safely sanction the AI application while protecting confidential data.

### NEW QUESTION # 22

You need to ensure consistent threat prevention across all applications. Which approach should you use?

- A. Use NAT rules
- B. Disable inspection
- C. Apply profiles per application manually
- D. Use Security Profiles Group

**Answer: D**

Explanation:

Security Profile Groups allow consistent application of multiple security profiles across policies. This ensures standardized protection and simplifies management compared to applying profiles individually.

### NEW QUESTION # 23

A multinational organization has a large worldwide remote user base. This user base consists of several persona types with distinct requirements and concerns regarding the adoption of a Zero Trust Network Access (ZTNA) solution.

- Developers have a requirement to temporarily bypass security controls for business purposes, but the security team sees this as a potential risk. The developers commonly access development servers onsite in private data centers and public cloud. These development applications use web (HTTP/HTTPS), API, RPC, and SMB-based applications.

- Sales staff travel regularly and connect to the network via many different types of connections, but they are generally limited to SaaS-based web applications. They often complain about performance when any agent is installed and want the ability to temporarily disable these agents.

Data exfiltration and insider risk have been identified as the primary threats for this class of user.

- Executives have concerns about being high-value targets. Security must be consistent across the multiple endpoint types, including mobile and desktop devices. The executive team members have indicated that their primary objective is to ensure that the solution is responsive and easy to troubleshoot.

Which two parameters should the architect take into account regarding GlobalProtect gateway selection? (Choose two.)

- A. Proximity to users
- B. Proximity to destination resources
- C. Gateway geo IP mapping
- D. Gateway priority

**Answer: A,D**

Explanation:

GlobalProtect gateway selection is influenced by configured gateway priority, which determines preferred gateways, and by proximity to users, which ensures users connect to the closest and most optimal gateway for performance and latency.

#### NEW QUESTION # 24

A company wants automated response to detected threats. What should they implement?

- A. SOAR integration
- B. Disable alerts
- C. Manual response
- D. Static rules only

**Answer: A**

Explanation:

SOAR enables automated incident response by integrating detection and remediation workflows.

This reduces response time and improves consistency compared to manual processes.

#### NEW QUESTION # 25

.....

As the captioned description said, our NetSec-Architect practice materials are filled with the newest points of knowledge about the exam. With many years of experience in this line, we not only compile real test content into our NetSec-Architect practice materials, but the newest in to them. Allowing for there is a steady and growing demand for our NetSec-Architect practice materials with high quality at moderate prices, we never stop the pace of doing better. All newly supplementary updates will be sent to your mailbox one year long. And we shall appreciate it if you choose any version of our NetSec-Architect practice materials for exam and related tests in the future.
